Reflections on the Decline of Science in England Charles Babbage,1970 **Reflections on the Decline of Science in England, and on Some of Its Causes** Charles Babbage,1830 *Reflections on the Decline of Science in England, and on Some of Its Causes* Charles Babbage,2012-10-07 Charles Babbage FRS 26 December 1791 18 October 1871 was an English mathematician philosopher inventor and mechanical engineer who originated the concept of a programmable computer Considered a father of the computer Babbage is credited with inventing the first mechanical computer that eventually led to more complex designs Parts of his uncompleted mechanisms are on display in the London Science Museum In 1991 a perfectly functioning difference engine was constructed from Babbage s original plans Built to tolerances achievable in the 19th century the success of the finished engine indicated that Babbage s machine would have worked Nine years later the Science Museum completed the printer Babbage had designed for the difference engine wikipedia [Reflections on the Decline of Science in England](#) Charles Babbage, Gerard Moll,2014-02 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book *Reflections on the Decline of Science in England, and on Some of Its Causes* Charles Babbage, Charles,2021-11-13 **Reflections on the decline of science in England and on some of its causes** Charles Babbage Charles [Reflections on the Decline of Science in England](#) Charles Babbage,2017-02-06 Extract PREFACE Of the causes which have induced me to print this volume I have little to say my own opinion is that it will ultimately do some service to science and without that belief I would not have undertaken so thankless a task That it is too true not to make enemies is an opinion in which I concur with several of my friends although I should hope that what I have written will not give just reason for the permanence of such feelings On one point I shall speak decidedly it is not connected in any degree with the calculating machine on which I have been engaged the causes which have led to it have been long operating and would have produced this result whether I had ever speculated on that subject and whatever might have been the fate of my speculations If any one shall endeavour to account for the opinions stated in these pages by ascribing them to any imagined circumstance peculiar to myself I think he will be mistaken That science has long been neglected and declining in England is

not an opinion originating with me but is shared by many and has been expressed by higher authority than mine I shall offer a few notices on this subject which from their scattered position are unlikely to have met the reader's attention and which when combined with the facts I have detailed in subsequent pages will be admitted to deserve considerable attention The following extract from the article Chemistry in the Encyclopaedia Metropolitana is from the pen of a gentleman equally qualified by his extensive reading and from his acquaintance with foreign nations to form an opinion entitled to respect Differing from him widely as to the cause I may be permitted to cite him as high authority for the fact *Reflections on the Decline of Science in England* Charles Babbage, Gerard Moll, 2015-08-08 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant
