*Rail, Steam, and Speed* Christopher McGowan, 2004 Describes how modern train transportation was born in an English village in 1829 when a competition was held to find the best locomotive a dramatic contest chronicled in a unique look at the earliest innovators of rail power and their fascinating designs *19th Century Europe* Hannu Salmi, 2013-04-24 Nineteenth Century Europe offers a much needed concise and fresh look at European culture between the Great Revolution in France and the First World War It encompasses all major themes of the period from the rising nationalism of the early nineteenth century to the pessimistic views of fin de siècle It is a lucid fluent presentation that appeals to both students of history and culture and the general audience interested in European cultural history The book attempts to see the culture of the nineteenth century in broad terms integrating everyday ways of life into the story as mental material and social practices It also highlights ways of thinking mentalities and emotions in order to construct a picture of this period of another kind that goes beyond a story of isms or intellectual and artistic movements Although the nineteenth century has often been described as a century of rising factory pipes and grey industrial cities as a cradle of modern culture the era has many faces This book pays special attention to the experiences of contemporaries from the fear for steaming engines to the longing for the pre industrial past from the idle calmness of bourgeois life to the awakening consumerism of the department stores from curious exoticism to increasing xenophobia from optimistic visions of future to the expectations of an approaching end The century that is only a few generations away from us is strange and familiar at the same time a bygone world that has in many ways influenced our present day world How Invention Begins John H. Lienhard, 2006 In *How Invention Begins* Lienhard reconciles the ends of invention with the individual leaps upon which they are built illuminating the vast web of individual inspirations that lie behind whole technologies He traces for instance the way in which thousands of people applied their combined genius to airplanes trains and automobiles revealing how a collective desire an upwelling of fascination a spirit of the times a Zeitgeist laid its hold upon inventors The thing they all sought to create was speed itself Can we speak of speed as an invention To do so he concludes is certainly no greater a stretch than to call the car an invention **Train** Tom Zoellner, 2014-10-28 An epic and revelatory narrative of the most important transportation technology of the modern world In his wide ranging and entertaining new book Tom Zoellner coauthor of the New York Times bestselling *An Ordinary Man* travels the globe to tell the story of the sociological and economic impact of the railway technology that transformed the world and could very well change it again From the frigid trans Siberian railroad to the antiquated Indian Railways to the Japanese style bullet trains Zoellner offers a stirring story of this most indispensable form of travel A masterful narrative history *Train* also explores the sleek elegance of railroads and their hypnotizing rhythms and explains how locomotives became living symbols of sex death power and romance **The Complete Book of North American Railroading** Kevin EuDaly, Steve Jessup, Mike Schafer, Jim Boyd, Andrew McBride, Steve Glischinski, 2016-09 Celebrate over 150 years of the
