Dreyfuss, Justine Pila, 2018-04-12 We live in an age in which expressive informational and technological subject matter are becoming increasingly important Intellectual property is the primary means by which the law seeks to regulate such subject matter It aims to promote innovation and creativity and in doing so to support solutions to global environmental and health problems as well as freedom of expression and democracy It also seeks to stimulate economic growth and competition accounting for its centrality to EU Internal Market and international trade and development policies Additionally it is of enormous and increasing importance to business As a result there is a substantial and ever growing interest in intellectual property law across all spheres of industry and social policy including an interest in its legal principles its social and normative foundations and its place and operation in the political economy This handbook written by leading academics and practitioners from the field of intellectual property law and suitable for both a specialist legal readership and an intelligent but non specialist legal and non legal readership provides a comprehensive account of the following areas The foundations of IP law including its emergence and development in different jurisdictions and regions The substantive rules and principles of IP and Important issues arising from the existence and operation of IP in the political economy **Inside the Designer: Understanding imagining in spatial design.** Marisha McAuliffe, 2016 Design is fundamental to our modern world All human achievements great and small owe their being in no small measure to the concept of design Whether it is in social and technological innovations great human endeavours building and construction

projects or simply the environment and desire of the individual design has been there. But a question remains: what goes on inside the designer's head? For many decades now, researchers, philosophers, and academics have pondered this question. In this book, Dr. Marisha McAuliffe focuses on the notions of imagining and design to interrogate such a question. In this book, McAuliffe outlines her seminal work as a design practitioner and academic over many years to expand our understanding of imagining in the spatial design disciplines of architecture and interior design. This book is compulsive reading for the design professional, the student of design, and those who have pondered what goes on inside the designer's head. Community Resources Johanna Gibson, 2016-12-05. Protection of traditional knowledge and resources is of critical concern not only to the groups involved but also to the international trading community for which these resources are of increasing economic importance. This work examines the concept of community intellectual property models and additional sources for protection at international law, including environmental and human rights frameworks. Intellectual property law is critiqued as an inadequate framework to address the fundamental object of protection for the communities themselves: the management of traditional use as well as the biological and cultural sustainability of this use. The work sets out an international framework based on the concept of community resources, recognizing the unique claims embodied in traditional knowledge, incorporating customary law, and facilitating community management of resources. International in perspective and scope, the book will be a valuable resource for academics and researchers in law, international relations, and cultural studies.

**Architectural Conservation in Australia, New Zealand and the Pacific Islands** John Stubbs, William Chapman, Julia Gatley, Ross King, 2023-12-22. The fourth in a series that documents architectural conservation in different parts of the world, *Architectural Conservation in Australia, New Zealand and the Pacific Islands: National Experiences and Practice* addresses cultural heritage protection in a region which comprises one third of the Earth's surface. In response to local needs, Australia, New Zealand, and the Pacific Islands have developed some of the most important and influential techniques, legislation, doctrine, and theories in cultural heritage management in the world. The evolution of the heritage protection ethos and contemporary architectural conservation practices in Australia and Oceania are discussed on a national and regional basis, using ample illustrations and examples. Accomplishments in architectural conservation are discussed in their national and international contexts, with an emphasis on original developments, solutions, and contributions made to the overall field. Enriched with essays contributed from fifty-nine specialists and thought leaders in the field, this book contains an extraordinary breadth and depth of research and synthesis on the why's and how's of cultural heritage conservation. Its holistic approach provides an essential resource and reference for students, academics, researchers, policy makers, practitioners, and all who are interested in conserving the built environment. *Proceedings of the Parliament of South Australia* South Australia.
