Caroline Sawyer, Brad K. Blitz

Refugees Race And The Concept Of Asylum In Britain:

The Discourse of Repatriation in Britain, 1845-2016 Daniel Renshaw, 2021-03-04 Examining responses to migration and settlement in Britain from the Irish Famine up to Brexit The Discourse of Repatriation looks at how concepts of removal evolved in this period and the varied protagonists who have articulated these ideas in different contexts Analysing the relationship between discourse and action Renshaw explores how ideas and language originating on the peripheries of debate on migration and belonging can permeate the mainstream and transform both discussion and policy The book sheds light both on how the migrant other has been viewed in Britain historically and contemporaneously and more broadly how the relationship between state press and populace has developed from the early Victorian period onwards It identifies key junctures where the concept of the removal of othered groups has crossed over from the rhetorical to the actual and considers why this was the case Based on extensive original archival research the book reassesses modern British history through the lens of the most polarised attitudes to immigration and demographic change This book will be of use to readers with an interest in migration diaspora the development of populism and political extremes and more broadly the history of modern Britain [The Evolution of Humanitarian Protection in European Law and Practice](#) Liv Feijen, 2021-04

Humanitarian protection has evolved from an act of charity into a legal obligation not to remove certain categories of non nationals **Race, Criminal Justice, and Migration Control** Mary Bosworth, Alpa Parmar, Yolanda Vázquez, 2018-01-12 The criminalization of migration is heavily patterned by race By placing race at the centre of its analysis this volume examines questions and explains the growing intersection between criminal justice and migration control Through the lens of race we see how criminal justice and migration enmesh in order to exclude stop and excise racialized citizens and non citizens from societies across the world within beyond and along borders Race and the meaning of race in relation to citizenship and belonging is excavated through the chapters presented in the book and the book as a whole thereby transforming the way we think about migration Neatly organized in four sections the book begins with chapters that present a conceptual analysis of race borders and social control moving to the institutions that make up and shape the criminal justice and migration complex The remaining chapters are convened around the key sites where criminal justice and migration control intersect policing courts and punishment Together the volume presents a critical and timely analysis of how race shapes and complicates mobility and how racism is enabled and reanimated when criminal justice and migration control coalesce [Refugees, Race and the Legal Concept of Asylum in Britain](#) Prakash Shah, 2000 This book critically interrogates the principle of asylum for refugees in UK law and proposes that when faced with the migration of non European refugee groups this principle has often been limited The book considers the response of the State to the migration of various groups of refugees through five centuries The reaction of the legal system to the arrival of gypsies and Huguenots from the Tudor period is analysed The responses to the arrival of African refugees from the American War of Independence is also

considered here along with an examination of the reactions to refugees from the French Revolution and the Napoleonic Wars various European refugee groups in the mid Victorian period Jews from Eastern Europe and later from Nazism and groups displaced in Europe as a result of the Second World War Refugees Race and the Legal Concept of Asylum in Britain also provides a detailed discussion of the backlash against African and Asian refugee groups in particular as against the East African Asians Vietnamese and Tamils from Sri Lanka An analysis of the major legislative reforms of the 1990s which have been directed against the settlement of Asian and African refugees is also presented The post Second World War period is scrutinised in the context of the failure of European human rights law and international norms of refugee protection to secure the principle of asylum and the implications of the development of a Fortress Europe that is premised on the tight control of non European migrants are drawn out

The Oxford Handbook of International Refugee Law Cathryn Costello, Michelle Foster, Jane McAdam, 2021-06-02 The Oxford Handbook of International Refugee Law is a comprehensive critical work which analyses the state of research across the refugee law regime as a whole Drawing together leading and emerging scholars the Handbook provides both doctrinal and theoretical analyses of international refugee law and practice It critiques existing law from a variety of normative positions with several chapters identifying foundational flaws that open up space for radical rethinking Many authors work directly in the field and their contributions demonstrate how scholarship and practice can mutually inform each other Contributions assess a wide range of international legal instruments relevant to refugee protection including from international human rights law international humanitarian law international migration law the law of the sea and international and transnational criminal law Geographically contributors examine regional and domestic laws and practices from around the world with 10 chapters focused on specific regions This Handbook provides an account as well as a critique of the status quo and in so doing it sets the agenda for future academic research in international refugee law

Britannia's Embrace Caroline Shaw, 2015-09-18 *Britannia's Embrace* revises current understandings about the origins of refuge which have focused exclusively on the period post 1914 It argues that the responsibility to protect persecuted foreigners developed in nineteenth century Britain through a popular movement that equated refugee relief with what it

meant to be liberal on a global stage The Refugee in International Law Guy S. Goodwin-Gill, Jane McAdam, 2007 Millions of people are forced to flee their homes as a result of various forms of persecution The instruments to secure international protection are the 1951 Convention Relating to the Status of Refugees and its 1967 Protocol This book examines challenges to the Convention **Bordering Britain** Nadine El-Enany, 2020-02-11 Bordering Britain argues that Britain is the spoils of empire its immigration law is colonial violence and irregular immigration is anti colonial resistance In announcing itself as postcolonial through immigration and nationality laws passed in the 60s 70s and 80s Britain cut itself off symbolically and physically from its colonies and the Commonwealth taking with it what it had plundered This imperial vanishing act cast Britain's colonial history into the shadows The British Empire about which Britons know little can be remembered fondly as a moment of past glory as a gift once given to the world Meanwhile immigration laws are justified on the basis that they keep the undeserving hordes out In fact immigration laws are acts of colonial seizure and violence They obstruct the vast majority of racialised people from accessing colonial wealth amassed in the course of colonial conquest Regardless of what the law media and political discourse dictate people with personal ancestral or geographical links to colonialism or those existing under the weight of its legacy of race and racism have every right to come to Britain and take back what is theirs

Statelessness in the European Union Caroline Sawyer, Brad K. Blitz, 2011-02-10 Statelessness in the European Union draws together original research from over one hundred interviews in Estonia France Slovenia and the United Kingdom to provide one of the first comparative accounts of the de facto or de jure stateless populations in the European Union It blends legal political and empirical research to examine how non citizens without secure status in some cases established undocumented migrants and their descendants manage their lives in four European Union member states Normative and legal analyses of the practical meaning of basic human rights are combined with a groundbreaking investigation of the obstacles that prevent people from accessing essential services Contrasting the situation of Europe's stateless now with that examined by Arendt over fifty years ago it considers proposals for the future security of Europe's stateless people
