Satellites In Outer Space:

Satellites in Outer Space Isaac Asimov, 1960 A simple account of satellites from Sputnik to Apollo *The Urgent Need for Regulation of Satellite Mega-constellations in Outer Space* Scott Millwood, 2023-02-21 This book calls for the urgent regulation of satellite mega constellations in outer space proposing a new model of international regulatory coordination in order to ensure the sustainable balance of science and advanced telecommunications We are currently witnessing expansion of the Internet off our planet The proliferation of new space based internet connectivity has been accompanied by much discussion about the potential impact on astronomy Scientists are increasingly concerned that mega constellations proposed by SpaceX OneWeb Amazon and Facebook might wreak havoc on scientific research and transform our view of the stars These commercial operators plan to launch hundreds of thousands of satellites into Low Earth Orbit LEO in the coming decade representing a 1000% increase on objects currently in orbit This book examines this new space race in the context of historical rivalries for it is clear that mega constellations are being actively pursued by a US administration determined to dominate LEO as tensions with China rise This creates a risk of interference with earth based scientific activities that use optical and radio frequency techniques to study the universe This book examines these developments in the context of the Outer Space Treaty OST which provides all States with the freedom of scientific investigation exploration and use of outer space while balancing this with obligations to avoid interference with the space activities of other States It draws upon interviews with some of Europe's leading astronomers in order to highlight the extent to which the issue will require legal and regulatory reform of mega constellation licensing processes to ensure the integrity of astronomical science is preserved The race to dominate LEO also comes at a time when the monopolistic power of Facebook Amazon and other TechGiants is under renewed scrutiny in western democracies The author argues that a new governance framework for launch and operational licenses is urgently required in which impact risk assessments scale and proportionality and stakeholder consultation processes should play important roles It is now vital that the astronomical community whose skill set does not generally involve leading regulatory strategies engage with those who can support its leadership in exerting a renewed influence The diplomacy of science which played a vital role during the Cold War and the establishment of global commons must be reinvigorated for the New Space era It is now vital that the astronomical community whose skill set does not generally involve leading regulatory strategies engage with those who can support its leadership in exerting a renewed influence The diplomacy of science which played a vital role during the Cold War and the establishment of global commons must be reinvigorated for the New Space era It is now vital that the astronomical community whose skill set does not generally involve leading regulatory strategies engage with those who can support its leadership in exerting a renewed influence The diplomacy of science which played a vital role during the Cold War and the establishment of global commons must be reinvigorated for the New Space era It is now vital that the astronomical community whose skill set does not

Outer Space - Battlefield of the Future? Sipri, 2021-01-26 This book first published in 1978 examines the military use of space around 60 per cent of US and Soviet satellites were military ones The satellites were for military communications weather prediction navigation photographic and electronic reconnaissance targeting early warning and satellites capable of destroying enemy satellites This book analyses the capabilities of military satellites as part of the debate around the encroachment of military technology and purposes into space *Proceedings of the Conference on the Law of Space and of Satellite Communications*, 1964 Space law and communications satellites free space lower boundary control of space orbital regulation and international cooperation **Outer Space - A New Dimension of the Arms Race** Bhupendra

Jasani, 2021-01-26 This book first published in 1982 analyses the prospects of the Cold War superpowers arms race spilling into outer space A SIPRI organized symposium in 1981 discussed the consequences of the militarization of outer space as well as further arms control and disarmament measures This book presents the findings of 20 eminent scientists lawyers and diplomats from 12 different countries **Commercial and Military Uses of Outer Space** Melissa de Zwart, Stacey

Henderson, 2021-02-25 This edited book brings together a diverse range of chapters on space related topics The authors included in this book are drawn from Australia and overseas from academia government industry civil society and the military This book contains chapters that cover topics such as law science archaeology defence policy and more all with a focus on space This edited collection is a timely international and interdisciplinary book which addresses some of the contemporary issues facing activities in space and those attempting to understand use and regulate the space domain This edited book seeks to normalise the role of women as experts in the space sector by not calling attention to the fact that all the authors are women they are all experts in their respective fields who just happen to be women Bringing together these contributions in this book in turn promotes the inclusion of diversity in the space sector This edited collection is an opportunity to influence the development of the space industry in terms of gender diversity and diversity of disciplines and thinking while it is in its formative stage rather than trying to redress imbalances once they are entrenched in the industry

The ^AOxford Handbook of Space Security P.J. Blount, 2023-09-01 The Oxford Handbook of Space Security focuses on the interaction between space technology and international and national security processes Saadia M Pekkanen and P J Blount have gathered a group of key scholars who bring a range of analytical and theoretical perspectives to take an analytically eclectic approach to assessing space security from an international relations IR theory perspective Bringing together scholarship from a group of leading experts this volume explains how these contemporary changes will affect future security in from and through space
