Sexual Stratification Alice Schlegel, 1977 The assumption of universal male dominance is called into question in Sexual Stratification which presents empirical evidence for its absence These fourteen original papers plus an introduction and overview by the author are case studies that include societies where male dominance predominates such as Sicily through societies in which dominance is qualified such as Yuruba to more egalitarian societies such as the Bontoc and the Israeli kibbutz Stratification is examined empirically in both traditional and modern societies and theoretically in terms of power and autonomy in economic and social structures In addition an assessment is made of the role ideology plays in establishing norms for sex roles and statuses Jacket

Women Traders in Cross-Cultural Perspective Linda J. Seligmann, 2002-03-01 This innovative volume studies women as economic political and cultural mediators of space gender value and language in informal markets Drawing on diverse methodologies multisited fieldwork linguistic analysis and archival research the contributors demonstrate how women move between and knit together household and marketplace activities This knitting together pivots on how household practices and economies are translated and transferred to the market as well as how market practices and economic principles become integral to the nature and construction of the

household Exploring the cultural identities and economic practices of women traders in ten diverse locales Bolivia Ghana Hungary India Indonesia Mexico Morocco Nicaragua Peru and the Philippines the authors pay special attention to the effects of global forces national economic policies and nongovernmental organizations on women s participation in the market and the domestic sector The authors also consider the impact that women s economic and political activities in social movements public protests and more hidden kinds of subversive behavior have on state policy on the attitudes of different sectors of society toward female traders and on the dynamics of the market itself A final theme focuses on the cultural dimension of mediation Many women traders straddle cultural spheres and move back and forth between them Does this affect their participation in the market and their identities How do ties of ethnicity or acts of reciprocity affect the nature of commodity exchanges Do they create exchanges that are neither purely commodified nor wholly without calculation Or is it more often the case that ethnic commonalities and reciprocity merely mask the commodification of social and economic exchanges Does this straddling lead to the emergence of new kinds of hybrid identities and practices In considering these questions the authors specify the ways in which consumers contribute to identity formation among market women

Sex, Power, Conflict : Evolutionary and Feminist Perspectives Ann Arbor David M. Buss Professor of Psychology University of Michigan,Los Angeles Neil Malamuth Professor of Communication and Psychology and Chair of the Department of Communication and Speech University of California,1996-03-21 Sexual harassment in the workplace date rape and domestic violence dominate the headlines and have recently sparked scholarly debates about the nature of the sexes Concurrently the scientific community is conducting research in topics of sex and gender issues Indeed more research is being done on the topics of sexual conflict and coercion than at any other time in the history of the social sciences Despite this attention it is clear that these issues are being addressed from two essentially different perspectives one is labeled feminist while the other viewed as antithetical to the feminist movement is called evolutionary psychology which emphasizes the history of reproductive strategies in understanding conflict between the sexes This book brings together leading experts from both sides of the debate in order to discover how each could offer insights lacking in the other The editors overall goal is to show how the feminist and evolutionary approaches are complementary despite their evident differences then provide an integration and synthesis In fact several of the contributors to this unique volume consider themselves advocates of both approaches As a stimulating presentation of the dynamics of sex power and conflict and a pioneering rapprochement of the diverse tendencies within the scientific community this book will attract a wide audience in both psychology and women studies fields

Readings in Gender in Africa Andrea Cornwall,International African Institute,2005-02-14 *Readings in Gender in Africa* collects the most important critical and theoretical writings on how gender issues have transformed contemporary views of Africa Scholarship from North America Europe and Africa is represented in this comprehensive

volume A synthetic introduction by Andrea Cornwall discusses efforts to include women in research about Africa The volume not only shows how gender relations have been constructed on the African continent but reflects the changes in approach and inquiry that have been brought about as scholars consider gender identities and difference in their work Specific themes covered here include the contestation and representation of gender femininity and masculinity livelihoods and lifeways gender and religion gender and culture and gender and governance Readers from across the landscape of African studies will find this an essential sourcebook Published in association with the International African Institute London *Gender in Archaeology* Sarah M. Nelson, 2004 *Gender in Archaeology* provides a feminist theoretical synthesis of the flood of archaeological work on gender The author examines the roles of women men in areas as human origins the sexual division of labour kinship other social formations *Women in the Hebrew Bible* Alice Bach, 2013-10-31 *Women in the Hebrew Bible* presents the first one volume overview covering the interpretation of women's place in man's world within the Hebrew Bible or Old Testament Written by the major scholars in the field of biblical studies and literary theory these essays examine attitudes toward women and their status in ancient Near Eastern societies focusing on the Israelite society portrayed by the Hebrew Bible *Spirited Women* Joanne C. Watkins, 1996 In the Himalayan highlands of northern Nepal the small group of Tibetan Buddhists known as the Nyeshangte have maintained a gender egalitarian social organization over many years Nyeshangte women own land control household money and have the right to initiate divorce Most important they participate equally with men in central social institutions international trade and Buddhist ritual practice *Spirited Women* explores how the traditional culture of the Nyeshangte has confronted the changes brought about by modernization and the transition to a market economy as the community has experienced a diaspora extending from the Himalayan highlands to such urban areas as Kathmandu Singapore and Hong Kong *Rethinking Women's Roles* Denise O'Brien, Sharon W. Tiffany, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1984 *The Woman That Never Evolved* Sarah Blaffer Hrdy, 2009-07-01 What does it mean to be female Sarah Blaffer Hrdy a sociobiologist and a feminist believes that evolutionary biology can provide some surprising answers Surprising to those feminists who mistakenly think that biology can only work against women And surprising to those biologists who incorrectly believe that natural selection operates only on males In *The Woman That Never Evolved* we are introduced to our nearest female relatives competitive independent sexually assertive primates who have every bit as much at stake in the evolutionary game as their male counterparts do These females compete among themselves for rank and resources but will bond together for mutual defense They risk their lives to protect their young yet consort with the very male who murdered their offspring when successful reproduction depends upon it They tolerate other breeding females if

food is plentiful but chase them away when monogamy is the optimal strategy When promiscuity is an advantage female primates like their human cousins exhibit a sexual appetite that ensures a range of breeding partners From case after case we are led to the conclusion that the sexually passive noncompetitive all nurturing woman of prevailing myth never could have evolved within the primate order Yet males are almost universally dominant over females in primate species and Homo sapiens is no exception As we see from this book women are in some ways the most oppressed of all female primates Sarah Blaffer Hrdy is convinced that to redress sexual inequality in human societies we must first understand its evolutionary origins We cannot travel back in time to meet our own remote ancestors but we can study those surrogates we have the other living primates If women and not biology are to control their own destiny they must understand the past and as this book shows us the biological legacy they have inherited

War and Gender Joshua S. Goldstein, 2003-07-17 Gender roles are nowhere more prominent than in war Yet contentious debates and the scattering of scholarship across academic disciplines have obscured understanding of how gender affects war and vice versa In this authoritative and lively review of our state of knowledge Joshua Goldstein assesses the possible explanations for the near total exclusion of women from combat forces through history and across cultures Topics covered include the history of women who did fight and fought well the complex role of testosterone in men's social behaviours and the construction of masculinity and femininity in the shadow of war Goldstein concludes that killing in war does not come naturally for either gender and that gender norms often shape men women and children to the needs of the war system Illustrated with photographs drawings and graphics and drawing from scholarship spanning six academic disciplines this book provides a unique study of a fascinating issue
