

COST ACCOUNTING AND MANAGEMENT ACCOUNTING

COST ACCOUNTING AND MANAGEMENT ACCOUNTING both are the branches of accounting system. Cost accounting helps in recording, summarizing, and analyzing different types of costs in an organization. Management accounting aims at using all available financial information to improve organizational efficiency as a whole.

COST ACCOUNTING

- Its evolution is way back to fourteenth century
- It focuses to capture the quantitative side of data
- Core objective here is to work out actual cost of production, evaluate its various components, and look control.
- Cost accounting reports follow specific formats, prescribed by regulatory financial body of country.
- Cost accounting generally focuses on short-term planning and control.
- A cost accountant will be at a lower level than a managerial accountant in terms of hierarchy in an organization.

MANAGEMENT ACCOUNTING

- Management accounting evolved quite recently.
- It focuses on both quantitative and non-quantitative data.
- Its objective is to provide relevant information to managers to assist them in planning and strategy formulation.
- Managers are free to decide format, form and frequency of preparing Management accounting reports.
- Management accounting focuses on short-term as well as long-term planning and control.
- Management accounting will be at higher level in the organization than the cost accountant.

Management And Cost Accounting:

MANAGEMENT AND COST ACCOUNTING COLIN M. DRURY, 2013-12-11 *Management and Cost Accounting* Andreas Taschner, Michel Charifzadeh, 2016-09-19

Management and cost accounting has been the basic toolbox in business administration for decades. Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments. At the same time, business in general and management accounting in particular is becoming more and more international. English clearly has evolved as the lingua franca of international business. Academics, students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English. This is certainly also true for cost accounting and management accounting. Management Accounting is becoming increasingly international. *Management and Cost Accounting* is a new English language textbook covering concepts and instruments of cost and management accounting at an introductory level. Bachelor but also suited for MBA courses due to strong focus on practical applications and cases. This textbook covers all topics that are relevant in management accounting in business organizations and that are typically covered in German and Central European Bachelor classes on cost accounting and management accounting. After an introduction to the topic including major differences between the German approach and the purely Anglo Saxon approach of management accounting, the book describes different cost terms and concepts applied in German cost accounting. The book is much more specific here compared to US American standard textbooks. Based on different cost concepts, the topic of cost behavior is discussed, including the determination of cost functions. The heart of the book guides the reader through the general structure of a fully developed cost accounting system following the German and Central European standard. It starts with cost type accounting, moves on to cost center accounting and finally deals with cost unit accounting, assigning cost to goods and services offered in the market. The remaining parts of the book deal with decision making and how management and cost accounting data can support managers in this task. A comparison of absorption costing and variable costing introduces the reader to management decisions such as product portfolio and outsourcing decisions. Additionally, cost volume profit analysis and break even analysis is covered. The book closes with a comprehensive treatment of cost planning and variance analysis.

Management and Cost Accounting Colin Drury, 2012. Now in its eighth edition, this international bestseller has been widely recognised as the definitive textbook on management and cost accounting for over 25 years. Colin Drury expertly blends the theory and practice of management and cost accounting with extensive assessment questions and illuminating Real World Views to fulfil all undergraduate and professional course needs in a single textbook. *Management and Cost Accounting* is ideally suited for use on management accounting and cost accounting modules taught on undergraduate accounting courses and for students preparing for the cost and management accounting examinations of the professional accountancy bodies at intermediate or advanced level. It is also appropriate for use by postgraduate and higher national diploma students studying cost and management accounting for the
