**Colour in Sculpture** Hannelore Hägele,2013-09-11 This book introduces the reader to the art of sculpture across five millennia up to the present and from the Near East to the west In each of the eleven chapters a number of selected works are discussed to exemplify the circumstances and conditions for making pieces of sculpture objects peculiar to place time and context Within each cultural framework characteristics are observable that suggest various reasons for the use of colour in sculpture These encompass local preferences customs or cultural requirements and others point to an impulse to enhance the expression of the phenomenal Whether colour is really necessary or even essential to sculpted works of art is a question especially pertinent since the Renaissance Surface finishes of sculptural representations may allude to the sensory world of colour without even having pigment applied to them What makes polychromy so special is that it functions as an overlay of

another dimension that sometimes carries further encoded meaning In nature the colour is integral to the given object What the present survey suggests is that the relationship between colour and sculpture is a matter of intentional expression even where the colour is intrinsic as in the sculptor's materials

### **Facing the Colours of Roman Portraiture** Amalie

Skovmøller, 2020-09-07 The fact that most ancient marble portraits were once intentionally polychrome has always been lurking at the corners of art historical and archaeological research Despite the fact that the colours of the sculpted forms completed enhanced and even extended the plastic shapes the topic has not been devoted much dedicated attention This book represents the first full length academic monograph which explores the original polychromy of Roman white marble portraiture It presents results from scientific analysis of portraits in statuary and bust formats dating to the first three centuries CE The book also explores the cultural and social significance of colours in their original contexts and how the immaterial affects of the polychrome three dimensional images can be integrated into the traditional research into ancient portraiture which has tended to place overwhelming emphasis on iconography typology and biography By doing so the ancient sculpted marble form as we know it will be exposed and confronted and the impact of manipulated material effects that were meant to evoke a broad range of multisensory experiences will be emphasized The book puts forth a new way of analysis to be tested and developed in the future

**Roman Portraits in Context** Jane Fejfer, 2009-03-13 The highest honour a Roman citizen could hope for was a portrait statue in the forum of his city While the emperor and high senatorial officials were routinely awarded statues strong competition existed among local benefactors to obtain this honour which proclaimed and perpetuated the memory of the patron and his family for generations There were many ways to earn a portrait statue but such local figures often had to wait until they had passed away before the public finally fulfilled their expectations It is argued in this book that our understanding and contemplation of a Roman portrait statue is greatly enriched when we consider its wider historical context its original setting the circumstances of its production and style and its base which in many cases bore a text that contributed to the rhetorical power of the image

*Temples and Towns in Roman Iberia* William E. Mierse, 2023-12-22 This is the first comparative study of Roman architecture on the Iberian peninsula covering six centuries from the arrival of the Romans in the third century B C until the decline of urban life on the peninsula in the third century A D During this period the peninsula became an influential cultural and political region in the Roman world Iberia supplied writers politicians and emperors a fact acknowledged by Romanists for centuries though study of the peninsula itself has too often been brushed aside as insignificant and uninteresting In this book William E Mierse challenges such a view By examining in depth the changing forms of temples and their placement within the urban fabric Mierse shows that architecture on the peninsula displays great variation and unexpected connections It was never a slavish imitation of an imported model but always a novel experiment Sometimes the architectural forms are both new and unexpected in some cases specific prototypes can be seen but the Iberian form has been significantly altered to suit local needs What at first may seem a repetition of forms upon closer investigation turns out to be theme and variation Mierse brings to his quest an

impressive learning including knowledge of several modern and ancient languages and the archaeology of the Roman East which allows him a unique perspective on the interaction between events and architecture This is the first comparative study of Roman architecture on the Iberian peninsula covering six centuries from the arrival of the Romans in the third century B C until the decline of urban life on the peninsula in the third century A D During this period
