Policy Analysis in the Twenty-First Century Beryl A. Radin, 2019 The field called policy analysis focused originally on the formulation of new policies and was structured to give advice to those in the top reaches of government agencies Within several decades the field moved beyond the formulation stage of the policy process creating new policies to agenda setting implementation and evaluation of existing policies New skill sets emerged and staff were found in many parts of the policy world Despite these changes there has been little attention paid to the possible shifts in the relationship between analysts and clients and students of policy analysis often enter the world of work with little exposure to the situations they might face Policy Analysis in the Twenty First Century is designed to familiarize students with the diversity of experiences that they can expect to face in their practitioner role Author Beryl Radin bases the discussion on case studies that illustrate realities in the current policy analysis environment Set in very different environments including

both US and international settings the players in the cases illustrate three different stages of a career beginning the career mid career and people at the end of their career The cases are based on realistic situations and demonstrate the volatility and complexity of the decision environments At the same time they provide attention to the analysts personal values and career goals This book will be required reading for faculty and masters level students in both public management and policy analysis classes It may also be used in executive programs

Volume Two of the *Classics of Comparative Policy Analysis* contains chapters concerned with *Institutions and Governance in Comparative Policy Analysis Studies*. They highlight that at the core of any policy making, the different institutions and modes of governance have a significant effect. Questions about the impact of governance have become more central to comparative policy analysis as scholars have given more attention to globalization, organizational cultural differences, policy learning, transfer, and diffusion. The chapters included in this volume tackle the nature of policies and policy analytic practices within and across organizations, actors, and institutions, as well as among governance modes. The chapters demonstrate the ways in which institutions and governance in the public and private sectors shape policies and conversely how policy choices can shape the institutions associated with them. Other chapters focus on how the diffusion of knowledge and lesson drawing address challenges of policy making, cooperation, and harmonization. *Institutions and Governance in Comparative Policy Analysis Studies* will be of great interest to scholars and learners of public policy and social sciences as well as to practitioners considering what can be reliably contextualized, learned, facilitated, or avoided given their own institutional or governance systems. The chapters were originally published as articles in the *Journal of Comparative Policy Analysis*, which in the last two decades has pioneered the development of comparative public policy. The volume is part of a four-volume series, the *Classics of Comparative Policy Analysis*, including *Theories and Methods*, *Institutions and Governance*, *Regional Comparisons and Policy Sectors*. Each volume also showcases a new chapter comparing interrelated domains of study with comparative public policy, political science, public administration, governance, and policy design, authored by JCPA co-editors: Giliberto Capano, Iris Geva-May, Michael Howlett, Leslie Pal, and B.
