**HIV/AIDS in South Africa 25 Years On**  
Poul Rohleder, Leslie Swartz, Seth C. Kalichman, Leickness Chisamu Simbayi, 2009-09-01  
Much has happened since the first appearance of AIDS in 1981; it has been identified, studied, and occasionally denied. The virus has shifted host populations and spread globally. Medicine, the social sciences, and world governments have joined forces to combat and prevent the disease. And South Africa has emerged as ground zero for the pandemic. The editors of *HIV/AIDS in South Africa 25 Years On* present the South African crisis as a template for addressing the myriad issues surrounding the epidemic worldwide, as the book brings together a widely scattered body of literature, analyzes psychosocial and sexual aspects contributing to HIV transmission and prevention, and delves into complex intersections of race, gender, class, and politics. Including largely overlooked populations and issues (e.g., prisoners, persons with disabilities, stigma) as well as challenges shaping future research and policy, the contributors approach their topics with rare depth, meticulous research, carefully drawn conclusions, and profound compassion. Among the topics covered: The relationship between HIV and poverty, starting from the question, Which is the determinant and which is the consequence? Epidemiology of HIV among women and men, concepts of femininity and masculinity, and gender inequities as they affect HIV risk; gender-specific prevention and intervention strategies; The impact of AIDS on infants and young children; risk and protective factors; care of children by HIV-positive mothers; HIV-infected children; Current prevention and treatment projects, including local-level responses, community-based work, and VCT; voluntary counseling and testing programs; New directions promoting circumcision, vaccine trials, positive prevention; South Africa's history of AIDS denialism. The urgent lessons in this book apply both globally and locally, making *HIV/AIDS in South Africa 25 Years On* uniquely instructive and useful for professionals working in HIV/AIDS and global public health.

**Childhood Sexuality and AIDS Education**  
Deevia Bhana, 2015-08-27  
Primary schoolchildren are frequently shielded from education on sexuality and sexually transmitted diseases in an effort to protect their innocence. In countries like South Africa, where AIDS is particularly widespread, it is especially important to address prevention with younger boys and girls as active social agents with the capacity to engage with AIDS as gendered and sexual beings. This volume addresses the question of children's understanding of AIDS, not simply in terms of their dependence but as active participants in the interpretation of their social worlds. The volume draws on an interview and ethnographic-based study of young children in two socially diverse South African primary schools, as well as interviews conducted with teachers and mothers of young children. It shows how adults sustain the production of childhood sexual innocence and the importance of scaling up

programs in AIDS intervention gender and sexuality It makes significant contributions to the global debate around childhood sexualities gender and AIDS education     The Global Victimization of Children Clayton A. Hartjen,S.

ethnography of teachers and children in grades 1 and 2 and presents arguments about why we should take gender and childhood sexuality seriously in the early years of South African primary schooling Taking issue with dominant discourses which assumes children s lack of agency the book questions the epistemological foundations of childhood discourses that produce innocence It examines the paradox between teachers dominant narratives of childhood innocence and children s own conceptualisation of gender and sexuality inside the classroom with peers in heterosexual games in the playground and through boyfriend girlfriend relationships It examines the nuances and finely situated experiences which draw attention to hegemonic masculinity and femininity where boys and girls challenge and contest relations of power The book focuses on the early makings of gender and sexual harassment and shows how violent gender relations are manifest even amongst very young boys and girls Attention is given to the interconnections with race class structural inequalities as well as the actions of boys and girls as navigate gender and sexuality at school The book argues that the early years of primary schooling are a key site for the production and reproduction of gender and sexuality Gender reform strategies are vital in this sector of schooling

refreshingly inclusive attitude aiming to motivate researchers to capture the nuanced practices of fathers in minority groups such as those who are homeless gay imprisoned raising a disabled child or from ethnically distinct backgrounds including Mexican and African American and indigenous fathers The volume includes chapters highlighting the unique challenges and possibilities of father involvement in their children s early years of development Contributing authors have integrated theories research policies and programs on father involvement so as to attract readers with diverse interest and expertise and material from selected countries in Asia Australia and Africa as well as North America evinces the international scope of their analysis Their often interdisciplinary analyses draw too on historical and cultural legacies even as they project a vision of the future in which fathers involvement in their young children s lives develops alongside the changing political economic and educational landscapes around the world

**Girls' Education in the Twenty-first Century** Mercy Tembon, Lucia Fort, 2008-01-01 Persuasive evidence

demonstrates that gender equality in education is central to economic development. Despite more than two decades of accumulated knowledge and evidence of what works in improving gender equality progress on the ground remains slow and uneven across countries. What is missing? Given that education is a critical path to accelerate progress toward gender equality and the empowerment of women, what is holding us back? These questions were discussed at the global symposium *Education: A Critical Path to Gender Equality and Women's Empowerment* which was sponsored by the World Bank in October 2007. *Girls Education in the 21st Century* is based on background papers developed for the symposium. The book's chapters reflect the current state of knowledge on education from a gender perspective and highlight the importance of and challenges to female education as well as the interdependence of education and development objectives. The last chapter presents five strategic directions for advancing gender equality in education and their implications for World Bank operations. *Girls Education in the 21st Century* will be of particular interest to researchers, educators, school administrators and policy makers at the global, national, regional and municipal levels.

*A Child's Mind Required!* Mary Lindner, 2010-08-18 As children grow up they discover taboo areas in their environment and in life. They are in need of advice to prevent them from placing themselves in risky situations. The primary preventive approach to a life skills programme on HIV/AIDS and sex education called *Child Mind Project* can be seen as such an initiative.

*South African Social Attitudes* Udesch Pillay, Benjamin Roberts, Stephen P. Rule, 2006 A country's attitudinal profile is as much a part of its social reality as are its demographic make up, its culture and its distinctive social patterns. It helps to provide a nuanced picture of a country's circumstances, its continuities and changes, its democratic health and how it feels to live there. It also helps to measure the country's progress towards the achievement of its economic, social and political goals based on the measurement of both objective and subjective realities. *South African Social Attitudes: Changing Times, Diverse Voices* is a new series aimed at providing an analysis of attitudes and values towards a wide range of social and political issues relevant to life in contemporary South African society. As the series develops we hope that readers will be able to draw meaningful comparisons with the findings of previous years and thus develop a richer picture and deeper appreciation of changing South African social values. This is the first volume in the series; it presents the public's responses during extensive nationwide interviews conducted by the HSRC in late 2003. The findings are analysed in three thematic sections: the first provides an in-depth examination of race, class and politics; the second gives a critical assessment of the public's perceptions of poverty, inequality and service delivery; and the last explores societal values such as partner violence and moral attitudes. *South African Social Attitudes* is essential reading for anyone seeking a guide to contemporary social or political issues and debates. It should prove an indispensable tool not only for government policy makers, social scientists and students but also for general readers wishing to gain a better understanding of their fellow citizens and themselves.
