Rediscovering Confucianism A Major Philosophy Of Life In East Asia:

Rediscovering Confucianism Torbjörn Lodén, 2021-10-01 This book provides an outline and an appraisal of Confucianism as a system of ideas and beliefs that evolved during the past 3 millennia and continue to do so. Its roots are traced back to pre-Confucian times followed by a detailed examination of some 40 Confucian thinkers. It also describes the social context of evolution of Confucian thought.

The Politics of Peace Te-Li Lau, 2009-12-07 Although scholarship has noted the thematic importance of peace in Ephesians, few have examined its political character in a sustained manner throughout the entire letter. This book addresses this lacuna comparing Ephesians with Colossians, Greek political texts, Dio Chrysostom's Orations and the Confucian Four Books in order to ascertain the rhetorical and political nature of its topos of peace. Through comparison with analogous documents both within and without its cultural milieu, this study shows that Ephesians can be read as a politico-religious letter concerning peace within the church. Its vision of peace contains common political elements such as moral education, household management, communal stability, a universal humanity, and war that are subsumed under the controlling rubric of the unity and cosmic summing up of all things in Christ.

True Lies Worldwide Anders Cullhed, Lena Rydholm, 2014-05-21 People of all times and in all cultures have produced and consumed fiction in a variety of forms not only for entertainment but also to spread knowledge, religious or political beliefs. Furthermore, fiction has taken part in reflecting and shaping the cultural identity of communities as well as the identity of individuals. This volume aims to explore the concept and the use of fiction from different epochs in different cultures and in different forms, both ancient and more recent. It covers a broad field of interests from ancient literature, art, philosophy and theater to Bollywood productions, television series and modern electronic media. Twenty-three scholars from ten countries and from different areas and fields of interests in the Humanities assembled in Stockholm on a conference in August 2012 to exchange views on Fiction in Global Contexts. This volume presents the results of their discussions. It contains fresh perspectives on issues and topics such as the nature of fiction, fiction and its relationship to truth, the demand for and the function and uses of fiction, the development of fiction from ancient to modern times, different forms of fiction, fiction in social contexts or in a gender perspective.

It takes into account the potential influence of cultural and socio-economic variables and provides a differentiated global perspective. In its first part, the book gives an overview about the impact of CSR on employer attractiveness and explains the factors that potentially influence CSR preferences of young job seekers all over the world. In a second part, the research design is outlined and employer-related preferences of 4783 graduates and students coming from 22 countries across the globe are discussed. Politics, Culture and Self Geir Helgesen,Søren Risbjerg Thomsen,2006 Globalization may be undermining Kipling s assertion that East is East and West is West but arguably this is more in the realms of technological advances and consumer behaviour than say in political culture In the latter arena much is still made of the contrasts between Eastern culture characterized by collectivism and belief in authority and Western culture characterized by individualism and belief in democracy Such comfortable assumptions will be shattered for readers of

Politics Culture and Self This volume indeed confirms that differences between East Asia and northern Europe do exist Provocatively however it also points to major similarities e g regarding social harmony and the role of the family in society as well as significant contrasts mirrored within the two regions e g concerning interpersonal and institutional trust These results are of especial interest because of the care taken to reduce cultural contamination The data is derived from extensive and in depth surveys conducted by a crosscultural research team in East Asia and northern Europe Here methodological techniques were used to control for non cultural differences as well as cultural variation in how people respond to questionnaires This survey data is augmented by a wealth of historical and analytical contexts that will make the book an essential item in the library of anyone concerned with issues relating to political behaviour at all levels **The**
