Old Age and the Welfare State Anne Marie Guillemard,1983 The modern welfare state is above all a welfare state for the elderly An overwhelming proportion of its services and benefits go to them The current crisis of the welfare state is also therefore a crisis of policy concerned with the aged The essays in this volume examine not only interventions by governments on behalf of the old but the very basis and history of the welfare state itself From a variety of perspectives ranging from structural functionalism to neomarxism they examine old age policy in six advanced industrial nations the United States Canada Great Britain Italy West Germany and France The essays in Part One deal with the process of making public policy on old age and changes in it during the current economic crisis Contributions in the second part examine the impact of existing policies on older people The focus of the essays on social economic and political aspects amounts to a new approach in gerontology that has been called by some the political economy of ageing This book is unique in providing research on the relationship between old age policy and the larger class structure economy and state apparatus of more than one country It will become a classic in the field and an example of how sociology can be relevant to deal with our current social and economic crisis Manuel Castells University of California at Berkeley
