Rational Enterprise:

Economy and Society Max Weber, 2019-04-01 Keith Tribe's new translation presents *Economy and Society* as it stood when Max Weber died. One of the world's leading experts on Weber's thought, Tribe has produced a clear and faithful translation that will become the definitive English edition of one of the few indisputably great intellectual works of the past 150 years.

Nietzsche, Theories of Knowledge, and Critical Theory B.E. Babich, 2013-03-09 Nietzsche's *Theories of Knowledge and Critical Theory*, the first volume of a two-volume book collection on Nietzsche and the Sciences, ranges from reviews of Nietzsche and the wide variety of epistemic traditions not only pre-Socratic but Cartesian, Leibnizian, Kantian, and post-Kantian, through essays on Nietzsche's critique of knowledge via his critique of grammar and modern culture, and culminates in an extended section on the dynamic of Nietzsche's critical philosophy seen from the perspective of Habermas and critical theory. This volume features a first-time English translation of Habermas's afterword to his own German language collection of Nietzsche's *Epistemological Writings*.

Chinese Path to Modernization Jun Yin, 2024-03-12 This book exploratively reviews and refines the theoretical system of economics with Chinese characteristics and the analytical framework of Chinese path to modernization. This book aims to reveal answers to the three questions: what has the theoretical system of economics with Chinese characteristics inherited and developed? What are the experiences and lessons of all countries' modernization in the world? What is the universality and particularity of Chinese Path to Modernization? As conclusion, the author draws a clue to understand Chinese path to modernization which is neither making up for the lessons nor a convergence but an innovation built upon the general principles of modernization. Its universality lies in the overall patterns and trends of modernization that is the consistent process of the country's pursuit of national economic growth and people's prosperity. The distinctiveness of this path lies in the concurrent transformation of Chinese economic system and the institutional innovations with Chinese characteristics that unfold throughout this ongoing economic process.

Rationality in Question Biderman, Scharfstein, 2024-03-04

To Teach, To Delight, and To Move David S. Cunningham, 2004-10-22 This book initiates a new conversation about how theological education might be re-envisioned for the twenty-first century church. The prevailing curricular structure in today's seminaries and divinity schools was fashioned in a very different era, one that assumed the continued cultural dominance of Christianity and the continued academic dominance of the canons of Enlightenment reason. Neither assumption is viable in today's post-Christian world; hence, our new circumstances demand a new vision for theological education. The authors of this volume offer an important resource for this project through their creative appropriation of the classical rhetorical tradition, particularly as it has been rehabilitated in the contemporary context. Like St. Augustine, they believe that the chief goals of Christian theology are similar to those of classical rhetoric: to teach, to delight, and to move. And the authors are united in their conviction that these must also be the goals of theological education in a post-Christian era. This volume arises out of a passionate commitment to the cause of theological education.

The authors hail from a wide range of denominational traditions and have taught in numerous seminaries and divinity schools. They have also studied the classical and postmodern rhetorical traditions in both theory and practice. They met as a group on numerous occasions to read one another's contributions to the volume and to offer guidance for the process of rewriting. As a result, this book is much more than a mere collection of essays; it is a jointly authored work and one which presents an integrated vision for the future of theological education.

Reason and Democracy Thomas A. Spragens, 1990-07-20
Reason and Democracy breaks new ground in providing a plausible philosophical basis for the communitarian view of a healthy democracy as the rational pursuit of common purposes by free and equal citizens. Thomas A. Spragens Jr. argues that the most persistent paradigms of Western political rationality originated in classical philosophy, took their modern expression in the philosophies of Kant and Mill, and terminated in Max Weber's pairing of purely technical rationality with arbitrary ends. Drawing on recent work in the philosophy of science and the philosophy of language, combined with appropriate analogies in political thought and action, Spragens maintains that it is possible to discern the outlines of a philosophically cogent and morally beneficial concept of rational practice on the part of a political community. This possibility, he contends, provides a philosophical basis for liberal democratic politics that is superior to utilitarian and deontological accounts.

From Accelerated Accumulation to Socialist Market Economy in China Kjeld Erik Brodsgaard, Koen Rutten, 2017-04-03
In *From Accelerated Accumulation to Socialist Market Economy in China*, Kjeld Erik Brodsgaard and Koen Rutten examine China's indigenous economic discourse and its relation to both economic policy making and the overall trajectory of development from the First Five Year Plan in 1953 to 2016. In so doing, this volume demonstrates that although the form of the current economic system and its theoretical underpinnings bear scant resemblance to those of the planned economy, economic policy making still relies on the principle of accelerated accumulation, which lay at the heart of the economic development project in the early years of the People's Republic.

Nietzsche, Theories of Knowledge, and Critical Theory Babette Babich,Robert S. Cohen,1999-08-31 Nietzsche Theories of Knowledge and Critical Theory the first volume of a two volume book collection on Nietzsche and the Sciences ranges from reviews of Nietzsche and the wide variety of epistemic traditions not only pre Socratic but Cartesian Leibnizian Kantian and post Kantian through essays on Nietzsche s critique of knowledge via his critique of grammar and modern culture and culminates in an extended section on the dynamic of Nietzsche s critical philosophy seen from the perspective of Habermas and critical theory This volume features a first time English translation of Habermas s afterword to his own German language collection of Nietzsche s Epistemological Writings **Philosophical Dimensions of Logic and Science**

Artur Rojszczak,Jacek Cachro,Gabriel Kurczewski,2003-10-31 This is a collection of outstanding contributed papers presented at the 11th International Congress of Logic Methodology and Philosophy of Science Krak w 1999 The articles address current issues in logic metamathematics philosophy of language philosophy of science and cognitive science as well as philosophical problems of biology chemistry and physics The volume will be of interest to philosophers logicians and scientists interested in foundational problems **Reason and the Search for Knowledge** D. Shapere,2012-12-06 An

impressive characteristic of Dudley Shapere s studies in the philosophy of the sciences has been his dogged reasonableness He sorts things out with logical care and mastery of the materials and with an epistemological curiosity for the historical happenings which is both critical and respectful Science changes and the philosopher had better not link philosophical standards too tightly to either the latest orthodox or the provocative up start in scientific fashions and yet as critic the philosopher must not only master the sciences but also explicate their meanings not those of a cognitive never never land Neither dreamer nor pedant Professor Shapere has been able to practice the modern empiricist s exercises with the sober and stimulating results shown in this volume he sees that he can be faithful to philosophical analysis engage in the boldest rational reconstruction of theories and experimental measurements and faithful too empirically faithful we may say to both

the direct super highways and the winding pathways of conceptual evolutions and metaphysical revolutions Not least Shapere listens To Einstein and Calileo of course but to the workings of the engineers and the scientific apprentices too and to the various philosophers now and of old who have also worked to make sense of what has been learned and how that has happened and where we might go wrong

Reconsideration of Science and Technology II Liu Dachun,Ai Zhiqiang,Yang Huili,2022-09-30 In reviewing and reconsidering the intellectual history of scientism and antiscientism the authors assess the process of reasoning and prejudices of these contrasting viewpoints while discussing the repercussions of scientific hegemony and its contemporary criticism As the second volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this title focuses on ideological trends centering around scientism and anti scientism since the 19th century The six chapters look into the emergence of scientism instrumental reason scientific optimism scientific pessimism scientific crisis and irrationalism and finally the deconstruction of scientism The authors provide insight into the connections and biases of these disparate views and critiques explore the influences of the hegemony of science and contemporary critique of science and evaluate the value of postmodernism and deconstructivism The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture

Historical Sociology Philip Abrams,1982 This book argues that history and sociology share the same vital preoccupation the desire to unravel the puzzle of human agency How do large scale social transformations occur and what is the role of the individual in them Phil Abrams devotes three chapters to the development of industrialism and scrutinizes in that connection the theories of Marx Weber and Durkheim Subsequent chapters consider Talcott Parsons and the debate on convergence the formation of states the idea of the event as a legitimate concern of history and sociology individuals and sociological generations deviancy and revolution and a final chapter on the limits of historical sociology

Science and the Near-Death Experience Chris Carter,2010-08-23 The scientific evidence for life after death Explains why near death experiences NDEs offer evidence of an afterlife and discredits the psychological and physiological explanations for them Challenges materialist arguments against consciousness surviving death Examines ancient and modern accounts of NDEs from around the world including China India and many from tribal societies such as the Native American and the Maori Predating all organized religion the belief in an afterlife is fundamental to the human experience and dates back at least to the Neanderthals By the mid 19th century however spurred by the progress of science many people began to question the existence of an afterlife and the doctrine of materialism which believes that consciousness is a creation of the brain began to spread Now using scientific evidence Chris Carter challenges materialist arguments against consciousness surviving death and shows how near death experiences NDEs may truly provide a glimpse of an awaiting afterlife Using evidence from scientific studies quantum mechanics and consciousness research Carter reveals how consciousness does not depend on the brain and may in fact survive the death of our bodies Examining ancient and modern accounts of NDEs from around the world including China India and tribal societies such as the Native American and the Maori he explains how NDEs provide evidence of consciousness surviving the death of our bodies He looks at the many psychological and physiological explanations for NDEs raised by skeptics such as stress birth memories or oxygen starvation and clearly shows why each of them fails to truly explain the NDE Exploring the similarities between NDEs and visions experienced during actual death and the intersection of physics and consciousness Carter uncovers the truth about mind matter and life after death [InfoWorld](#) ,2000-08-14 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects
