M.R. Rosenzweig, Oded Stark

Research In Population Economics A Research Annual 1991 Research In Population Economics:

Research in Population Economics, 1980 **Handbook of Population and Family Economics** M.R. Rosenzweig, Oded Stark, 1997-04-23 Comprises 21 articles that survey areas of research in population and family economics **Population, Economic Growth and Agriculture in Less Developed Countries** Nadia Cuffaro, 2003-08-29 In 1950 the world population was 2.5 billion fifty years later there are over 6 billion people The demographic of this explosion has essentially occurred in the developing areas of the world The key to understanding many contemporary development problems that have arisen from this rapid growth is in understanding the relationships between population and the economy This book offers an analysis of such relationships encompassing a review of the major positions in the academic debate Population Economic Growth and Agriculture in Less Developed Countries will serve as a useful introduction and reference tool for students academics and all with an interest in the population debate and economics **Researching Social and Economic Change** David Rose, 2000 In this user friendly introduction European and American experts in the field join forces to explain what panel studies can achieve and to illustrate some of the potential pitfalls in the construction and analysis of panel data Household panel studies provide one of the most significant national and international resources for analysing social and economic change This is an essential and accessible introduction for those contemplating the use of panel studies for the first time and will be an invaluable resource for both practising researchers and the commissioners of research **Statistical Abstract of the United States**, 1993 **International Handbook on the Economics of Integration** Miroslav N. Jovanović, 2011-01-31 International Handbook of Economic Integration edited by Miroslav Jovanovi provides timely and rich academic contributions to considerations of the widest array of integration related issues European integration has been providing an inspiration to a number of academics and researchers The Handbook is a recognition of the dynamic and strong solidarity of the European integration At the same time the European Union often provided an example for integration schemes throughout the world which spread enormously since the mid 1990s Leading experts from all continents contributed to this Handbook which will be a valuable input into academic and policy making discussions and actions Jos Manuel Barroso President of the European Commission Miroslav Jovanovi s publication represents a rich contribution to the complex issue of regional integration its benefits its shortcomings and its relationship with multilateral trade opening It sheds light over an issue which is the subject of intense discussions in trade circles Pascal Lamy Director General of the WTO Much has been written on trade agreements as a mechanism to integrate the markets of two or more countries often inspired by the European example In recent years attention has increasingly focused on the importance of economic geography as a determinant of industrial location This book combines the two strands of analysis bringing together leading experts in the fields of economic geography and international trade The result is an outstanding compilation of papers that illuminate how policies and economic forces affect the location of economic activity in an integrated Europe Bernard Hoekman Director The World Bank US The open

multilateral trading system is a tremendous success of the past half century and has contributed greatly to the world's unprecedented rate of economic growth. Over the past two decades however preferential trading arrangements have proliferated raising questions as to how compatible they are with the open multilateral system and what policies might be adopted to improve outcomes. The essays in this volume detail the emergence of PTAs and provide comprehensive and up to date analyses of the state of play of preferential arrangements in all regions of the world. The volume will provide a useful reference for all those wanting to understand existing preferential arrangements and their role in the international economy today. Anne O Krueger, Johns Hopkins University and Stanford University.

US Economic integration is a complex and multifaceted giant with a myriad aspects ranging from regional and global concentration and dispersal of economic activity to social and political consequences for individuals and communities in developed and developing countries alike. This landmark three volume collection of chapters by leading authors drawn from many fields is a worthy and timely contribution to the analysis of a phenomenon with profound implications for the future world economy and its governance. James Zhan, Director, Investment, agriculture and environment and quantitative studies of integration effects.

A removal of barriers for the mobility of factors in certain integration arrangements among countries has an impact on the mobility of capital firms and individuals within the group. Various aspects of this factor mobility are analysed in eight detailed chapters. The second theme of the Handbook is devoted to agriculture and environment. This is of great global relevance as the Common Agricultural Policy of the EU has been a bone of contention in international relations over several decades. Finally seven quantitative studies of the effects of integration attempt to measure various potential benefits of regional integration efforts. Contributors to this major reference work include eminent authors some of whom contributed to the creation of economic integration theory from the outset. The authors not only survey the literature but also present their own arguments and new ideas in order to offer a new perspective as well as discussing the issues they believe are essential in the field. Each of the insightful chapters is approachable not only to graduate students, scholars, researchers and policymakers but also to advanced undergraduate students.

Population and Poverty in the Developing World Massimo Livi-Bacci, Gustavo De Santis, 1999-04-01

The increasing gap between developed and developing world will be one of the most important themes of the 21st century. The contributions contained in this volume take a multidisciplinary approach to the problem offering a comprehensive review of the theoretical issues and empirical findings that relate to the complex and multidirectional link between poverty and demographic behaviours and outcomes in the contemporary developing world. The starting point of the volume is an exact definition of poverty. The contributors go on to analyse in the detail its causes and effects both at the micro and macro level concentrating on those factors and consequences which relate more directly to the demographic sphere. Population growth, household structure and labour fertility, AIDS, urbanization, migration and mortality are amongst the areas covered with the major themes discussed and elaborated in an introductory overview chapter.

Carrying

Capacity of China's Resources, Environment, Population, and Economy Dong Qiu, 2024-05-13 This book systematically examines the progression of carrying capacity research and its correlation with sustainable development constructing a new framework of interactive theory and application methods within the context of sustainable development Additionally it links carrying capacity theory and methods with the unique challenges faced by China in achieving sustainable development The book delves into the implementation of sustainable development strategies tailored to China's specific circumstances In practical research the book conducts comprehensive calculations and analyses of the carrying capacity of various regions in China from resource environmental and economic perspectives It employs various analytical approaches to elucidate and investigate three key issues in China's current development landscape regional functional planning urban rural coordinated development and the transformation of economic growth models The book is intended to unveil more efficacious solutions pathways and measures to address these challenges

International Handbook on the Economics of Migration Amelie F. Constant, Klaus F. Zimmermann, 2013-09-30 This is an extremely impressive volume which guides readers into thinking about migration in new ways In its various chapters international experts examine contemporary migration issues through a multitude of lenses ranging from child labor human t

Independence and Economic Security in Old Age Frank Denton, 2011-11-01 As boomers move towards retirement the phenomenon of population aging has become a much publicized issue Independence and Economic Security in Old Age focuses on the economic and social implications of aging at the level of the individual and of society as a whole The product of a three year research program the book contains chapters by recognized experts in the fields of economics and econometrics sociology social work medicine epidemiology gerontology and nursing The book first looks at some basic demographic issues including the definition of old the changing age distribution of the population and the demographic outlook for the next several decades It then moves into the area of family relations health and economic security The concept of independence among the elderly is examined and the degree of preparedness for old age by different elderly or soon to be elderly cohorts is considered The measurable social contributions of the elderly are also discussed in juxtaposition with the benefits they receive The book continues with an examination of the saving behaviour of the elderly the appropriateness of the Consumer Price Index as a measure of inflation the incomes of older women and how the tax transfer system affects the incentives of Canadians to save for retirement Comprehensive and innovative in its consideration of the issues and implications of aging this book will be a valuable resource for specialists and non specialists interested in issues of population aging for students of gerontology economics sociology health studies social work and women's studies and for social planners and policy makers
