Sexual Personae Camille Paglia, 1990-09-10 In this brilliantly original book Camille Paglia identifies some of the major patterns that have endured in western culture from ancient Egypt and Greece to the present According to Paglia one source of continuity is paganism which undefeated by Judeo Christianity continues to flourish in art eroticism astrology and pop culture Others she says are androgyny sadism and the aggressive western eye which has created our art and cinema Paglia follows these and other themes from Nefertiti and the Venus of Willendorf to Apollo and Dionysus from Botticelli and Michaelangelo to Shakespeare and Blake and finally to Emily Dickinson who along with other major nineteenth century authors becomes a remarkable example of Romanticism turned into Decadence Paglia offers provocative views of literature art history psychology and religion She focuses for example on the amorality voyeurism and pornography in great art that have been ignored or glossed over by most critics She discusses sex and nature as brutal daemonic forces and she criticizes feminists for sentimentality or wishful thinking about the causes of rape violence and poor relations between the sexes She stressed the biologic basis of sex differences and sees the mother as an overwhelming force who condemns men to lifelong sexual anxiety from which they escape through rationalism and physical achievement She examines the culture and style of modern male homosexuals She demonstrates how much of western life art and thought is ruled by personality which she traces through recurrent types or personae such as the female vampire Medusa Lauren Bacall the pythoness the Delphic oracle Gracie Allen the beautiful boy Hadrian s Antinous Dorian Gray the epicene man of beauty Lord Byron Elvis Presley and the male heroine Baudelaire Woody Allen Her book will stimulate and awe readers everywhere **Rise of William Blake**

Imagination and Science in Romanticism Richard C. Sha, 2018-08-01 How did the idea of the imagination impact Romantic literature and science 2018 Winner Jean Pierre Barricelli Book Prize The International Conference on Romanticism Richard C Sha argues that scientific understandings of the imagination indelibly shaped literary Romanticism Challenging

the idea that the imagination found a home only on the side of the literary as a mental vehicle for transcending the worldly materials of the sciences Sha shows how imagination helped to operationalize both scientific and literary discovery Essentially the imagination forced writers to consider the difference between what was possible and impossible while thinking about how that difference could be known Sha examines how the imagination functioned within physics and chemistry in Percy Bysshe Shelley's Prometheus Unbound neurology in Blake's Vala or The Four Zoas physiology in Coleridge's Biographia Literaria and obstetrics and embryology in Mary Shelley's Frankenstein He also demonstrates how the imagination was called upon to do aesthetic and scientific work using primary examples taken from the work of scientists and philosophers Davy Dalton Faraday Priestley Kant Mary Somerville Oersted Marcet Smellie Swedenborg Blumenbach Buffon Erasmus Darwin and Von Baer among others Sha concludes that both fields benefited from thinking about how imagination could cooperate with reason but that this partnership was impossible unless imagination's penchant for fantasy could be contained

Henry Miller and Religion Thomas Nesbit, 2012-12-06 This study argues that this previously banned author devoted his entire life to articulating a religion of self liberation in his autobiographical books examining his life and work within the context of fringe religious movements that were linked with the avant garde in New York City and Paris at the first of the 20th century This study shows how these transatlantic movements including Gurdjieff Rosicrucianism and Theosophy gave him the hermeneutical devices not to mention the creative license to interpret texts and symbols from mainline religions in an iconoclastic manner ranging from obscure Taoist treatises to the mystical works of Jacob Boehme The influence of numerous philosophical sources widely circulated in his most critical years particularly Henri Bergson's Two Sources of Morality and Religion 1932 also helped him develop a religious view situated between transcendence and immanence in which self liberation through the channeled flow of *lan vital* is the chief objective Miller's knowledge of these intellectual currents along with his involvement with sidestream religious groups inspired him to meld his religious and literary aims into one perplexing project
