

Why adolescents take risks

- Developing one's own moral code and establishing an identity, separate from parents is a major task of adolescence
 - Early adolescence (ages 11-14) – first stages of separation from parents, desire to look and act like peers, difficulty with impulse control
 - Middle adolescence (ages 15-17) – further distancing from parents and allying with peers, feelings of omnipotence and immortality can lead to dangerous behaviors
 - Late adolescence (ages 18-21) - fully identify one's own moral code, more confident and better able to delay gratification, can be protective factors
