Redesigning School Health Services:

Redesigning School Health Services Annette Lynch, 1983 *Redesigning the US Mental Health Care System* Sydney S. Harris, Stephen M. Strakowski, 2024 What is commonly referred to in the U S as the mental health care system is not really a system at all While excellent programs exist in every state in every community across America the system is actually a set of fragmented services provided inequitably by a haphazard array of specialty providers often with inadequate resources and only tenuously connected to health care systems for other health needs Crisis is too often the first point of contact for people experiencing a mental illness while year over year increases in rates of anxiety depression traumatic stress and death from suicide and overdose have led many to characterize the current situation as a pandemic or epidemic of mental illness constituting a national emergency For youth and young adults in late 2021 this emergency was formally recognized by the U S Surgeon General in the first Advisory ever issued regarding the nation s mental health **Expanding School Health Services to Serve Families in the 21st Century** Judith B. Igoe, Beverly P. Giordano, 1992 Redesigning the Clinical Effectiveness Research Paradigm Institute of Medicine, Roundtable on Value and Science-Driven Health Care, 2010-09-20 Recent scientific and technological advances have accelerated our understanding of the causes of disease development and progression and resulted in innovative treatments and therapies Ongoing work to elucidate the effects of individual genetic variation on patient outcomes suggests the rapid pace of discovery in the biomedical sciences will only accelerate However these advances belie an important and increasing shortfall between the expansion in therapy and treatment options and knowledge about how these interventions might be applied appropriately to individual patients The impressive gains made in Americans health over the past decades provide only a preview of what might be possible when data on treatment effects and patient outcomes are systematically captured and used to evaluate their effectiveness Needed for progress are advances as dramatic as those experienced in biomedicine in our approach to assessing clinical effectiveness In the emerging era of tailored treatments and rapidly evolving practice ensuring the translation of scientific discovery into improved health outcomes requires a new approach to clinical evaluation A paradigm that supports a continual learning process about what works best for individual patients will not only take advantage of the rigor of trials but also incorporate other methods that might bring insights relevant to clinical care and endeavor to match the right method to the question at hand The Institute of Medicine Roundtable on Value Science Driven Health Care s vision for a learning healthcare system in which evidence is applied and generated as a natural course of care is premised on the development of a research capacity that is structured to provide timely and accurate evidence relevant to the clinical decisions faced by patients and providers As part of the Roundtable s Learning Healthcare System series of workshops clinical researchers academics and policy makers gathered for the workshop Redesigning the Clinical Effectiveness Research Paradigm Innovation and Practice Based Approaches Participants explored cutting edge research designs and methods and discussed strategies for development of a research

Kuziemsky,Zoie Shui-Yee Wong,2017-08-15 Health informatics applications will be a cornerstone of the next generation healthcare delivery system These applications will support the delivery of safe patient centered care and collaborative care delivery The complexity of modern healthcare is delivered by many different specialties to many different patients with complex diseases and comorbidity A one size fits all approach is not adequate to reach the triple aim of improving the patient experience of care improving the health of populations and reducing the per capita cost of healthcare Health informatics applications must rather be built to be adaptable and sensitive to the complex contexts where they will be used The health informatics community has long been interested in the role that context plays in the design implementation and evaluation of Health IT We have come to realize that context is not just a passive characteristic that impacts Health IT usage but rather is embedded in the core of the users processes and outcomes that Health IT interacts with Therefore we need better approaches to study and understand its impact on Health IT usage in different healthcare settings This book contains the conference papers from CSHI 2017 Delivering 21st Century Healthcare Building a Quality and Efficiency Driven System It contains papers on a variety of topics that are divided into four sections Theoretical approaches to investigate context sensitive health informatics to generate robust evidence Redesigning healthcare work practices Patient participation in healthcare design and redesign and Human factors and usability The 2017 CSHI conference continues our efforts to develop robust scientific evidence on context and Health IT
