Broken Boundaries - Stories of Betrayal in Relationships of Care Sarah Richardson, Melanie Cunningham, 2008-05-13 A fascinating story of the Caribbean Island of Redonda The reader is left to determine what is Myth Legend Fiction or Fact At times the story is highly amusing as King Leo draws his own conclusions about his Kingdom

Politically Reflective Psychotherapy Manuel Llorens, 2020-10-27 This book shows how clinical psychology has been deliberately used to label control and oppress political dissidence under oppressive regimes and presents an epistemological and theoretical framework to help psychologists deal with the political dilemmas that surround clinical practice Based on his own experience working as a clinical and community psychologist in Venezuela for almost twenty five years the author recounts the controversial history of how the Bolivarian Revolution has used psychology to persecute and oppress political dissidents recovers the experience of doing psychotherapy under oppressive regimes in other countries and stresses the importance of developing an ethically and politically aware clinical practice The first part of the book presents the dilemmas psychotherapists have faced in different parts of the world such as the former Soviet Union USA China Spain Hungary Argentina Brazil Uruguay and Venezuela when dealing with the intrusion of the political domain in clinical research and practice and the difficulties clinicians have had in dealing with these issues The second part of the book presents an epistemological and theoretical framework from which these issues may be tackled effectively The book helps raise awareness of the risks of framing psychotherapy as apolitical as well as the benefits of thinking of our lives as contextualized in our political settings It draws from several theoretical options that have been useful to challenge traditional clinical theory and include the political in our clinical comprehensions In particular Latin American Community Psychology that has developed tools to favor awareness of political issues has been used to expand the psychotherapeutic conversation Politically Reflective Psychotherapy Towards a Contextualized Approach will help clinical psychologists psychiatrists and

other social and mental health workers reflect on the challenges psychotherapy faces in a politically polarized society showing how the political dimension can be incorporated into clinical practice *Boundary Issues and Dual Relationships in the Human Services* Frederic G. Reamer, 2020-11-24 Should a therapist disclose personal information to a client accept a client's gift or provide a former client with a job Is it appropriate to exchange e-mail or text messages with clients or correspond with them on social networking websites Some acts such as initiating a sexual relationship with a client are clearly prohibited yet what about more subtle interactions such as hugging or accepting invitations to a social event Is maintaining a friendship with a former client or a client's relative a conflict of interest Frederic G Reamer offers a frank analysis of a range of boundary issues that human service practitioners may confront He confronts the ethics of intimate relationships with clients and former clients the healthy parameters of practitioners self disclosure the giving and receiving of gifts and favors and the unavoidable and unanticipated circumstances of social encounters and geographical proximity With case studies addressing challenges in the mental health field school contexts child welfare addiction programs home health care elder services and prison rural and military settings Reamer offers effective practical risk management models that prevent problems and help balance dual relationships Since the publication of the previous edition of *Boundary Issues and Dual Relationships in the Human Services* in 2012 digital technology has transformed how human service professionals deliver services to clients This third edition brings the book up to date adding discussion of the ways in which practitioners online communications and technology based relationships with clients can violate ethical standards and providing practical advice for how to resolve boundary issues **Counseling Addicted Families** Gerald A. Juhnke, W. Bryce

Hagedorn, 2013-08-16 Although one person's addiction almost inevitably affects his or her family members a surprising number of treatment models appear to operate under the assumption that an individual's addiction occurs in a vacuum By not paying sufficient attention to preexisting family dynamics whether dysfunctional supportive or somewhere in between counselors run the risk of not fully understanding the roots of an individual's addictions or the obstacles to his recovery as a result counselors may undermine their own treatment efforts both by neglecting any underlying family problems and by failing to capitalize upon a family's potential assistance in an intervention with the addicted individual In *Counseling Addicted Families* Gerald A Juhnke and William Bryce Hagedorn address this problem head on Recognizing that even those treatment providers who understand the importance of the familial context of addiction are often stymied by the variety of family treatment theories and their often imperfect fit for cases of addiction Juhnke and Hagedorn provide a truly integrated model for assessment and treatment Based upon the authors combined 23 years of experience in clinical and treatment supervision the Integrated Family Addictions Model consists of six progressive treatment tiers which organize the relevant family treatment theories into a graduated and coherent sequence beginning with the briefest and least costly forms of therapy If one of the lower tiers allows clients to reach their treatment goals the patient and therapist need not waste time

and resources following the full continuum. If however their needs are still unmet they can progress in a logical fashion to more advanced and intensive forms of therapy. The book is divided into three broad topic areas designed to provide counselors and graduate students with essential information both about addictions and about the practical applications of various treatment theories. Part One discusses the prevalence of addictions, their negative impact upon families, and the primary existing addiction treatment models including their limitations and benefits. Part Two outlines methods of assessment for individual cases, and Part Three presents the Integrated Family Addictions Model in detail. Along the way, the authors deal with specific interventions for families dealing with violence and dual diagnosis. The book concludes with an epilogue on professional training which includes an overview of the major professional addiction and marriage and family counseling organizations and the ways in which they might benefit individual practices and practitioners.

The Body and Consent in Psychology, Psychiatry, and Medicine Jemma Tosh, 2019-11-27. This groundbreaking text interrogates the constructed boundary between therapy and violence by examining therapeutic practice and discourse through the lens of a psychologist and a survivor of sexual abuse. It asks what happens when those we approach for help cause further harm. Can we identify coercive practices and stop sexual abuse in psychology, psychiatry, and medicine? Tosh explores these questions and more to illustrate that many of the therapies considered fundamental to clinical practice are deeply problematic when issues of consent and sexual abuse are considered. The book examines a range of situations where medical power and authority produces a context where the refusals and non-consent of oppressed groups are denied, dismissed, or ignored, arguing that key concepts and discourses have resulted in the production and standardisation of a therapeutic rape culture in the helping professions. Tosh uses critical intersectionality theory and discourse analysis to expertly highlight the complex interrelationships between race, class, gender, sexuality, and disability in our understanding of abuse and how we define survivors. Drawing on a wide range of comprehensive examples including experiences and perspectives from cisgender and transgender men and women, as well as nonbinary and intersex people, this is essential reading for students and researchers of critical and queer psychology, gender studies, as well as mental health practitioners and social workers.

Women, Madness and the Law Wendy Chan, Dorothy E. Chunn, Robert Menzies, 2012-10-12. This book explores for the first time in an edited collection the intersection of three key research areas: women, madness, and the law, and advances the debates on how law and the psy-sciences play a critical role in regulating and controlling women's lives.

Women Unsilenced Jeanne Sarson, Linda MacDonald, 2021-08-31. *Women Unsilenced* explores the impact of unthinkable violence committed against women and girls through multiple perspectives. Women's recall of life-threatening ordeals of torture, human trafficking, and organized crime; society's failure to recognize and address such crimes; and close examinations of how justice, health, political, and social systems perpetuate revictimizing trauma. Written by retired public health nurses who include their own experiences, helped give voice and understanding to women who have been silenced. This book discloses their underground

caring work and offers kitchen table research and insights using women's storytelling on multiple platforms to educate readers on the unimaginable layers of perpetrators modus operandi of violence manipulation and deceit At times raw painful and shocking this book is an important resource for those who have survived such crimes professionals who support those victimized by torturers and traffickers police legal professionals criminologists human rights activists and educators alike It reveals how healing and claiming one's relationship with to for Self is possible Canadian Books in Print.
