Rescuing Econometrics Duo Qin, 2023-12-01 Haavelmo's 1944 monograph The Probability Approach in Econometrics is widely acclaimed as the manifesto of econometrics This book challenges Haavelmo's probability approach shows how its use is delivering defective and inefficient results and argues for a paradigm shift in econometrics towards a full embrace of machine learning with its attendant benefits Machine learning has only come into existence over recent decades whereas the universally accepted and current form of econometrics has developed over the past century A comparison between the two is however striking The practical achievements of machine learning significantly outshine those of econometrics confirming the presence of widespread inefficiencies in current econometric research The relative efficiency of machine learning is based on its theoretical foundation and particularly on the notion of Probably Approximately Correct PAC learning Careful examination reveals that PAC learning theory delivers the goals of applied economic modelling research far better than Haavelmo's probability approach Econometrics should therefore renounce its outdated foundation and rebuild itself upon PAC learning theory so as to unleash its pent up research potential The book is catered for applied economists econometricians economists specialising in the history and methodology of economics advanced students philosophers of social sciences

Rescuing Regulation Reza R. Dibadj, 2012-02-01 The traditional debate on governmental regulation has run its course with economically minded analysts pointing to regulation's inefficiency while those focused on justice purposefully avoid the economic paradigm to defend regulation's role in protecting consumers, workers, and society's disadvantaged. In *Rescuing Regulation*, Reza R. Dibadj challenges both camps. He squarely addresses the shortcomings of the conventional economic critique that portrays regulation as a waste and also confronts those focused on justice to marshal economic arguments for public intervention against social inequities and abusive market behavior. Providing novel answers to the questions of why and how to regulate, Dibadj contends that the law and economics paradigm must not remain an apologist for laissez faire public policy. He also demonstrates how incorporating the latest economics and revamping institutions can help improve our public agencies. *Rescuing Regulation* not only suggests ways to develop public institutions reflective of a democracy but also broadly outlines how social science can inform normative legal discourse.
