The Public's Law Blake Emerson, 2019 The Public's Law is a theory and history of democracy in the American administrative state The book describes how American Progressive thinkers such as John Dewey W E B Du Bois and Woodrow Wilson developed a democratic understanding of the state from their study of Hegelian political thought G W F Hegel understood the state as an institution that regulated society in the interest of freedom This normative account of the state distinguished his view from later German theorists such as Max Weber who adopted a technocratic conception of bureaucracy and others such as Carl Schmitt who prioritized the will of the chief executive The Progressives embraced Hegel's view of the connection between bureaucracy and freedom but sought to democratize his concept of the state They agreed that welfare services economic regulation and official discretion were needed to guarantee conditions for self-determination But they stressed that the people should participate deeply in administrative policymaking This Progressive ideal influenced administrative programs during the New Deal It also sheds light on interventions in the War on Poverty and the Second Reconstruction as well as on the Administrative Procedure Act of 1946 The book develops a normative theory of the state on the basis of this intellectual and institutional history with implications for deliberative democratic theory constitutional theory and administrative law On this view the administrative state should provide regulation and social services through deliberative procedures rather than hinge its legitimacy on presidential authority or economic reasoning

State-Making in an Age of Revolution, 1830-1880 Christos Aliprantis, Anna Ross, 2025-07-02 How did states expand in the mid nineteenth century While scholars now associate the period after the 1848 revolutions with a striking increase in state activity few have demonstrated how new state building measures were put into practice From France to Hungary and Scandinavia to Spain State Making in An Age of Revolution shows how officials went about implementing reform With original contributions grounded in extensive archival research this volume casts light on the scale at which officials relied on elites professionals and technical experts both inside and outside of government and even from outside their own states to carry out their expanding work Together these findings help us to re think the reach and nature of growing states during these pivotal decades of change

Capitalism Michael Sonenscher, 2024-06-18 How the history of a word sheds new light on capitalism and modern politics What exactly is capitalism How has the meaning of capitalism changed over time And what s at stake in our understanding or misunderstanding of it In *Capitalism* Michael Sonenscher examines the history behind the concept and pieces together the range of subjects bound up with the word Sonenscher shows that many of our received ideas fail to pick up the work that the idea of capitalism is doing for us without us even realizing it Capitalism was first coined in France in the early nineteenth century It began as a fusion of two distinct sets of ideas The first involved thinking about public debt and war finance The second involved thinking about the division of labour Sonenscher shows that thinking about the first has changed radically over time Funding welfare has been added to funding warfare bringing many new questions in its wake Thinking about the second set of ideas has offered far less room for manoeuvre The division of labour is still the division of labour and the debates and discussions that it once generated have now been largely forgotten By exploring what lay behind the earlier distinction before it collapsed and was eroded by the passage of time Sonenscher shows why the present range of received ideas limits our political options and the types of reform we might wish for
