Current Issues in Morphological Processing Ram Frost, Jonathan Grainger, Kathleen Rastle, 2005 The present special issue is the third volume produced by a group of researchers who convene every two years to discuss the role of morphology in word recognition It includes thirteen experimental papers all devoted to morphological processing The volume explores a variety of languages such as Arabic Dutch English Finnish French German Hebrew Serbo Croatian and Spanish The methods of investigations include single word recognition masked cross modal and long term priming the monitoring of eye movements or the use of computer simulations with both the processing of speech and print being explored The present volume being the third consecutive one on morphology provides a longitudinal perspective on the theoretical issues currently under debate in the field of morphological processing and also sets the scene for future work in this domain

Reading Complex Words E. Assink, Dominiek Sandra, 2003-03-31 This book brings together current research findings on the involvement of word internal structure for the purpose of word reading especially morphological structure The central

theme of reading complex words is approached from several angles such that the chapters span a wide variety of topics where this issue is important It is a valuable resource for all researchers studying the mental lexicon and to those who teach advanced courses in the psychology of language **Cross-Linguistic Study of Acquired Reading Disorders** Prathibha Karanth,2003-12-31 This volume focuses on cross linguistic studies of the acquired disorders of reading and what they can tell us about the models of reading and the human brain The author has compiled a source book on cross linguistic studies of reading disorders with data from the alphasyllabaries of India in addition to showing the implications of these findings on the understanding of reading its acquisition and the developmental and acquired reading disorders and their management

The Variable Mind? How Apparently Inconsistent Effects Might Inform Model Building Simona Amenta,Davide Crepaldi,2016-10-31 Model building is typically based on the identification of a set of established facts in any given field of research insofar as the model is then evaluated on how well it accounts for these facts Psychology and specifically visual word identification and reading is no exception in this sense e g Amenta Coltheart et al 2001 Grainger Marelli et al 2013 Kinoshita and Norris 2009 or even individual differences Andrews ii highlight new context dependent experimental effects in a way that is informative on the dynamics of the underlying cognitive processing iii shed new light on known context dependent experimental effects again in a way that enhances their theoretical informativeness **German Ver-verbs**

Matthias Klaus Schirmeier,2007 One of the central questions in psycholinguistics is how complex words are processed in the human mind German ver Verbs Internal Word Structure and Lexical Processing explores the visual word recognition of German ver verbs Superficially ver verbs are uniform they all begin with the sequence ver However their internal structure is heterogeneous Based on the results of various experimental designs this book shows that the internal structure of ver verbs is of paramount importance to their processing Thus the human mind employs different strategies for the processing of different types of complex words This book is a useful companion for German morphology and psycholinguistics courses

Understanding Developmental Dyslexia: Linking Perceptual and Cognitive Deficits to Reading Processes Pierluigi Zoccolotti, Peter F. de Jong, Donatella Spinelli, 2016-06-24 Understanding the mechanisms responsible for developmental dyslexia DD is a key challenge for researchers A large literature mostly concerned with learning to read in opaque orthographies emphasizes phonological interpretations of the disturbance Other approaches focused on the visual perceptual aspects of orthographic coding Recently this perspective was supported by imaging data showing that individuals with DD have hypo activation in occipito temporal areas a finding common to both transparent and opaque orthographies Nevertheless it is difficult to infer causal relationships from activation data Accommodating these findings within the cognitive architecture of reading processes is still an open issue This is a general problem which is present in much of the literature For example several studies investigating the perceptual and cognitive abilities that distinguish groups of children with and without DD failed to provide explicit links with the reading process Thus several areas of investigation e.g. acoustic deficits or magnocellular deficiencies have been plagued by replication failures Furthermore much research has neglected the possible contribution of comorbid symptoms By contrast it is now well established that developmental disorders present a large spectrum of homotopic and heterotopic comorbidities that make causal interpretations problematic This has led to the idea that the etiology of learning difficulties is multifactorial thus challenging the traditional models of DD Recent genetic studies provide information on the multiple risk factors that contribute to the genesis of the disturbance Another critical issue in DD is that much of the research has been conducted in English speaking individuals However English is a highly irregular orthography and doubts have been raised on the appropriateness of automatically extending interpretations based on English to other more regular orthographies By contrast important information can be gotten from systematic comparisons across languages Thus the distinction between regular and irregular orthographies is another potentially fruitful area of investigation Overall in spite of much research current interpretations seem unable to integrate all available findings Some proposals focus on the cognitive description of the reading profile and explicitly ignore the distal causes of the disturbance Others propose visual acoustic or phonological mechanisms but fail to link them to the pattern of reading impairment present in different children The present Research Topic brings together studies based on different methodological approaches i.e. behavioural studies examining cognitive and psycholinguistic factors eye movement investigations biological markers neuroimaging and genetic studies involving dyslexic groups with and without comorbid symptoms and in different orthographies transparent and opaque to identify the mechanisms underlying DD The RT does not focus on a single model or theory of dyslexia but rather brings together different approaches and ideas which we feel are fruitful for a deeper understanding developmental dyslexia

The Oxford Handbook of Morphological Theory Jenny Audring, Francesca Masini, 2019 This volume is the first handbook devoted

entirely to the multitude of frameworks adopted in the field of morphology. It offers critical discussions of the main theoretical issues in word formation and inflection, a detailed guide to each morphological theory and explorations into the relationship between morphological theory and other fields. *The Oxford Handbook of Compounding* Rochelle Lieber, Pavol Stekauer, 2011-07-07. This book presents a comprehensive review of theoretical work on the linguistics and psycholinguistics of compound words and combines it with a series of surveys of compounding in a variety of languages from a wide range of language families. Compounding is an effective way to create and express new meanings. Compound words are segmentable into their constituents so that new items can often be understood on first presentation. However, as keystone, keynote, and keyboard and breadboard, sandwich board and mortarboard show, the relation between components is often far from straightforward. The question then arises as to how far compound sequences are analysed at each encounter and how far they are stored in the brain as single lexical items. The nature and processing of compounds thus offer an unusually direct route to how language operates in the mind as well as providing the means of investigating important aspects of morphology and lexical semantics and insights to child language acquisition and the organization of the mental lexicon. This book is the first to report on the state of the art on these and other central topics including the classification and typology of compounds and cross-linguistic research on the subject in different frameworks and from synchronic and diachronic perspectives.

Masked Priming Sachiko Kinoshita, Stephen J. Lupker, 2004-06-02. This book showcases the advantages of masked priming as an alternative to more standard methods of studying language. *The Cambridge Handbook of Psycholinguistics* Michael Spivey, Marc Joanisse, Ken McRae, 2012-08-20. This comprehensive collection of chapters is written by leading researchers in psycholinguistics from a wide array of subfields. **Explaining Russian-German code-mixing** Nikolay Hakimov, 2021. The study of grammatical variation in language mixing has been at the core of research into bilingual language practices. Although various motivations have been proposed in the literature to account for possible mixing patterns, some of them are either controversial or remain untested. Little is still known about whether and how frequency of use of linguistic elements can contribute to the patterning of bilingual talk. This book is the first to systematically explore the factor usage frequency in a corpus of bilingual speech. The two aims are i) to describe and analyze the variation in mixing patterns in the speech of Russian-German adolescents and young adults in Germany and ii) to propose and test usage-based explanations of variation in mixing patterns in three morphosyntactic contexts: the adjective-modified noun phrase, the prepositional phrase, and the plural marking of German noun insertions in bilingual sentences. In these contexts, German noun insertions combine with either Russian or German words and grammatical markers, thus yielding mixed bilingual and German monolingual constituents. In otherwise Russian sentences, the latter are also labelled as embedded language islands. The results suggest that the frequency with which words are used together mediates the distribution of mixing patterns in each of the examined contexts. The differing impacts of co-occurrence frequency are attributed to the distributional and semantic specifics of the

analyzed morphosyntactic configurations Lexical frequency has been found to be another important determinant in this variation Other factors include recency or lexical priming in discourse in the case of prepositional phrases and phonological and structural similarities and differences in the inflectional systems of the contact languages in the case of plural marking

The Connections Between Language and Reading Disabilities Hugh W. Catts, Alan G. Kamhi, 2005-01-15 This is an edited book based on papers presented at a 2003 invitee only conference under the sponsorship of the Merrill Advanced Studies Center of the University of Kansas The participants were prominent scholars in the areas of language and reading and have research programs funded by NIH and other sources The purpose of the gathering was to discuss theoretical issues and research findings concerning the relationship between developmental language and reading disabilities specifically looking at neurological behavioral and genetic factors In addition it discussed other factors contributing to reading difficulties in the middle elementary school years through adolescence and literacy outcomes for children with early language impairments and how these problems relate to children with dyslexia The Foreword is written by Reid Lyon Branch Chief Child Development and Behavior Branch NICHD National Institutes of Health This book appeals to scholars in the areas of language disorders and reading disabilities as well as to practicing speech language pathologists special educators and reading specialists It may also be used in graduate courses designed as seminars in either language disorders or reading disabilities in schools of communication disorders as well as schools of education especially special education departments

Handbook of Communication Disorders Amalia Bar-On, Dorit Ravid, Elitzur Dattner, 2018-04-23 The domain of Communication Disorders has grown exponentially in the last two decades and has come to encompass much more than audiology speech impediments and early language impairment The realization that most developmental and learning disorders are language based or language related has brought insights from theoretical and empirical linguistics and its clinical applications to the forefront of Communication Disorders science The current handbook takes an integrated psycholinguistic neurolinguistic and sociolinguistic perspective on Communication Disorders by targeting the interface between language and cognition as the context for understanding disrupted abilities and behaviors and providing solutions for treatment and therapy Researchers and practitioners will be able to find in this handbook state of the art information on typical and atypical development of language and communication disabilities across the human lifespan from infancy to the aging brain covering all major clinical disorders and conditions in various social and communicative contexts such as spoken and written language and discourse literacy issues bilingualism and socio economic status

Contemporary Perspectives on Reading and Spelling Clare Wood, Vincent Connelly, 2009-09-10 With contributions from leading international researchers Contemporary Perspectives on Reading and Spelling offers a critique of current thinking on the research literature into reading reading

comprehension and writing Each paper in this volume provides an account of empirical research that challenges aspects of accepted models and widely accepted theories about reading and spelling This book develops the argument for a need to incorporate less widely cited research into popular accounts of written language development and disability challenging the idea that the development of a universal theory of written language development is attainable The arguments within the book are explored in three parts overarching debates in reading and spelling reading and spelling across languages written language difficulties and approaches to teaching Opening up the existing debates and incorporating psychological theory and the politics surrounding the teaching and learning of reading and spelling this edited collection offers some challenging points for reflection about how the discipline of psychology as a whole approaches the study of written language skills Highlighting ground breaking new perspectives this book forms essential reading for all researchers and practitioners with a focus on the development of reading and spelling skills *Implications of Psycho-computational Modelling for Morphological Theory* Vito Pirrelli,Harald Baayen,Walter Daelemans,Robert Malouf,2022-07-12
