Radical Change Through Communication In Maos China:

Radical Change Through Communication in Mao's China Godwin C. Chu, 1977 The Rhetoric of Mao Zedong Xing Lu, 2022-04-13 This thorough examination of Mao's speeches and writings and how they reshaped a nation is critical to an understanding of modern China. Mao Zedong fundamentally transformed China from a Confucian society characterized by hierarchy and harmony into a socialist state guided by communist ideologies of class struggle and radicalization. It was a transformation made possible largely by Mao's rhetorical ability to attract, persuade, and mobilize millions of Chinese people. In this book, Xing Lu analyzes Mao's speeches and writings over a span of sixty years, tracing the sources and evolution of his discourse, analyzing his skills as an orator and mythmaker, assessing his symbolic power and continuing presence in contemporary China, and observing that Mao's rhetorical legacy has been commoditized, culturally consumed, and politically appropriated since his death. Applying both Western rhetorical theories and Chinese rhetorical concepts to reach a more nuanced and sophisticated understanding of his rhetorical legacy, Lu shows how Mao employed a host of rhetorical appeals and strategies drawn from Chinese tradition and how he interpreted the discourse of Marxism-Leninism to serve foundational themes of his message. She traces the historical contexts in which these themes, his philosophical orientations, and his political views were formed and how they transformed China and Chinese people. Lu also examines how certain ideas are promoted, modified, and appropriated in Mao's rhetoric. His appropriation of Marxist theory of class struggle, his campaigns of transforming common people into new communist advocates, his promotion of Chinese nationalism, and his stand on China's foreign policy all contributed to and were responsible for reshaping Chinese thought, patterns, culture, and communication behaviors.

21st Century Communication: A Reference Handbook William F. Eadie, 2009-05-15 The discipline of communication has grown in popularity from the time professors of journalism and speech decided in the mid-1960s that the term communication was an excellent general descriptor for the theory and research that each group aspired to create. Over time, the two groups grew closer and recognized significant overlap in their theoretical and research interests, but there were also differences in their traditions that kept them apart. While both groups agreed that communication is a practical discipline, journalism professors focused a

great deal of their attention on the education of media professionals Speech professors on the other hand often were more oriented to the liberal arts and valued the fact that communication could be approached from a variety of traditions including the arts humanities social sciences and even the sciences A key term in 21st Century communication however is convergence Not only are media and technology converging with each other to produce new means of communicating but individuals are increasingly using both new and existing communication tools to create new forms of communication This convergence forces the various camps within the communication discipline to draw upon each other's theories and research methods to keep up with explaining the rapidly changing communication environment This convergence of ideas and theories provides a space to challenge conventional ways of thinking about the communication discipline and that's the goal of the SAGE 21st Century Reference Series volumes on Communication General Editor William F Eadie has sought to honor the diversity of the study of communication but also integrate that diversity into a coherent form dividing communication study into four basic properties 1 processes 2 forms and types of communication 3 characteristics to consider in creating messages and 4 relationships between communicators Via 100 chapters this 2 volume set available in both print and electronic formats highlights the most important topics issues questions and debates any student obtaining a degree in the field of communication ought to have mastered for effectiveness in the 21st Century The purpose is to provide undergraduate majors with an authoritative reference source that will serve their research needs going forward in this exciting field with more detailed information than encyclopedia entries but not as much jargon detail or density as a journal article or a research handbook chapter Comprehensive coverage captures all the major themes and subfields within communication For instance Volume 1 themes include the discipline of communication approaches to the study of communication key processes of communication forms and types of communication key characteristics of messages key communication relationships factors affecting communication and challenges and opportunities for communication Themes in Volume 2 are media as communication communication as a profession journalism public relations advertising and media management Authoritative content is provided by a stellar casts of authors who bring diverse approaches diverse styles and different points of view Curricular driven emphasis provides students with initial footholds on topics of interest in researching for term papers in preparing for GREs in consulting to determine directions to take in pursuing a senior thesis graduate degree career etc Uniform chapter structures make it easy for students to locate key information with a more or less common chapter format of Introduction Theory Methods Applications Comparisons Future Directions Summary Bibliography Suggestions for Further Reading and Cross References Availability in print and electronic formats provides students with convenient easy access

China Among the Nations of the Pacific Harrison Brown, 2019-08-27 On May 14 1960 the East West Center was officially created by the Congress of the United States As a part of the celebration of the twentieth anniversary of this event a symposium was held on May 19 1980 at the National Academy of Sciences in Washington D C The subject China and the Nations of the Pacific was selected because the theme for the anniversary year of the East West Center had been established as Building a Pacific Community It has been suggested that international mechanisms for coming to grips with such interdependencies in the Pacific region as trade investment food energy and mineral commodities are inadequate In response to such suggestions hearings have been held in both houses of the Congress of the United States on the idea of a Pacific community This symposium was organized as part of that general discussion The contributors hope that the papers presented here will further stimulate thought and debate on the problems of the Pacific region

Rhetoric of the Chinese Cultural Revolution Xing Lu, 2020-08-05 A startling look at revolutionary rhetoric and its effects Now known to the Chinese as the ten years of chaos the Chinese Cultural Revolution 1966-76 brought death to thousands of Chinese and persecution to millions In Rhetoric of the Chinese Cultural Revolution Xing Lu identifies the rhetorical practices and persuasive effects of the polarizing political language and symbolic practices used by Communist Party leaders to legitimize their use of power and violence to dehumanize people identified as class enemies Lu provides close readings of the movement's primary texts political slogans official propaganda wall posters and the lyrics of mass songs and model operas She also scrutinizes such ritualistic practices as the loyalty dance denunciation rallies political study sessions and criticism and self criticism meetings

Lu enriches her rhetorical analyses of these texts with her own story and that of her family as well as with interviews conducted in China and the United States with individuals who experienced the Cultural Revolution during their teenage years. In her new preface Lu expresses deep concern about recent nationalism, xenophobia, divisiveness, and violence instigated by the rhetoric of hatred and fear in the United States and across the globe. She hopes that by illuminating the way language shapes perception, thought, and behavior, this book will serve as a reminder of past mistakes so that we may avoid repeating them in the future.
