Financial management report Great Britain: National Audit Office, 2012-07-12 Following the spending review the Department for Business Innovation and Skills is targeting a 27 per cent reduction after inflation in core resources between 2010 11 and 2014 15 However this does not take account of a near doubling in student loan payments arising from the higher education reforms much of which the Department expects will be repaid sometime after 2014 15 Once these are included the Department s total spending is forecast to reduce by 6 per cent after inflation during the four year period The Department is also working on a number of other reforms associated with the settlement including attracting private investment into Royal Mail setting up the Green Investment Bank by September 2012 and providing 1 3 billion to modernise the Post Office network The Department has worked hard over the last 18 months to improve its financial management and current practices have enabled it to keep its day to day financial management on track However the Department recognises that its current financial management capacity and skills will not be sufficient if it is to manage the

substantial challenges ahead It is implementing a number of change programmes aimed at integrating financial management across the department and its partner organisations The outcomes of this are as yet unclear and the NAO has identified key areas for action These include improving the quality of information available to support decision making strengthening cross department arrangements for scrutinising investment proposals and improving sponsorship of partner organisations

Integrated Groundwater Management Anthony J Jakeman, Olivier Barreteau, Randall J Hunt, Jean-Daniel Rinaudo, Andrew Ross, 2016-08-05 The aim of this book is to document for the first time the dimensions and requirements of effective integrated groundwater management IGM Groundwater management is a formidable challenge one that remains

one of humanity's foremost priorities. It has become a largely non-renewable resource that is overexploited in many parts of the world. In the 21st century, the issue moves from how to simply obtain the water we need to how we manage it sustainably for future generations, future economies, and future ecosystems. The focus then becomes one of understanding the drivers and current state of the groundwater resource and restoring equilibrium to at-risk aquifers. Many interrelated dimensions, however, come to bear when trying to manage groundwater effectively. An integrated approach to groundwater necessarily involves many factors beyond the aquifer itself, such as surface water, water use, water quality, and ecohydrology. Moreover, the science by itself can only define the fundamental bounds of what is possible; effective IGM must also engage the wider community of stakeholders to develop and support policy and other socioeconomic tools needed to realize effective IGM. In order to demonstrate IGM, this book covers theory and principles embracing:

1. an overview of the dimensions and requirements of groundwater management from an international perspective
2. the scale of groundwater issues internationally and its links with other sectors, principally energy and climate change
3. groundwater governance with regard to principles, instruments, and institutions available for IGM
4. biophysical constraints and the capacity and role of hydroecological and hydrogeological science, including water quality concerns
5. necessary tools, including models, data infrastructures, decision support systems, and the management of uncertainty.

Examples of effective and failed IGM are given. Throughout, the importance of the socioeconomic context that connects all effective IGM is emphasized. Taken as a whole, this work relates the many facets of effective IGM from the catchment to global perspective.

Public Management in Times of Austerity Eva Moll Sørensen, Hanne Foss Hansen, Mads Bøge Kristiansen, 2017-06-26. Since 2008, the world has experienced an enormous decrease of wealth. By many measures, the impact of the crisis was severe: the fall in GDP, the collapse of world trade, the rise in unemployment, and the credit slump reached bigger proportions than in any other crisis since World War II. Although the economic figures seem to improve in some countries, the crisis continues being a challenging issue and is said to be one of the most important problems governments face today. The crisis has put public finances under ever-increasing pressure, and governments have responded through

austerity measures such as new fiscal rules and budgeting procedures and cutbacks of public spending Public Management in Times of Austerity seeks to explore the austerity policies adopted by European governments and their consequences to public management It asks how governments have implemented new rules leading to more stringency in public budgeting and financial management and how they have cut back public expenditure These questions are examined comparatively through case studies in different parts of Europe and variations across countries are discussed and explained Throughout the volume the consequences of the crisis and austerity policies for public management are discussed What is the relationship between crisis and decision making in the public sector and how does austerity affect public sector organisation As the previous crisis in the 1970s resulted in a major reform movement which was later referred to as New Public Management Public Management in Times of Austerity look to understand whether the current crisis also leads to a wave of public management reform and if so what is the content of this
