*The Weakness of Civil Society in Post-Communist Europe* Marc Morjé Howard, 2003-03-27 Over a decade has passed since the collapse of communism yet post communist citizens are still far less likely to join voluntary organizations than people from other countries Why do post communist citizens mistrust public organizations What explains this pattern of weak civil society And what does this mean for democracy in the region This engaging study addresses these questions with a provocative argument about the enduring impact of the communist experience on its countries and citizens Howard argues that the experience of mandatory participation in state controlled organizations and vibrant private networks during the communist period combined with the disappointment with post communist developments have left most citizens with a lasting aversion to public activities Howard analyzes the findings from over 30 democratic countries on the World Values Survey and also presents extensive and original evidence from his own research focused on Eastern Germany and Russia

civil societies that failed to develop lasting democracies with civil societies that succeeded Much of the current literature on the connection between civil society and consolidating democracy focuses exclusively on single contemporary polities that are ever changing and uncertain By studying historical cases the authors are able to demonstrate which civil societies developed in tandem with lasting democracies and which did not Contrasting these two sets of cases the book both enlightens readers about individual countries and extracts lessons about the connections between civil society and democracy in contemporary times Above all the authors ask the vital but under researched question OHow and why does democratic civil society develop O

**Out of and Into Authoritarian Law** András Sajó,2002-12-01 The essays in this collection reflect on the promises hopes and fears dominant in the narratives on and realities of doing away with authoritarian regimes The experiences of post communist transition are matched with accounts on authoritarian traits present in established constitutional democracies and on authoritarian inclusions preserved in the new regimes in the post transition phase The essays combine first hand insider accounts with interdisciplinary scholarly analysis The first part of the collection focuses on considerations marking the way out of authoritarian not restricted to socialist regimes The second part centers around experiences and problems which surface following the days of totalitarianism both in newly emerged democracies and in well established constitutional systems Issues covered range from police practices to the role of the people in post authoritarian regimes The dilemma transparent in all essays is whether coming out of authoritarianism is possible at all
