Ottonian Imperial Art and Portraiture Eliza Garrison, 2017-07-05 Ottonian Imperial Art and Portraiture represents the first art historical consideration of the patronage of the Ottonian Emperors Otto III 983 1002 and Henry II 1002 1024 Author Eliza Garrison analyzes liturgical artworks created for both rulers with the larger goal of addressing the ways in which individual art objects and the collections to which they belonged were perceived as elements of a material historical narrative and as portraits Since these objects and images had the capacity to stand in for the ruler in his physical absence she argues they also performed political functions that were bound to their ritualized use in the liturgy not only during the ruler's lifetime but even after his death Garrison investigates how treasury objects could relay officially sanctioned information in a manner that texts alone could not offering the first full length exploration of this central phenomenon of the Ottonian era

increasingly numerous and by the thirteenth century professional illuminators dominated the field. During this later period illuminators were able to travel in search of work and to acquire new ideas; they joined guilds with scribes or with artists in the cities and their ranks included nuns and secular women. Work was regularly collaborative and the craft was learned through an apprenticeship system. Alexander carefully analyzes surviving manuscripts and medieval treatises in order to explain the complex and time-consuming technical processes of illumination: its materials, methods, tools, choice of illustration, and execution. From rare surviving contracts he deduces the preoccupation of patrons with materials and schedules. Illustrating his discussion with examples chosen from religious and secular manuscripts made all over Europe, Alexander recreates the astonishing variety and creativity of medieval illumination. His book will be a standard reference for years to come.
