Holtfrerich, Harold James, 2003 The essays written by leading experts examine the history of the international financial system in terms of the debate about globalization and its limits In the nineteenth century international markets existed without international institutions A response to the problems of capital flows came in the form of attempts to regulate national capital markets for instance through the establishment of central banks In the inter war years there were largely

unsuccessful attempts at designing a genuine international trade and monetary system and at the same time coincidentally the system collapsed In the post 1945 era the intended design effort was infinitely more successful The development of large international capital markets since the 1960s however increasingly frustrated attempts at international control The emphasis has shifted in consequence to debates about increasing the transparency and effectiveness of markets but these are exactly the issues that already dominated the nineteenth century discussions

[Manchurian Railways and the Opening of China: An International History](#) Bruce Elleman, Stephen Kotkin, 2015-01-28 The railways of Manchuria offer an intriguing vantage point for an international history of northeast Asia Before the completion of the Trans Siberian railway in 1916 the only rail route from the Imperial Russian capital of St Petersburg to the Pacific port of Vladivostok transited Manchuria A spur line from the Manchurian city of Harbin led south to ice free Port Arthur Control of these two rail lines gave Imperial Russia military economic and political

advantages that excited rivalry on the part of Japan and unease on the part of weak and divided China. Meanwhile the effort to defend and retain that strategic hold against rising Japanese power strained distant Moscow. Control of the Manchurian railways was contested in the Russo Japanese War of 1904-5. Japan's 1931 invasion and establishment of the puppet state of Manchukuo, the second Sino Japanese War and World War II in Asia and the Chinese civil war that culminated in the Communist victory over the Nationalists. Today the railways are critical to plans for development of China's sparsely populated interior. This volume brings together an international group of scholars to explore this fascinating history.

**The Cambridge World History: Volume 7, Production, Destruction and Connection, 1750-Present, Part 1, Structures, Spaces, and Boundary Making** J. R. McNeill, Kenneth Pomeranz, 2015-04-30. Since 1750 the world has become ever more connected with processes of production and destruction no longer limited by land or water based modes of transport and communication. Volume 7 of the Cambridge World History series divided into two books offers a variety of angles of vision on the increasingly interconnected history of humankind. The first book examines structures, spaces and processes within which and through which the modern world was created including the environment, energy, technology, population, disease, law, industrialization, imperialism, decolonization, nationalism and socialism along with key world regions.

**The Oxford Handbook of Cities in World History** Peter Clark, 2013-02-14. In 2008 for the first time the majority of the planet's inhabitants lived in cities and towns. Becoming globally urban has been one of mankind's greatest collective achievements over time and raises many questions. How did global city systems evolve and interact in the past? How have historic urban patterns impacted on those of the contemporary world? And what were the key drivers in the roller coaster of urban change over the millennia: market forces such as trade and industry, rulers and governments, competition and collaboration between cities or the urban environment and demographic forces? This pioneering comparative work by leading scholars drawn from a range of disciplines offers the first detailed comparative study of urban development from ancient times to the present day. The Oxford Handbook of Cities in World History explores not only the main trends in the growth of cities and towns across the world in Asia and the Middle East, Europe, Africa and the Americas and the different types of cities from great metropolitan centres to suburbs, colonial cities and market towns but also many of the essential themes in the making and remaking of the urban world: the role of power, economic development, migration, social inequality, environmental challenge and the urban response, religion and representation, cinema and urban creativity. Split into three parts covering Ancient cities, the medieval and early modern period and the modern and contemporary era, it begins with an introduction by the editor identifying the importance and challenges of research on cities in world history as well as the crucial outlines of urban development since the earliest cities in ancient Mesopotamia to the present.
