Organization Studies and Posthumanism François-Xavier de Vaujany,Silvia Gherardi,Polyana Silva,2024-04-05 This book aims at exploring the reception of critical posthumanist conversations in the context of Management and Organization Studies It constitutes an invitation to de center the human subject and thus an invitation to the ongoing deconstruction of

humanism The project is not to deny humans but to position them in relation to other nonhumans more than humans the non living world and all the missing masses from organizational inquiry What is under critique is humanism s anthropocentrism essentialism exceptionalism and speciesism in the context of the Anthropocene and the contemporary crisis the world experiences From climate change to the loss of sense at work to the new geopolitical crisis to the unknown effects of the diffusion of AI all these powerful forces have implications for organizations and organizing A re imagination of concepts theories and methods is needed in organization studies to cope with the challenge of a more than human world

Rational Landscapes and Humanistic Geography Edward Relph,2015-07-30 This book first published in 1981 explores why it is that the modern built environment while successfully providing material comfort and technical efficiency none the less breeds despair and depression rather than inspires hope and commitment The source of this paradox where material benefits appear to have been gained only at the expense of intangible values and qualities is found in humanism the persistent and powerful belief that all problems can be solved through the use of human reason But humanism has become increasingly confused rationalistic callously devoted to efficiency and authoritarian These confusions and contradictions together with the anti nature stance of humanism and its failure to teach humane behaviour lead the author to conclude that humanism is best rejected Such rejection does not advocate the inhuman and anti human but requires instead a return to the humility that lies at the origin of humanism a respect for objects creatures environments and people This environmental humility is explored in

the context of individuality of settings ways of seeing landscapes appropriation and ways of building places This title will be of interest to students of human geography The Literary Guide and Rationalist Review ,1914 **The Idea Of**

Nationalism Hans Kohn,1969 In this sixtieth anniversary edition of The Idea of Nationalism Craig Calhoun probes the work of Hans Kohn and the world that first brought prominence to this unparalleled defense of the national ideal in the modern West At its publication Saturday Review called it an enduring and definitive treatise Kohn has written a book which is less a history of nationalism than it is a history of Western civilization from the standpoint of the national idea This edition includes an extensive new introduction by Craig Calhoun which in itself is a substantial contribution to the history of ideas The Idea of Nationalism comprehensively analyzes the rise of nationalism the idea s content and its worldwide implications from the days of Hebrew and Greek antiquity to the eve of the French Revolution As Calhoun explains Kohn was particularly qualified to undertake this study He grew up in Prague the vigorous heart of Czech nationalism participated in the Zionist student movement studied the question of nationality in multinational cultures spent the World War One years in Asian Russia and later traveled extensively in the Near East studying the nationalist movements of western and southern Asia The work itself is the product of Kohn s later years at Harvard University In The Idea of Nationalism Kohn presents the single most influential articulation of the distinction between civic and ethnic nationalism This has shaped nearly all ensuing research and public discussion and deeply informed parallel oppositions of early and late Western and Eastern varieties of nationalism Kohn also argues that the age of nationalism represents the first period of universal history Civilizations and continents are brought into ever closer contact popular participation in politics is enormously increased and the secular state is ever more significant The Idea of Nationalism is important both in itself and because it so deeply shaped all the work that followed it After sixty years his interpretations and analyses remain acute and instructive **National Union Catalog** ,1978 Includes

entries for maps and atlases **The Rise of Animals and Descent of Man, 1660-1800** John Morillo,2017-11-22 The Rise of Animals and the Descent of Man illuminates compelling historical connections between a current fascination with animal life and the promotion of the moral status of non human animals as ethical subjects deserving our attention and respect and a deep interest in the animal as agent in eighteenth century literate culture It explores how writers including well known poets important authors who mixed art and science and largely forgotten writers of sermons and children s stories all offered innovative alternatives to conventional narratives about the meaning of animals in early modern Europe They question Descartes claim that animals are essentially soulless machines incapable of thought or feelings British writers from 1660 1800 remain informed by Cartesianism but often counter it by recognizing that feelings are as important as reason when it comes to defining animal life and its relation to human life This British line of thought deviates from Descartes by focusing on fine feeling as a register of moral life empowered by sensibility and sympathy but this very stance is complicated by cultural fears that too much kindness to animals can entail too much kinship with them fears made famous in the later reaction to

Darwinian evolution The Rise of Animals uncovers ideological tensions between sympathy for animals and a need to defend the special status of humans from the rapidly developing Darwinian perspective The writers it examines engage in complex negotiations with sensibility and a wide range of philosophical and theological traditions Their work anticipates posthumanist thought and the challenges it poses to traditional humanist values within the humanities and beyond The Rise of Animals is a sophisticated intellectual history of the origins of our changing attitudes about animals that at the same time illuminates major currents of eighteenth century British literary culture

Provincializing Europe Dipesh Chakrabarty, 2009-06-05 First published in 2000 Dipesh Chakrabarty's influential Provincializing Europe addresses the mythical figure of Europe that is often taken to be the original site of modernity in many histories of capitalist transition in non Western countries This imaginary Europe Dipesh Chakrabarty argues is built into the social sciences The very idea of historicizing carries with it some peculiarly European assumptions about disenchanted space secular time and sovereignty Measured against such mythical standards capitalist transition in the third world has often seemed either incomplete or lacking Provincializing Europe proposes that every case of transition to capitalism is a case of translation as well a translation of existing worlds and their thought categories into the categories and self understandings of capitalist modernity Now featuring a new preface in which Chakrabarty responds to his critics this book globalizes European thought by exploring how it may be renewed both for and from the margins
