Rationing Americas Medical Care The Oregon Plan And Beyond Brookings Dialogues On Public Policy:

Rationing America's Medical Care Martin A. Strosberg, Joshua Wiener, Robert Baker, 2010-12-01 As Americans struggle with the dual problems of exploding health care costs and ensuring access to health care for the uninsured health care rationing has moved to the center of the public policy debate A prime example of this is the intense public discussion surrounding the proposal by the state of Oregon to provide universal health care at a price the explicit rationing of which diagnoses and treatments will be covered Focusing largely on the Oregon proposal this volume examines a wide range of ethical methodological legal and political issues that must be addressed by any serious program of health care reform

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1993 Solidarity in Health and Social Care in Europe W. Arts, R. Muffels, 2013-03-14 OF SOLIDARITY IN UK SOCIAL WELFARE Here then perhaps is a British version of solidarity in social welfare but early there are strong tensions between the powerfully liberal individualistic strands of the British understanding of the functions of the state and the socialistic or communitarian tendency of a commitment to universal welfare provision In the search for the roots of this understanding of welfare we shall survey first the historical background to these tensions in some early British political philosophers starting with Hobbes and ending with Mill We then consider the philosophical and social influences on the Beveridge Report itself and we will trace the emergence of the philosophy of the welfare state in the era following the Second World War Finally we consider the contemporary debate as it relates to the Third Way thinking of New Labour 2 A HISTORICAL SKETCH In the previous section we observed that the philosophy underlying the Beveridge Report could be described as liberal collectivism What are the historical antecedents of this strange amalgam of individualism and collectivism Within the short scope of this chapter any account of the philosophical history must be little more than a sketch but we can perhaps understand most debates in British socio political thought as a continuing dialogue with the well known claim of Thomas Hobbes in Leviathan that all political institutions are founded on egoistic motives Allocating Medicine and the Common Good Kevin Patrick Quinn, 1993

Current Catalog National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 *China: Bioethics, Trust, and the Challenge of the Market* J. Tao Lai Po-wah, 2008-07-08 to the Moral Challenges H Tristram Engelhardt Jr and Aaron E Hinkley 1 Taking Finitude Seriously in a Chinese Cultural Context Across the world health care policy is a moral and political challenge Few want to die young or to suffer yet not all the money in the world can deliver physical immortality or a life free of suffering In addition health care needs differ As a result unless a state coercively forbids those with the desire and means to buy better basic health care to do so access to medicine will be unequal No country can afford to provide all with the best of care In countries such as China there are in addition stark regional differences in the quality and availability of health care posing additional challenges to public policy making Further in China as elsewhere the desire to lower morbidity and mortality risks has led to ever more resources being invested in health care When such

investment is supported primarily by funds derived from taxation an increasing burden is placed on a country s economy This is particularly the case as in China with its one child policy where the proportion of the elderly population consuming health care is rising These policy challenges are compounded by moral diversity Defacto humans do not share one morality Instead they rank cardinal human goods and right making conditions in different orders often not sharing an affirmation of the same goods or views of the right

Is Death Ever Preferable to Life? Ian Olver, 2013-06-29 This is an original contribution to the much debated area of the value that we should place on human life With the euthanasia issue highlighted in the public arena this book argues for a non absolutist highest value on life ethic and how that fits with society s current emphasis on individual autonomy Not only are the arguments for and against placing a highest value on life explored but the way of arguing particularly the use of slippery slopes is discussed By the use of everyday examples the impact of placing a high value on life is explored A futuristic intensive care ward round illustrates the ethical and resource issues with which we would be challenged in adopting a highest value on life policy for medical decisions This book will be useful for students of ethics nursing and medicine as well as those engaged in the public debate on euthanasia

Just Caring Leonard M. Fleck, 2009-03-30 What does it mean to be a just and caring society when we have only limited resources to meet unlimited health care needs Do we believe that all lives are of equal value Is human life priceless Should a just and caring society refuse to put limits on health care spending In Just Caring Leonard Fleck reflects on the central moral and political challenges of health reform today He cites the millions of Americans who go without health insurance thousands of whom die prematurely unable to afford the health care needed to save their lives Fleck considers these deaths as contrary to our deepest social values and makes a case for the necessity of health care rationing decisions The core argument of this book is that no one has a moral right to impose rationing decisions on others if they are unwilling to impose those same rationing decisions on themselves in the same medical circumstances Fleck argues we can make health care rationing fair in ways that are mutually respectful if we engage in honest rational democratic deliberation Such civic engagement is rare in our society but the alternative is endless destructive social controversy that is neither just nor caring

discussions focus on health care rationing who lives and who dies death versus dollars In this book physician and bioethicist Peter A Ubel argues that physicians health insurance companies managed care organizations and governments need to consider the cost effectiveness of many new health care technologies In particular they need to think about how best to ration health care Ubel believes that standard medical training should provide physicians with the expertise to decide when to withhold health care from patients He discusses the moral questions raised by this position and by health care rationing in general He incorporates ethical arguments about the appropriate role of cost effectiveness analysis in health care rationing empirical research about how the general public wants to ration care and clinical insights based on his practice of general internal medicine Straddling the fields of ethics economics research psychology and clinical medicine he moves the debate forward from whether to ration to how to ration The discussion is enlivened by actual case studies
