theoretical issues and research findi **Handbook of Reading Disability Research** Anne McGill-Franzen, Richard L. Allington, 2010-09-17 Bringing together a wide range of research on reading disabilities this comprehensive Handbook extends current discussion and thinking beyond a narrowly defined psychometric perspective Emphasizing that learning to read proficiently is a long term developmental process involving many interventions of various kinds all keyed to individual developmental needs it addresses traditional questions What is the nature or causes of reading disabilities How are reading disabilities assessed How should reading disabilities be remediated To what extent is remediation possible but from multiple or alternative perspectives Taking incursions into the broader research literature represented by linguistic and anthropological paradigms as well as psychological and educational research the volume is on the front line in exploring the relation of reading disability to learning and language to poverty and prejudice and to instruction and schooling The editors and authors are distinguished scholars with extensive research experience and publication records and numerous honors and awards from professional organizations representing the range of disciplines in the field of reading disabilities Throughout their contributions are contextualized within the framework of educators struggling to develop concrete instructional practices that meet the learning needs of the lowest achieving readers Reading Difficulties & Dyslexia Jagannātha Prasāda Dāsa, 1998 Dyslexia In Children Angela Fawcett, 2017-07-28 This text links general skills difficulties to dyslexia It examines the research which has found that dyslexic children have problems not just with their reading but in a range of skills including several such as balance unrelated to reading **Vision, Reading Difficulties, and Visual Stress** Arnold J. Wilkins, Bruce J. W. Evans, 2022-08-02 This book provides an overview of the research surrounding the relevance of visual factors for those who struggle with reading Visual interventions that have been advocated as helping with reading include spectacles that simply correct refractive errors e g long sightedness coloured overlays sheets placed on the page and coloured lenses vision therapy and computer games This book explains the rationale behind these interventions and discusses the evidence supporting them Clear advice is given in plain English to those wondering if these interventions will be helpful Vision Reading Difficulties and Visual Stress 2nd Edition draws together disparate research findings in a range of neurological disorders where vision is compromised by cortical hyperexcitability Optometrists orthoptists ophthalmologists educational psychologists teachers and vision scientists will find this book to be an interesting resource as well as students in these disciplines and parents of children who struggle with reading *Dyslexia: Problems of Reading Disabilities* Herman K. Goldberg, Gilbert B. Schiffman, 1972 **Reading Difficulties--their Diagnosis and Correction** Guy Loraine Bond, Miles Albert Tinker, Barbara B. Wasson, 1979 **Dyslexia and Hyperlexia** P. G. Aaron, 1989-03-31 Even though I had been studying reading problems in children for a number of years as a means of understanding cognitive processes I became deeply committed to the study of developmental dyslexia after my encounter with S H a dyslexic college student Until then dyslexia to me remained an interesting phenomenon but somewhat removed from the mainstream of my research interests

The facts that in spite of his superior IQ S H could read no better than a child in the fifth grade and misspelled even common words such as was and here however took me by surprise and made me appreciate the intriguing and challenging nature of developmental dyslexia This led to a series of studies of college students with reading disability a group that is relatively unexplored The general plan of these investigations was to study a small number of disabled readers at any given time rather intensively Even though this approach limits the generalizability of the research findings it lays bare some of the most interesting facts about dyslexia which are obscured in large scale statistical studies These studies have now extended well over a decade and are still continuing As soon as these studies were started it became obvious that not all reading disabled college students are alike and that disabled readers could be classified into three broad categories those with poor decoding skill those with poor comprehension ability and those with a combination of these two deficits **Can We Read Letters?**

Finn Egil Tønnessen, Per Henning Uppstad, 2015-02-27 In their new book Finn Egil Tønnessen and Per Henning Uppstad provide a set of theoretical and philosophical reflections on research in reading and dyslexia It is a pleasure to welcome this book which reflects the many contributions made by researchers at the National Centre for Reading Education and Research in Stavanger Norway Professor Usha Goswami University of Cambridge Careful reflection on the concepts and methods used is a prerequisite for further development in any field of research The authors think cognitive psychology has become too dominant in reading and dyslexia research arguing that it should be combined with behaviourism and connectionism in part by focusing on the concept of skill The key components of a skill are claimed to be automaticity awareness and shifts between them Reading is defined as an interpretative skill which should be viewed from the perspective of hermeneutics The authors use these fundamental analyses and definitions to shed new light on the balanced approach to reading instruction reading fluency and other key concepts The book also deals with problems in the definition of dyslexia and proposes a method to arrive at clear and fruitful definitions It concludes with a chapter trying to answer the question of in what sense or to what extent it can be claimed that reading and dyslexia research has made progress The book mainly builds on articles published over the past 25 years by Professor Finn Egil Tønnessen at the National Centre for Reading Education and Research Stavanger Norway
