RAIL ATLAS JOE. BROWN, 2024 **Rail Atlas of Great Britain and Ireland**, Stuart Baker, 2015-07-30 *Bradshaw's Railway Atlas of Great Britain and Ireland* George Bradshaw, Paul Leslie Line, 2012-05 This pictorial treasure trove of visual historic mapping will enable armchair time travel at its very best At the core of this book is the reproduction of the very last detailed railway map that was produced by George Bradshaw in 1852 **A Railroad Atlas of the United States in 1946** Richard C. Carpenter, 2003 Little now remains of the vast network of passenger and freight railroad lines that once crisscrossed much of eastern and midwestern America but in 1946 the steam locomotive was king

This is a record of a time when traveling out of town meant for most Americans taking the train *Rail Atlas; Great Britain and Ireland. Rev.ed* S. K. Baker, 1996 *A Comprehensive Guide to Railway Request Stops* Anthony Hart, 2022-03-10 Rail By Request is an enthusiast's personal story and tells how the author visited photographed and spent time at every request stop on mainland Britain It also explains where his love of railways is rooted why he began this odyssey and how it became a very different and important experience to him Journeying across the whole railway map to capture these often ignored stops not just for posterity but for the journey The lure of request stops and the practicalities of completing the journey to discover them is the core of the story Researching every request stop in Britain and planning how to get there and overcoming any difficulties became a source of great satisfaction Every stop is described and has at least one illustration Some historical context to the stops is included with current statistics The story also shows how he ticked off each stop but unexpectedly found himself passing the time engaged in a form of railwayana mindfulness allowing the world to rush past whilst being alive in the moment It shows a calmer slower world does exist

Jowett's Railway Atlas of Great Britain and Ireland Alan

Jowett,1989-01-01 *Railways in Devon and Cornwall in the Late 20th Century* Peter J Green,2025-11-30 Devon and Cornwall have long been attractive destinations not only for holidaymakers but also for railway enthusiasts and it was in Devon during a family holiday in 1959 that the author's passion for railways began Peter started photographing railways at an early age mainly concentrating on steam but he made some visits to Devon in the 1970s to see the Western Class diesel hydraulics running along the coast They were being replaced by Class 50 diesel electrics at the time More time was spent in Devon in the 1970s and early 1980s photographing preserved railways as well as the modern scene and an Easter visit to Goodrington became a regular event for several years The 1986 West of England resignalling scheme provided a good reason for a further series of visits to Devon to record the mechanical signal boxes semaphore signalling and associated equipment before it all disappeared The first of the author's many trips to Cornwall was in the summer of 1984 when he spent ten days attempting to photograph the entire Cornish railway system Although an impossible task the Class 37s on the china clay operations as well as all the Peaks Class 47s and 50s on the main lines ensured an enjoyable time Here with the help of other contributors the author has attempted to assemble a comprehensive photographic record of the railways in the two counties in the late 20th Century **The Atlas of Atlases** Philip Parker,2022-10-25 A lavishly illustrated look at the most important atlases in history and the cartographers who made them Rails From Shrewsbury Peter J. Green,2023-11-09 Shrewsbury station located at the junction of the lines from Chester Crewe Wolverhampton Hereford and Aberystwyth is a busy and interesting railway center for the enthusiast Many train movements are still controlled by semaphore signals operated from a number of signal boxes including the largest remaining operational mechanical signal box in the world at Severn Bridge Junction Nevertheless modernization has been gradually sweeping away much of the railway infrastructure both at Shrewsbury and in the surrounding area as it has been everywhere else This book looks at Shrewsbury itself the lines that radiate from there and the trains that ran on them in the late twentieth and the early part of the twenty first century During this time period much more general railway infrastructure and mechanical signaling was still in use and locomotive hauled trains were abundant using a variety of motive power including Classes 25 31 33 37 and 47 The various freight lines that saw traffic are also visited The railway from Newport through Hereford and Shrewsbury to Chester in particular saw regular steam hauled special trains a few of which are illustrated here Preserved railways in the area are not forgotten including the Severn Valley Railway which once ran from Sutton Bridge Junction at Shrewsbury to Hartlebury between Kidderminster and Droitwich Spa *Railways in South Wales and the Central Wales Line in the Late 20th Century* Peter J. Green,2022-12-01 In the early 1980s I began to visit South Wales on a regular basis to photograph the railway scene At that time the collieries and steelworks were generating a lot of rail traffic with Class 37 diesels being the usual motive power Passenger trains were in the hands of Class 47s and 37s while Peaks and Class 50s would also appear on occasion HSTs DMUs Sprinters and Pacers were of course also common As time went on collieries closed and the coal traffic reduced but there always something new

and interesting Rugby Internationals at Cardiff regularly produced a number of special trains which arrived from various parts of the country often bringing interesting motive power to the Welsh capital The Class 37s were slowly replaced by Class 56s and later Class 60s on many duties in South Wales but the Rhymney Valley saw Class 37 diesels working passenger trains into the twenty first century and on Rugby International days privately owned Class 50s were also used on occasion I also visited the Central Wales line a number of times and particularly enjoyed the time I spent at the small country stations before the semaphore signals were replaced This book contains a selection of photographs taken in the latter part of the 20th and in the very early 21st Century covering the railways of South Wales and the Welsh section of the Central Wales line A few photographs of the principal heritage railways in more recent times are also included

The Great Central Railway John Palmer, 2021-01-30 Sets out to address what really happened through its LNER days and into British Railways custodianship A well researched and presented tome Key Model World For generations of railway enthusiasts and more lately for social historians the life and times of the former Great Central Railway and in particular its extension towards London in the 1890s and closure seventy years later have generated considerable interest and controversy Although many books have been written about the Railway the majority in recent times have concentrated upon providing a photographic record and a nostalgic look in retrospect to what was generally perceived as happier times for the route None of the books have presented the outcome from thorough research into the business aspects of the Railway and its successive private LNER and public BR ownerships through war and peace and times of industrial social and political change that influenced and shaped the demand for a railway service While retaining a strong railway theme throughout the book identifies the role played by successive governments the electricity and coal industries and the effect of social change that together resulted in a case for closure The content of the book replaces much supposition with fact and places on record what really happened The final part of the book acknowledges the fine work over half a century of volunteers dedicated to saving a section of the line in Leicestershire A valuable addition to the social and political history of railways The Railway Correspondence and Travel Society

The World's First Railway System Mark Casson, 2009-09-10 This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done

English Electric Class 50 Diesels Peter Green, 2022-05-05 A gallery of spectacular photos celebrating the history of these popular locomotives of the late twentieth century Peter J Green first photographed Class 50 diesels in action in 1975 while they were still being transferred from the London Midland to the Western Region of British Rail But it was in the early 1980s when they were named and painted in Large Logo livery that his interest in the class really took off For Peter they stood out from most other locomotives that were painted in the rather drab Rail Blue livery The sound of the locomotives particularly when running at speed was also very impressive producing shouts

of 50 from waiting photographers even before the train was in sight The class became a particular target for his railway photography and many of his trips were made with them in mind They regularly worked trains around his hometown of Worcester so if he did not want to go too far it was easy to find a satisfactory subject at which to point his camera Before their withdrawal in the late 1980s and early 1990s they were used on many rail tours which always provided good photographic opportunities Today with many of the class working on heritage railways and a number of privately owned locomotives registered for main line use there is still plenty to keep his cameras occupied A selection of Peter s best photos of the Class 50 diesels taken over a period of forty five years appear in these pages
