Spontaneous Spoken Language J. E. Miller,Regina Weinert,1998 Jim Miller and Regina Weinert investigate syntactic structure and the organization of discourse in spontaneous spoken language Using data from English German and Russian they develop a systematic analysis of spoken English and highlight properties that hold across languages The authors argue

that the differences in syntax and the construction of discourse between spontaneous speech and written language bear on various areas of linguistic theory apart from having obvious implications for syntactic analysis In particular they bear on typology Chomskyan theories of first language acquisition and the perennial problem of language in education In current typological practice written and spontaneous spoken texts are often compared the authors show convincingly that typological research should compare like with like The consequences for Chomskyan and indeed all theories of first language acquisition flow from the central fact that children acquire spoken language but learn written language *Custodians of Wonder* Eliot Stein, 2024-12-10 A vivid look at 10 astonishing people who are maintaining some of the world's oldest and rarest cultural traditions Eliot Stein has traveled the globe in search of remarkable people who are preserving some of our most extraordinary cultural rites In *Custodians of Wonder* Ancient Customs Profound Traditions and the Last People Keeping Them Alive Stein introduces readers to a man saving the secret ingredient in Japan's 700 year old original soy sauce recipe In Italy he learns how to make the world's rarest pasta from one of the only women alive who knows how to make it And in India he discovers a family rumored to make a mysterious metal mirror believed to reveal your truest self From shadowing Scandinavia's last night watchman to meeting a 27th generation West African griot to tracking down Cuba's last official cigar factory readers more than a century after they spearheaded the fight for Cuban independence Stein uncovers an almost lost world Climbing through Peru's southern highlands he encounters the last Inca bridge master who rebuilds a grass woven bridge every year from the fabled Inca Road System He befriends a British beekeeper who maintains a touching custom of telling the bees important news of the day And he crunches through a German forest to find the official mailman of the only tree in the world with its own address to which countless people from across the world have written in hopes of finding love These are just some of the last custodians preserving age old rites on the brink of disappearance against all odds Let Eliot Stein introduce you to all of them
