Middle East and Central Asia Dept.,2014-08-12 This Poverty Reduction Strategy Paper on Kyrgyz Republic highlights that the period 2009 through filled with symbolic events marked a new milestone in the Kyrgyz Republic development and will enter the country s history as the period of strength test for the Kyrgyz statehood and entire public administration system including socio political economic environmental financial and other areas of development management The country development background during that period included the world financial crisis and growing uncertainty on world markets which created risks for all market actors including the Kyrgyzstan s key trade partners such as Russia Kazakhstan and China The government officially declared the country s sustainable development oriented policy For Kyrgyzstan as a country with its still high poverty level particularly in rural areas and limited natural and financial resources the sustainable development policy seems today s logically and politically justified choice The sustainable development model itself suggests striving for systemic comprehensiveness and balance in development Transition to sustainable development suggests considering economic growth through the prism of human values and reasonable use of natural resources **Slovak Republic** International Monetary Fund. European Dept.,2018-07-26 This Selected Issues paper assesses Slovakia s household and private sector indebtedness against macroeconomic fundamentals identifies key vulnerabilities from rapid household credit growth assesses policy responses to date and presents further policy options Strong private sector credit growth has persisted for over a decade and resulted in household debt that is high relative to peers Credit is now growing in riskier segments Housing prices have also started to reflect pressures from strong credit growth The paper describes assessments of household and private sector debt levels relative to fundamentals It also describes the policy response to date and assesses its effectiveness Econometric analysis suggests that household indebtedness is growing at a faster pace than implied by economic fundamentals The credit cycle seems to have reached its post crisis high The credit cyclogram compiled by the National Bank of Slovakia is an aggregation of a set of core and supplementary variables evaluated against distributions of their own historical values to disentangle factors cyclical credit growth **Czech Republic** ,1999-01-01 Summary of Main

Report At the end of 1995 the Czech Republic was regarded as the clearest success story in the region It had one of the lowest rates of inflation and the lowest rates of unemployment The high GDP growth rate looked sustainable as it was accompanied by a moderate current account deficit balanced fiscal account and seemed to be underpinned by important structural reform From the Main Report The Czech Republic was perceived until 1996 as the most successful transition economy in Central and Eastern Europe CEE The Czech Republic seems to be the clearest success story in the region However the Czech miracle came to a halt in May 1997 Its future economic development and successful integration into the European Union EU depends critically on its capacity to recover a sustainable output growth path To assist the country in achieving its primary goal to join the European Union EU in the shortest period of time this report analyzes economic developments in the Czech Republic since 1997 It focuses on assessing the status of the Czech Republic s economy from the perspective of its pursuit for EU membership The report is composed of two volumes The first volume is the summary report that condenses main findings and conclusions The second volume is the main report It provides the assessment and technical study of selected key sectors of the Czech economy The EU accession process dominates the sector analyses which are outlined in each chapter Also available Czech Republic Toward EU Accession Main Report World Bank Country Study 1999 344 pages Stock no 14590 ISBN 0 8213 4590 7

*Slovak Republic* International Monetary Fund. European Dept., 2025-03-24 Membership of the European Union EU adoption of the euro and integration in global value chains have contributed to a convergence towards living standards of more advanced EU countries However progress has slowed in recent years and like many other EU countries Slovakia is facing structural headwinds related to geoeconomic fragmentation and demographic change Meanwhile above EU growth in recent years has come with a significant widening of the fiscal deficit

**Czech Republic** International Monetary Fund. European Dept., 2018-06-29 This 2018 Article IV Consultation highlights that Czech Republic s growth has been strong broad based and job rich The economy grew at 4.4 percent in 2017 led by strong domestic demand The unemployment rate fell to a record low of 2.3 percent in April 2018 even with increased participation Meanwhile headline and core inflation are close to the target of 2 percent Growth is projected to remain strong this year at 3.7 percent but labor shortages are putting constraints on future growth In the near term a decline in global trade is a major risk for a small economy highly dependent on external demand particularly from the euro area but also indirectly from other regions given how tightly integrated is the Czech economy into supply chains

*Dominican Republic* International Monetary Fund. Western Hemisphere Dept., 2024-09-13 The Dominican Republic has grown strongly over the last two decades supported by political and social stability and a sustained track record of strong policies and strengthened institutional policy frameworks The next term of

**Czech Republic** International Monetary Fund,2024-01-30 Growth slowed considerably following Russia s invasion of Ukraine reflecting disruptions in global value chains significant increases in energy and commodity prices an erosion in real wages and a necessary tightening in monetary policy Growth is expected to pick up in 2024 led by consumption and fixed investment as inflation fades and real income recovers supported by net exports Nevertheless over the medium term GDP is not expected to reach the levels consistent with its pre pandemic trend Inflation peaked in 2022 and is projected to meet its target by early 2025 Risks are tilted to the downside for activity and to the upside for inflation
