Summer 2016 Edition - The Raven Review The Raven Review, *The Educational record, with the proceedings at large of the British and foreign school society* British and foreign school society,1872 **The Economics of School Quality Investments in Developing Countries** Paul Glewwe,1999-07-05 This book presents a method to estimate the economic returns to investments in school quality While economists have long had methods to estimate rates of return to additional years of schooling until now there has been no method for analyzing returns to investments in school quality This is regrettable because many if not most government education policies focus on school quality Empirical work using data from Ghana shows that investments in school quality have higher rates of return than investments in increased years in schooling The bulk of the study is written by Paul Glewwe with some coauthored and contributed pieces from his co researchers Jaikishan Desai Dean Jolliffe Raylynn Oliver and Wim Vijverberg who worked as research assistants on this project

Addressing Issues of Access and Fairness in Education through Dynamic Assessment Matthew E Poehner, Pauline Rea-Dickins, 2014-03-05 Increased emphasis in many school systems on formal testing to mark student achievement and hold teachers accountable has begun to heighten concern among many educational policy makers assessment specialists and classroom teachers over questions of access and fairness particularly for learners from culturally different backgrounds and those with a history of academic struggles This situation echoes that faced by the Russian psychologist L S Vygotsky nearly ninety years ago in his efforts to understand processes of development and meet the needs of all learners His famous proposal of the Zone of Proximal Development ZPD holds that assessments must take account not only of abilities that have fully formed but also those that are still emerging The diagnostic value of the ZPD lies in identifying the underlying source of learner difficulties as well as their future potential Since Vygotsky's time psychologists and educators have devised a range of practices for engaging with learners in ZPD activity that have come to be known as Dynamic Assessment DA In DA assessors go beyond observations of independent performance and engage cooperatively with learners to both understand and support their development This process is in full evidence in the papers in this collection which offers a cross section of applications of DA with diverse populations including special needs learners immigrant and minority students and second language learners While these papers may be read as cutting edge academic research they also represent a commitment to going beyond manifest difficulties and failures to help individuals construct a more positive future This book was originally published as a special issue of *Assessment in Education Principles Policy Practice* *The Routledge International Handbook of Research on Dialogic Education* Neil Mercer, Rupert Wegerif, Louis Major, 2019-09-26 The Routledge International Handbook of Research on Dialogic Education provides a comprehensive overview of the main ideas and themes that make up the exciting and diverse field of Dialogic Education With contributions from the world's leading researchers it describes underpinning theoretical approaches debates methodologies evidence of impact how Dialogic
