L'ordre cannibale Jacques Attali,1979 L'ordre cannibale Jacques Attali,1979 *Why Are Some People Healthy and Others Not?* Robert G. Evans,Morris L. Barer,Theodore R. Marmor,2021-06-21 No detailed description available for *Why Are Some People Healthy and Others Not* Current Catalog National Library of Medicine (U.S.), **Biolust, Brain Death, and the Battle Over Organ Transplants** William R. LaFleur,2022-11-03 William LaFleur 1936 2010 an eminent scholar of Japanese studies left behind a substantial number of influential publications as well as several unpublished works The most significant of these examines debates concerning the practice of organ transplantation in Japan and the United States and is published here for the first time This provocative book challenges the North American medical and bioethical consensus that considers the transplantation of organs from brain dead donors as an unalloyed good It joins a growing chorus of voices that question the assumption that brain death can be equated facilely with death It provides a deep investigation of debates in Japan introducing numerous Japanese bioethicists whose work has never been treated in English It also provides a history of similar debates in the United States problematizing the commonly held view that the American public was quick and eager to accept the redefinition of death A work of intellectual and social history this book also directly engages with questions that grow ever more relevant as the technologies we develop to extend life continue to advance While the benefits of these technologies are obvious their costs are often more difficult to articulate Calling attention to the risks associated with our current biotech trajectory LaFleur stakes out a highly original position that does not fall neatly onto

either side of contemporary US ideological divides **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1985 **Biotheory** Jeffrey R. Di Leo,Peter Hitchcock,2020-01-15 Forged at the intersection of intense interest in the pertinence and uses of biopolitics and biopower this volume analyzes theoretical and practical paradigms for understanding and challenging the socioeconomic determinations of life and death in contemporary capitalism Its contributors offer a series of trenchant interdisciplinary critiques each one taking on both the specific dimensions of biopolitics and the deeper genealogies of cultural logic and structure that crucially inform its impress New ways to think about biopolitics as an explanatory model are offered and the subject of bios life ways of life itself is taken into innovative theoretical possibilities On the one hand biopolitics is addressed in terms of its contributions to forms and divisions of knowledge on the other its capacity for reformulation is assessed before the most pressing concerns of contemporary living It is a must read for anyone concerned with the study of bios in its theoretical profusions **The Western Medical Tradition** Lawrence I. Conrad,1995-08-17 This text written by members of the Wellcome Institute for the History of Medicine and first published in 1995 is designed to cover the history of western medicine from classical antiquity to 1800 As one guiding thread it takes as its title suggests the system of medical ideas that in large part went back to the Greeks of the eighth century BC and played a major role in the understanding and treatment of health and disease Its influence spread from the Aegean basin to the rest of the Mediterranean region to Europe and then to European settlements overseas By the nineteenth century however this tradition no longer carried the same force or occupied so central a position within medicine This book charts the influence of this tradition examining it in its social and historical context It is essential reading as a synthesis for all students of the history of medicine **Bibliography of the History of Medicine** , Reading Food in Modern Japanese Literature Tomoko Aoyama,2008-09-30 Literature like food is in Terry Eagleton s words endlessly interpretable and food like literature looks like an object but is actually a relationship So how much do we and should we read into the way food is represented in literature Reading Food explores this and other questions in an unusual and fascinating tour of twentieth century Japanese literature Tomoko Aoyama analyzes a wide range of diverse writings that focus on food eating and cooking and considers how factors such as industrialization urbanization nationalism and gender construction have affected people s relationships to food nature and culture and to each other The examples she offers are taken from novels shosetsu and other literary texts and include well known writers such as Tanizaki Jun ichiro Hayashi Fumiko Okamoto Kanoko Kaiko Takeshi and Yoshimoto Banana as well as those who are less widely known Murai Gensai Nagatsuka Takashi Sumii Sue and Numa Shozo Food is everywhere in Japanese literature and early chapters illustrate historical changes and variations in the treatment of food and eating Examples are drawn from Meiji literary diaries children s stories peasant and proletarian literature and women s writing before and after World War II The author then turns to the theme of cannibalism in serious and popular novels Key issues include ethical questions about survival colonization and cultural identity The quest for gastronomic

gratification is a dominant theme in gourmet novels Like cannibalism the gastronomic journey as a literary theme is deeply implicated with cultural identity The final chapter deals specifically with contemporary novels by women some of which celebrate the inclusiveness of eating and writing while others grapple with the fear of eating Such dread or disgust can be seen as a warning against what the complacent gourmet boom of the 1980s and 1990s concealed the dangers of a market economy environmental destruction and continuing gender biases Reading Food in Modern Japanese Literature will tempt any reader with an interest in food literature and culture Moreover it provides appetizing hints for further savoring digesting and incorporating textual food
