Rationalized Epistemology:

Rationalized Epistemology Albert A. Johnstone, 1991-10-18 This book examines skeptical problems originally raised by Descartes and Hume and currently discussed in philosophy of mind philosophy of language metaphysics and epistemology It answers the basic skeptical questions concerning the existence of what is now unperceived the reality of what is perceived and the existence of an external world Johnstone shows how the recently proposed solutions to these skeptical problems pragmatic coherentist linguistic and new Kantian do not and cannot work and how only a return to foundational investigation on the terrain of the radical skeptic is adequate to the task His analyses make for a valuable summary of every significant argument brought against skepticism In the course of his investigation Johnstone probes a number of topical issues knowledge rationality the nature of meaning nonverbal thinking the bodily nature of the thinking self parasitism the role of the tactile kinesthetic body in feeling and belief and the necessary role of free will in epistemology Feminist

Interpretations of W. V. Quine Jack Nelson, 2010-11-01 As one of the preeminent philosophers of the twentieth century W V Quine 1908 2000 made groundbreaking contributions to the philosophy of science mathematical logic and the philosophy of language This collection of essays examines Quine s views particularly his holism and naturalism for their value and their limitations to feminist theorizing today Some contributors to this volume see Quine as severely challenging basic tenets of the logico empiricist tradition in the philosophy of science the analytic synthetic distinction verificationism foundationalism and accept various of his positions as potential resources for feminist critique Other contributors regard Quine as an unrepentant empiricist and unlike feminists who seek to use or extend his arguments they interpret his positions as far less radical and more problematic In particular critics and advocates of Quine s arguments that the philosophy of science should be naturalized understood and pursued as an enterprise continuous with the sciences proper disagree deeply about whether such a naturalized philosophy is philosophy enough Central issues at stake in these disagreements reflect current questions of special interest to feminists and also bridge the analytic and postmodern traditions They include questions about whether and how the philosophy of science as a form of practice is or can be normative as well as questions concerning the implications of Quine s philosophy of language for the transparency and stability of meaning In representing feminist philosophy centrally engaged with the analytic tradition this volume is important not only for what it contributes to the understanding of Quine and naturalized epistemology but also for what it accomplishes in working against restrictive conceptions of the place of feminism within the discipline Aside from the editors the contributors are Kathryn Pyne Addelson Louise M Antony Richmond Campbell Lorraine Code Jane Duran Maureen Linker Phyllis Rooney and Paul A Roth

Bocking, 2016-07-15 This book examines Religious Education RE in over ten countries including Australia Indonesia Mali Russia UK Ireland USA and Canada Investigating RE from a global and multi interdisciplinary perspective it presents research on the diverse past present and possible future forms of RE In doing so it enhances public and professional understanding of the complex issues and debates surrounding RE in the wider world The volume emphasizes a student centred approach viewing any kind of RE or its absence as a formative lived experience for pupils It stresses a bottom up sociological and ethnographic anthropological research based approach to the study of RE rather than the top down approaches which often start from prescriptive legal ideological or religious standpoints The twelve chapters in this volume regard RE as an entity that has multiple and contested meanings and interpretations that are constantly negotiated For some RE means religious nurturing either tailored to parental views or meant to inculcate a uniform religiosity For others RE means learning about the many religious and non religious world views and secular ethics that exist not promoting one religion or another Some seek to avoid the ambiguous term religious education replacing it with terms such as education about religions and beliefs or the religious dimension of intercultural education **Ibn Qayyim al-Jawziyya and the**

Intellectual Life Steve Fuller,2009-08-18 The Sociology of Intellectual Life outlines a social theory of knowledge for the 21st century With characteristic subtlety and verve Steve Fuller deals directly with a world in which it is no longer taken for granted that universities and academics are the best places and people to embody the life of the mind While Fuller defends academic privilege he takes very seriously the historic divergences between academics and intellectuals attending especially to the different features of knowledge production that they value The book's features include an account of the problematic relationship between postmodernism and the university as an institution the problems facing an academic who wishes also to function as an intellectual a critical survey of the emerging fields of social epistemology and the sociology of philosophy a discussion of the ethics and politics of public intellectual life especially given its largely improvisational or as Fuller himself terms it bullshit character **Habits of Thought in the English Renaissance** Debora K. Harrington,Barbara L. Marshall,Hans-Peter Müller,2006 The Encyclopedia of Social Theory contains over 500 entries varying from concise definitions of key terms and short biographies of key theorists to comprehensive surveys of leading concepts debates themes and schools The object of the Encyclopedia has been to give thorough coverage of the central topics in theoretical sociology as well as terms and concepts in the methodology and philosophy of social science Although 106 theorists are given entries the emphasis of the work is on the elucidation of ideas rather than intellectual biography The Encyclopedia covers the leading contemporary domains of debate on social theory and the classical legacies of social thinkers from the nineteenth and early twentieth centuries giving proper balance to both the European and North American traditions and to important new developments in the global self understanding of sociology Social theory has become one of the most vigorous specialisms of sociology in recent years This is in part due to the considerable overlaps of social theory with other disciplinary areas such as cultural and media studies anthropology and political theory and to the cross disciplinary nature of theoretical approaches such as feminism and psychoanalysis and new fields such as postcolonial studies The editors have therefore worked to produce in the Encyclopedia of Social Theory a first call reference for students and researchers across the social sciences and humanities with an interest in contemporary theory and the modern history of ideas The Encyclopedia has been authored by leading international specialists in the field under the direction of a well balanced editorial team It is

comprehensively cross referenced and all larger entries carry bibliographies There is a full index *The Primacy of Movement* Maxine Sheets-Johnstone, 2011 This expanded second edition carries forward the initial insights into the biological and existential significances of animation by taking contemporary research findings in cognitive science and philosophy and in neuroscience into critical and constructive account It first takes affectivity as its focal point elucidating it within both an enactive and qualitative affective kinetic dynamic It follows through with a thoroughgoing interdisciplinary inquiry into movement from three perspectives mind brain and the conceptually reciprocal realities of receptivity and responsivity as set forth in phenomenology and evolutionary biology respectively It ends with a substantive afterword on kinesthesia pointing up the incontrovertible significance of the faculty to cognition and affectivity Series A Organizational Epistemology Kasra Seirafi, 2013-02-26 This book presents an in depth perspective of knowledge as a fundamental process of any organization rather than just another resource to be managed The author presents a process oriented theory of creating and applying knowledge directed towards both researchers and practitioners In this book the author develops normative knowledge management guidelines which draw from a unique view on knowledge discussed in the field of philosophy since Plato but neglected by most knowledge management authors by applying a philosophically grounded social epistemology to organizations The guidelines in this book call for an open and reflective space of knowledge creation aligned with goals and structures of the organization Numerous examples field studies and an application to the main case study on Seven Eleven Japan complement both the descriptive view on knowledge as well as the normative guidelines presented in this book

Schooling Islam Robert W. Hefner, Muhammad Qasim Zaman, 2010-12-16 Since the Taliban seized Kabul in 1996 the public has grappled with the relationship between Islamic education and radical Islam Media reports tend to paint madrasas religious schools dedicated to Islamic learning as medieval institutions opposed to all that is Western and as breeding grounds for terrorists Others have claimed that without reforms Islam and the West are doomed to a clash of civilizations Robert Hefner and Muhammad Qasim Zaman bring together eleven internationally renowned scholars to examine the varieties of modern Muslim education and their implications for national and global politics The contributors provide new insights into Muslim culture and politics in countries as different as Morocco Egypt Pakistan India Indonesia Iran and Saudi Arabia They demonstrate that Islamic education is neither timelessly traditional nor medieval but rather complex evolving and diverse in its institutions and practices They reveal that a struggle for hearts and minds in Muslim lands started long before the Western media discovered madrasas and that Islamic schools remain on its front line *Schooling Islam* is the most comprehensive work available in any language on madrasas and Islamic education **Rational Acceptance and Purpose** David S.
