Conventional history tells us humans migrated on foot across present day Alaska populating the Americas far later than other continents. However emerging new evidence suggests seafarers reached the continents thousands of years earlier and developed far more sophisticated civilizations than previously imagined. From distinguished historian BBC World Service Gavin Menzies the author of the blockbuster New York Times bestseller 1421 comes a revolutionary new account of how the first humans came to North and South America. Menzies reveals that ancient peoples used the oceans natural currents and prevailing winds to make voyages across both the Atlantic and Pacific. What's more we now must accept that they had time to develop remarkably advanced cultures. Armed with cutting edge DNA evidence newly unearthed artifacts and astonishing linguistic and archaeological discoveries Menzies shows humans have been making transoceanic voyages as far back as 100 000 years ago vastly predating the supposed overland migration to the Americas during the last Ice Age. The ancient South American civilizations of the Olmec and Maya in Central and South America may have had direct origins and influences from Asia. Ancient maps held in the Library of Congress in Washington D C show there must have been sustained and dedicated voyages to the Western Hemisphere by Chinese explorers as early as 2200 B C. Huge Chinese settlements occupied and made exploratory journeys from Nova Scotia. Japanese Korean and even earlier European voyages likewise predated the explorations currently recorded by history. A maverick scholar Menzies has made a riveting new contribution to the story of humanity's earliest explorers revealing the truth behind one of history's most fascinating questions: Who discovered America?

**Plum Borough** Frank J. Kordalski Jr.,2011-05-16 Plum Township which later reorganized as Plum Borough was founded on December 18 1788 and westward pioneers soon chose to settle in the region. William McJunkin an Irish emigrant and one of the earliest settlers came to Plum Borough and in 1790 was granted a tract of land he came to call Greenfield. In the 19th century Plum Borough was an agricultural gold mine for the brave settlers who wished to emigrate from their East Coast homesteads. During the 20th century Plum Borough emerged from being an agricultural suburb of the Steel City to become a vibrant residential community with a wondrously bright future.

The zenith came in 1920 when the state boasted 11 500 miles of track. The northwest corner of the state was home to the Pennsylvania oil rush in the late 19th century coal mines timber forests and stone quarries. The landscape was dotted with railroad depots every couple of miles. These depots were waypoints for business transactions family reunions outings to amusement parks and soldiers leaving for or returning from service they also became hangouts for pickpockets.

targets for nighttime burglars and sometimes storage sheds for explosives Although Pennsylvania still has over 5 000 miles of track only a few stations remain and most of them have been repurposed as museums and businesses This book captures the stories these stations told when rail was king in the early 20th century     *Model Railroad Craftsman* ,1990     **Coal and**
