Dying, Assisted Death and Mourning Asa Kasher, 2009. Dying and death are topics of deep humane concern for many people in a variety of circumstances and contexts. However they are not discussed to any great extent or with sufficient focus in order to gain knowledge and understanding of their major features and aspects. The present volume is an attempt to bridge the undesirable gap between what should be known and understood about dying and death and what is easily accessible. Included in the present volume are chapters arranged in three sections. First there are chapters on aspects of dying written by people who have professional experience and personal insights into the nature of the processes at work and the ways it should be treated. Secondly there are chapters on assisted death, Euthanasia that illuminate the practices involved in the professional assistance given to persons who suffer from an incurable illness and who do not want their painful life to be medically extended. Thirdly there are chapters on mourning examined in a variety of cultural contexts. These provide insights for different ways of maintaining the presence of the dead in the life of the living, life in the hearts.
