Rehabilitating Literary Theory Khaled Besbes, 2011 The present work seeks to bring literary theory in line with the most recent practical turn the humanities are witnessing When simplified succinctly presented and skillfully used in multi coded interpretation within a semiocritical framework literary theories become practical exercises in criticism not only facilitating the interpretation of literature but also making it more enjoyable and more rewarding This book is different from its counterparts in the sense that it includes an exceptionally expanded model of the practice of literary theories and replaces long and theoretical discussions with brief synopses of the examined theories It relies on less overused texts for illustration as it compiles and organizes the terms and phrases that are often used by the proponents of the discussed theories The most influential literary theories that have so far been developed in academia are included the New Criticism reader response criticism structuralism deconstruction feminism Marxism psychoanalytic criticism linguistic criticism cultural materialism new historicism postcolonialism and semiotics Through eliminating the excesses made in the name of theory this book will restore the faith of students teachers and practitioners in the useful and enduring nature of literary theory for the analysis

and appreciation of literature *The Saving Lie* Agata Bielik-Robson, 2011-03-30 Hailed as our era's most profound theorist of literary influence Harold Bloom's own influence on the landscape of literary criticism has been decisive His wide ranging critical writings have plumbed the depths of Romanticism explored the anxiety caused by the influence of one generation of poets on another wrestled with the idea of a literary canon and examined the relationship between religion and literature

Quests of Difference George Douglas Atkins, 2021-11-21 In this eminently readable book G Douglas Atkins continues the efforts undertaken in *Reading Deconstruction* *Deconstructive Reading* to open eighteenth century texts to the insights of recent critical theory Through close readings of most of Pope's major poems Atkins demonstrates how the powerful theoretical movement known as deconstruction enriches challenges and significantly modifies our understanding of the work of the greatest poet of the eighteenth century The first full scale deconstructive study of Augustan poetry *Quests of Difference* at once offers a fresh and compelling reading of Pope and makes an important contribution to constructive criticism Though it will be of particular interest and importance to specialists in both eighteenth century studies and criticism and theory *Quests of Difference* is written with the general reader in mind All readers will appreciate the intelligence and balance of Atkin's approach as well as the clarity informality and grace that distinguish his writing **Voice**

Terminal Echo (Routledge Revivals) Jonathan Goldberg, 2014-10-10 First published in 1986 this title examines a set of English Renaissance texts by Shakespeare Spenser Herbert Marvell and Milton within the theoretic framework of postmodern thought Following an opening chapter that argues for the value of this conjunction as a way of understanding literary history subsequent chapters draw upon Jacques Derrida's deconstruction of photocentrism and Jacques Lacan's analysis of the agency of the letter to offer fully theorized readings Throughout there is a sustained concern with the transformations of such Ovidian figures as Narcissus and Echo Perseus and Medusa Orpheus and Eurydice and with the echo effects of Virgilian pastoral as paradigms for the interplay of voice and writing Jonathan Swift Nigel Wood, 2014-06-11 This collection of critical thinking situates the satire of Jonathan Swift within both its eighteenth century contexts and our modern anxieties about personal identity and communication Augustan satire at its most provocative is not simply concerned with the public matters of politics or religion but also offers a precise medium in which to express the paradox of ironic detachment amidst deep conviction The critics chosen for this volume demonstrate the complexity of Swift's work Its four sections explore matters of authorial identity the relation between Swift's writing and its historical context the full range of his comments on gender and his deployment of metaphor and irony to engage the reader Swift has often been regarded as a writer who anticipated many twentieth century cultural preoccupations and this volume provides an opportunity to test just how modern he actually was It also provides an answer to those who would wish to simplify his writing as that of Tory and misogynist The theoretical perspectives of the contributors are lucidly explained and their critical terms located in the wider contexts of contemporary theory in the introduction and headnotes The volume places Swift historically within the

philosophical and religious traditions of eighteenth century thought **Profiles in Contemporary Social Theory** Anthony Elliott, Bryan S Turner, 2001-05-18 This comprehensive book provides an indispensable introduction to the most significant figures in contemporary social theory Grounded strongly in the European tradition the profiles include Michel Foucault Jürgen Habermas Roland Barthes Jean Baudrillard Pierre Bourdieu Zygmunt Bauman Martin Heidegger Fredric Jameson Richard Rorty Nancy Chodorow Anthony Giddens Stuart Hall Luce Irigaray and Donna Haraway In guiding students through the key figures in an accessible and authoritative fashion the book provides detailed accounts of the development of the work of major social theorists and charts the relationship between different traditions of social cultural and political thought Profiles in Contemporary Social Theory will become a major reference work in the field of social theory because it offers in depth commentaries that comprehensively examine the contents contexts and critical evaluation of key theorists of the day

Reading and Responsibility Derek Attridge, 2011-09-14 Newly available in paperback this book traces a close engagement with Derrida's writing over two decades examining the relationship between deconstruction literature and ethics **Handbook of Phenomenological Aesthetics** Hans Rainer Sepp, Lester Embree, 2010-03-11 Historically phenomenology began in Edmund Husserl's theory of mathematics and logic went on to focus for him on transcendental philosophy and for others on metaphysics philosophical anthropology and theory of interpretation The continuing focus has thus been on knowledge and being But if one began without those interests and with an understanding of the phenomenological style of approach one might well see that art and aesthetics make up the most natural field to be approached phenomenologically Contributions to this field have continually been made in the phenomenological tradition from very early on but so to speak along the side The situation has been similar with phenomenological ethics A great deal of thought about art and aesthetics has nevertheless accumulated during a century and a handbook like the present one is long overdue The project of this handbook began in conversations over dinner in Sepp's apartment in Baden Baden at one evening of the hot European summer in the year 2003 As things worked out he knew more about whom to ask and how much space to allocate to each entry and Embree knew more about how to conduct the inviting preliminary editing and prodding of contributors who were late returning their criticized drafts and copyedited entries and was able to invest the time and other resources from his endowed chair That process took longer than anticipated and there were additional unfortunate delays due to factors beyond the editors's control
