**Secrets of Q Central** Paul Brown, Edward Herbert, 2014-11-24 A quiet market town with no military presence was chosen as the secret communications centre for Britain as the country prepared for war with Germany in 1937 When hostilities began Q Central attracted a dozen other clandestine operations set up to defend the country or designed to confuse and undermine enemy morale The headquarters of radar RAF Group 60 also came to Leighton Buzzard to be hidden from German attack and to be close to the telephone and radio communications needed to run its vast chain of radar stations These directed the defending fighters that saved the country in the Battle of Britain and then took the bombing war to

Germany Close by for the same reasons of secrecy and safety were the satellite stations of Bletchley Park the now famous code breaking centre the Met Office at Dunstable which gave the all clear for the D Day landings Black Ops units that set up false radio stations and wrote propaganda to confuse the enemy and airfields used for dropping agents behind enemy lines At Q Central itself was the largest telephone exchange in the world with more than 1 000 teleprinters communicating with all the armed services in every theatre of war and directing the operations of the secret services Now the restrictions of the Official Secrets Act have been lifted enabling eight members of the Leighton Buzzard and District Archaeology and History Society to piece together this compelling story for the first time

**Secrets of Voice-over Success** Joan Baker, 2005 For millennia shamans and philosophers believers and nonbelievers artists and scientists have tried to make sense of our existence by suggesting that everything is connected that a mysterious Oneness binds us to everything else People go to temples churches mosques and synagogues to pray to their divine incarnation of Oneness Following a surprisingly similar notion scientists have long asserted that under Nature's apparent complexity there is a simpler underlying reality In its modern incarnation this Theory of Everything would unite the physical laws governing very large bodies Einstein's theory of relativity and those governing tiny ones quantum mechanics into a single framework But despite the brave efforts of many powerful minds the Theory of Everything remains elusive It turns out that the universe is not elegant It is gloriously messy Overturning more than twenty five centuries of scientific thought award winning physicist Marcelo Gleiser argues that this quest for a Theory of Everything is fundamentally misguided and he explains the volcanic implications this ideological shift has for humankind All the evidence points to a scenario in which everything emerges from fundamental imperfections primordial asymmetries in matter and time cataclysmic accidents in Earth's early life and duplication errors in the genetic code Imbalance spurs creation Without asymmetries and imperfections the universe would be filled with nothing but smooth radiation A Tear at the Edge of Creation calls for nothing less than a new humancentrism to reflect our position in the universal order All life but intelligent life in particular is a rare and precious accident Our presence here has no meaning outside of itself but it does have meaning The unplanned complexity of humankind is all the more beautiful for its improbability It's time for science to let go of the old aesthetic that labels perfection beautiful and holds that beauty is truth It's time to look at the evidence without centuries of monotheistic baggage In this lucid down to earth narrative Gleiser walks us through the basic and cutting edge science that fueled his own transformation from unifier to doubter a fascinating scientific quest that led him to a new understanding of what it is to be human
