Division of Organic Coatings and Plastics Chemistry The book is divided into four parts covering different areas of RIM
development The first part is devoted to the future trends of RIM development in the United States and Japan The structure
properties relationship and effects of annealing on properties of RIM elastomers are covered in the second part New non
urethane polymers such as polyamides polyisocyanurates and polystyrene suitable for RIM processing are discussed in the
third part In the last part the engineering and technological aspects of RIM such as glass reinforcement mixing flow and
moldability are covered in detail Finally I would like to thank Mrs Iris Glebe for typing this book and for help with editing and
