*Children's Literature in the Reading Program* Deborah A. Wooten, Lauren Aimonette Liang, Bernice E.

Cullinan, 2018-05-15 This indispensable teacher resource and course text now revised and updated addresses the whys, hows, and how-tos of incorporating outstanding children's literature into the K-8 reading program. A strong emphasis on diverse literature is woven throughout the fifth edition with chapters emphasizing the need for books that reflect their readers and presenting dozens of carefully reviewed books that teachers will be eager to use in the classroom. Leading authorities provide advice on selecting texts, building core literacy and literary skills, supporting struggling readers, and maximizing engagement. The volume offers proven strategies for teaching specific genres and formats such as fiction, nonfiction, picturebooks, graphic novels, biographies, and poetry. This title is a copublication with the International Literacy Association. New to This Edition: Many new teaching ideas and book recommendations with an increased focus on culturally diverse literature. Scope expanded from K-5 to K-8. Chapter on using read-alouds and silent reading. Chapters on diverse literature, about the arts, and on transitional chapter books. Chapter on engaging struggling readers with authentic reading experiences. Why Kids Can't Read Patrick R. Riccards, Phyllis Blaustein, Reid Lyon, 2014-12-18 Nearly forty percent of all fourth graders in this country cannot read at grade level, and this number rises to sixty percent for children coming from poor families. This gap in learning increases as students go through grade school and is a primary reason for school failure. Ironically, this problem comes even after comprehensive research demonstrates that nearly all children can learn to read if taught using proven, effective instruction. Here, the authors describe the principles of this research in language that non-educators can understand and educators can use. It discusses how to recognize whether the research on reading is being used appropriately and, if not, how to make that happen. Through the eyes of parents and educators who have succeeded in their own struggles to change the educational system, the book provides the reader with the tools and knowledge for transforming the way reading is taught in their children's classrooms. This book takes the reader step by step through an understanding of the research on reading and ways in which a single determined person can make a difference in the learning ability of every student in our nation's schools. Part One is a series of chapters written by individuals who discuss what they experienced during these battles and what made them successful. Part Two is written by a series of experts who describe how they have overcome the challenges involved in creating widespread change in school systems. This second edition also includes information on Common Core State Standards, increased testing, and accountability efforts, and related policy issues that directly impact how children learn to read. The appendix is filled with resources, sample tools, a glossary, and bibliography to help the reader. Some key features of this book include: Easy-to-understand descriptions of research. First-person stories of how they have helped teach their kids to read. Clear understanding of scientifically based reading and how it can be applied to the classroom. Summary of reading-related Common Core State Standards. Sample tools for parent advocates. Resource lists of government officials, organizations that can help with reading efforts.
