Rationality and Relativism I.C. Jarvie, 2015-07-03 Anthropology revolves round answers to problems about the nature development and unity of mankind problems that are both philosophical and scientific In this book first published in 1984 Professor Jarvie applies Popper's philosophy of science to understanding the history and theory of anthropology Jarvie describes how the ancient view that the aim of science and philosophy was to get at the truth is challenged in anthropology by the doctrine of cultural relativism that is that truth varies with the cultural framework He shows how philosophers as various as Peter Winch W V O Quine W T Jones Nelson Goodman and Richard Rorty were influenced by this doctrine Yet these philosophers also accept the value of rational argument Jarvie believes that there is a contradiction between relativism and any notion of human rationality that centres around argument Forced by the contradiction to choose between rationality and relativism he argues strongly that logical scientific and moral considerations favour rationality and urge repudiation of relativism The central argument of the book is that relativism is intellectually disastrous and has fostered intellectual attitudes from which anthropology still suffers

Luzbetak, 2015-03-31 Why should the church be concerned about cultures Louis J. Luzbetak began to answer this question twenty five years ago with the publication of *The Church and Cultures An Applied Anthropology for the Religious Worker* Reprinted six times and translated into five languages it became an undisputed classic in the field Now by popular demand Luzbetak has thoroughly rewritten his work completely updating it in light of contemporary anthropological and missiological thought and in face of current world conditions Serving as a handbook for a culturally sensitive ministry and witness *The Church and Cultures* introduces the non anthropologist to a wealth of scientific knowledge directly relevant to pastoral work religious education social action and liturgy in fact to all forms of missionary activity in the church It focuses on a burning theological issue that of contextualization the process by which a local church integrates its understanding of the Gospel text with the local culture context

Postcolonial Theory and the Making of Hindu Nationalism Meera Nanda, 2025-06-06 This book tells the story of two strange bedfellows the Postcolonial Left and the Hindu Right It argues that the Postcolonial Left's relentless attacks on the epistemic violence of Western norms of rationality and modernity are providing the conceptual vocabulary for the Hindu Right's project of decolonizing the Hindu mind The postcolonial project of provincializing Europe is widely shared by the Hindu Right and harks back to the Hindu revivalist movements of the nineteenth century This book argues that postcolonial thought in India bears a strong family resemblance in context and content with the conservative revolution that brought down the Weimar Republic in Germany before the Nazi takeover Both an intellectual history of India through the last half century and a critical engagement with postcolonial theory this book will be of interest to scholars of South Asia and the humanities and social sciences at large

The Territories of Human Reason Alister E. McGrath, 2019-01-03 Our understanding of human rationality has changed significantly since the beginning of the century with growing emphasis being placed on multiple rationalities each adapted to the specific tasks of communities of practice We may think of the world as an ontological unity but we use a plurality of methods to investigate and represent this world This development has called into question both the appeal to a universal rationality characteristic of the Enlightenment and also the simple modern postmodern binary *The Territories of Human Reason* is the first major study to explore the emergence of multiple situated rationalities It focuses on the relation of the natural sciences and Christian theology but its approach can easily be extended to other disciplines It provides a robust intellectual framework for discussion of transdisciplinarity which has become a major theme in many parts of the academic world Alister E. McGrath offers a major

reappraisal of what it means to be rational which will have significant impact on older discussions of this theme He sets out to explore the consequences of the seemingly inexorable move away from the notion of a single universal rationality towards a plurality of cultural and domain specific methodologies and rationalities What does this mean for the natural sciences For the philosophy of science For Christian theology And for the interdisciplinary field of science and religion How can a single individual hold together scientific and religious ideas when these arise from quite different rational approaches This groundbreaking volume sets out to engage these questions and will provoke intense discussion and debate

Strategies of Sanity and Survival Jussi Hanska, 2002-06-17 It is an unusual book in many respects It is a specific study based on original and in most cases unedited sources but it can also be read as a general introduction It crosses boundaries between different fields of learning and traditionally accepted time periods of history Even if it is essentially a book on medieval man it stretches far beyond the middle ages as conventionally understood The final chapter traces the slow disappearance of the medieval mentality until the early nineteenth century

Islams and Modernities Aziz Al-Azmeh, 2020-05-05 Islam has become the new spectre haunting Europe All too often even well meaning liberals portray the modern resurgence of Islam as the new Green Menace intolerant medieval and barbaric which has replaced Communism as the main threat to Western civilization and values For Aziz Al Azmeh this Orientalist and racist view of Islam is nothing but the mirror image of the myths propagated by Islamic fundamentalists and radicals Both views share an erroneous and ahistorical conception of Islam as an unchanging and monolithic entity Surveying both its social origins and its intellectual genealogy Al Azmeh rethinks the relationship between Islam and the West uncovering a rich actual history of interaction In this expanded new edition the author examines the discourse surrounding Islamism and irrationalism after 9 11

Difference and Sameness as Modes of Integration Günther Schlee, Alexander Horstmann, 2017-11-01 What does it mean to fit in In this volume of essays editors Günther Schlee and Alexander Horstmann demystify the discourse on identity challenging common assumptions about the role of sameness and difference as the basis for inclusion and exclusion Armed with intimate knowledge of local systems social relationships and the negotiation of people's positions in the everyday politics these essays tease out the ways in which ethnicity religion and nationalism are used for social integration

Popper and His Popular Critics Joseph Agassi, 2014-05-14 This volume examines Popper's philosophy by analyzing the criticism of his most popular critics Thomas Kuhn Paul Feyerabend and Imre Lakatos They all followed his rejection of the traditional view of science as inductive Starting from the assumption that Hume's criticism of induction is valid the book explores the central criticism and objections that these three critics have raised Their objections have met with great success are significant and

deserve paraphrase One also may consider them reasonable protests against Popper's high standards rather than fundamental criticisms of his philosophy The book starts out with a preliminary discussion of some central background material and essentials of Popper's philosophy It ends with nutshell representations of the philosophies of Popper Kuhn Feyerabend and Lakatos The middle section of the book presents the connection between these philosophers and explains what their central ideas consist of what the critical arguments are how they presented them and how valid they are In the process the author claims that Popper's popular critics used against him arguments that he had invented and answered without saying so They differ from him mainly in that they demanded of all criticism that it should be constructive do not stop believing a refuted theory unless there is a better alternative to it Popper hardly ever discussed belief delegating its study to psychology proper he usually discussed only objective knowledge knowledge that is public and thus open to public scrutiny

Reflections on Europe Hans-Åke Persson, 2007 When Dutch and subsequently French voters rejected the Draft Treaty for a Constitution for Europe in Spring 2005 many voices called for a pause for reflection This book is in part a result of that moment of reflection We wanted to contribute to the debate about Europe but crucially we sought to do so by taking a step back from the problem formation and agenda setting of Brussels For the authors of this volume one key to establishing critical distance has been the reappraisal of the historical perspective Another has been the problematisation of Europe as a space as opposed to looking for a definition of borders The authors also seek critical distance through a focus on the tension between Europe as a culture as a polity and as an economy These tensions have often been neglected or even ignored and the relationships have been seen as more or less synonymous and harmonious The aim of this volume then is two fold It wants developing a critical distance to the present Europe to contribute to the vivid academic research and debate on Europe which too often either develops distance without commenting on the present state of affairs or comments on the present without critical distance

Cross-cultural Conversation Anindita Niyogi Balslev, 1996 The eleven essays in this collection address various aspects of cross cultural studies Contributors were visiting scholars at the Center for Cultural Research at Aarhus University in Denmark The clarity provided by their reflections concerning both the rewards and limitations of cross cultural studies will be increasingly important now that we've entered the pluralistic world of the new millennium
