

2. With the boat positioned bow/front facing into the wind, connect the sail to the boom by locating the clew hook into the clew outhaul eyelet at the aft/rear lower corner of the sail.
3. Tension the clew out haul line to the desired amount and secure it in the cleat on the mid upper surface of the boom.

TOP TIP: The correct outhaul tension for normal conditions would leave the foot/lower edge of the sail 100mm (a hands width) from the boom when the sail is filled.

7. Rigging the Mainsheet

1. Join the large traveller block to the small traveller block using their integral sister clips.
2. When standing on the starboard/right hand side of the hull:
 - a. Tie a figure of eight stopper knot in one end of the mainsheet before threading the other end through the becket of the booms aft/rear mainsheet block in a bow to stern direction,

- b. Thread the loose end downwards, passing around the large traveller block in a bow to stern direction.
 - c. Thread the loose end upwards passing it around the mainsheet block on the lower aft/rear end of the boom travelling in a stern to bow direction.
 - d. Thread the loose end forward through the webbing sling immediately above the helm's cockpit area.

TOP TIP: This prevents the rope from sagging and getting tangled up around the helmsman during tacks and jibes!

- e. Thread the loose end through the remaining mainsheet block positioned on the lower mid-section of the boom travelling in a stern to bow direction.
 - f. Thread the loose end through the mainsheet ratchet block situated at the aft/rear end of the daggerboard case in the middle of the boats cockpit.

TOP TIP: Take care to ensure the mainsheet passes through the ratchet block so it free-wheels when sheeting in but locks when sheeting out. (There is also a ratchet on/off switch, on the side of the block)

3. Finally tie the end of the mainsheet through the webbing loop at the aft/rear end of the rear centre toe strap using a half hitch with a secondary overhand knot in the very end of the rope to prevent the half hitch coming undone.

TOP TIP: This eliminates twisting, knotting and potential unthreading of the mainsheet when in use.
