Sexual Revolutions Gender And Labor At The Dawn Of Agriculture:

Sexual Revolutions Jane Peterson, 2002 The change from the hunting gathering lifestyle to one dependent upon farming constitutes a truly revolutionary event in the human career Most archaeologists agree that the way in which ancient people organized their work and family groups were crucial to the success of early attempts at farming This is a study of the historical sexual division of labour As a case study Jane Peterson chose the southern Levant of West Asia where the world's first farming societies emerged some 10 000 years ago Seeking to shatter long held assumptions about women's work that lead to generalizations about gender roles Peterson shows that gender studies can be both scientific and grounded in feminist theory

Sexual Revolutions Jane Peterson, 2002 The change from a hunting gathering lifestyle to one dependent upon farming constitutes a truly revolutionary event in the human career Most archaeologists agree that how ancient people organized their work and family groups was crucial to the success of early attempts at farming Yet little serious attention has been paid to the social organization of labor in the prehistoric past This book addresses that lacuna by investigating sexual divisions of labor As a case study Peterson chose the southern Levant of West Asia where the world's first farming societies emerged some 10 000 years ago Shattering long held assumptions about women's work that lead to generalizations about gender roles Peterson shows that gender studies can be both scientific and thoroughly grounded in feminist theory

The Social Archaeology of Funerary Remains Rebecca Gowland, Christopher Knusel, 2009-04-06 Human bones form the most direct link to understanding how people lived in the past who they were and where they came from The interpretative value of human skeletal remains within their burial context in terms of past social identity and organisation is awesome but was for many years underexploited by archaeologists The nineteen papers in this edited volume are an attempt to redress this by marrying the cultural aspects of burial with the anthropology of the deceased

Bioarchaeology Clark Spencer Larsen, 2015-03-30 A synthetic treatment of the study of human remains from archaeological contexts for current and future generations of bioarchaeologists

Are All Warriors Male? Katheryn M. Linduff, Karen S. Robinson, 2008-03-13 *Are All Warriors Male* is a lively inquiry into questions of gender on the ancient Eurasian steppes The book's contributors are archaeologists who work in eastern Europe Central Asia and eastern Asia and this volume is the result of their field research in this vast As little has been written about the evidence of gender roles in ancient or modern pastoralist societies this book helps to fill an empty niche in our understanding of how sexual roles and identities have shaped and been shaped by such social and cultural circumstances *Are All Warriors Male* is a groundbreaking work that challenges current conceptions about the development of human societies in this great cauldron of humanity

Gender and Hide Production Lisa Frink, Kathryn Weedman, 2006-03-23 *Hide production* is one of the oldest crafts known to humans Yet this is the first volume to critically explore the gendered nature of this universal activity amongst hunters gatherers for its meaning in craft production status identity and cultural change Using ethnoarchaeological and archaeological examples from North America and Africa the authors provide new insights of the gendered nature of human behavior

Identity and Subsistence Sarah M. Nelson, 2007 Throughout human history gender has served as one of the ways in which human beings form their identities and then make their way in the world But it is not the only way We also discover ourselves through race age class and other categories Increasingly archaeologists are recovering evidence of the ways in which gender has been important in identity formation in the past especially in its interaction with other social factors In **Identity and Subsistence** a number of scholars look at how the idea of gender has worked with respect to the formation of the self masculinity and femininity human evolution and the development of early agrarian and pastoralist societies **Women in Antiquity** Sarah Milledge Nelson, 2007-03-01 Archaeology is one of our most powerful sources of new information about the past about the lives of our ancient and not so ancient ancestors The contributors to **Women in Antiquity** consider the theoretical problems involved in discerning what the archaeological evidence tells us about gender roles in antiquity The book includes chapters on the history of gender research historical texts mortuary analysis household remains hierarchy and ethnoarchaeology with each chapter teasing out the inherent difficulty in interpreting ancient evidence as well as the promise of new understanding **Women in Antiquity** offers a fresh accessible account of how we might grasp the ways in which sexual roles and identities shaped the past *The Archaeology of Childhood* Jane Eva Baxter, DePaul University, 2005-01-18 The study of children and childhood in historical and prehistoric life is an overlooked area of study that Jane Baxter addresses in this brief book Her timely contribution stresses the importance of studying children as active participants in past cultures instead of regarding them mainly for their effect on adult life Using the critical concepts of gender and socialization she develops new theoretical and methodological approaches for the archaeological study of this large but invisible population **Death and Dying in the Neolithic Near East** Karina Croucher, 2012-06-21 Croucher explores what mortuary practices can reveal about the living populations in the Neolithic Near East Incorporating evidence from excavations she provides an overview of the period and offers a unique insight into changing attitudes towards the human body identity and the experiences of the lived populations of the Neolithic Near East **The Oxford Handbook of the Archaeology of Death and Burial** Sarah Tarlow, Liv Nilsson Stutz, 2013-06-06 This Handbook reviews the state of mortuary archaeology and its practice with forty four chapters focusing on the history of the discipline and its current scientific techniques and methods Written by leading scholars in the field it derives its examples and case studies from a wide range of time periods and geographical areas **Intimacy** A. Kakabadse, 2004-09-21 Sixty per cent of people at work admit to one or more intimate relationship A recently completed international workplace survey highlights that many people intermingle their private and work lives Time spent on tasks the intensity of team relationships and the sharing of common interests make work a multi purpose site satisfying personal needs as well as ambitions and career drives Are managers prepared to face such challenges No However through understanding workplace intimacy practices firm guidance for managers is provided to better prepare them to address such sensitive encounters *Ambiguous Images* Kelley

Hays-Gilpin, 2004 What does rock art say about gender and how can our understanding of gender shape the way that we view rock art A significant contribution to the relatively unexplored field of gender in rock art this volume contains a wealth of information for archaeologists anthropologists and art historians interested in past gender systems Hays Gilpin argues that art is at once a product of its physical and social environment and at the same time a tool of influence in shaping behavior and ideas within a society Taking this stance rock art is shown to be very often one of the strongest lines of evidence available to scholars in understanding ritual practices gender roles and ideological constructs of prehistoric peoples Subsequently issues of representation and the people who made these forms of art are also discussed *“And in Length of Days Understanding” (Job 12:12)* Erez Ben-Yosef, Ian W. N. Jones, 2023-08-01 This two volume book presents cutting edge archaeological research primarily as practiced in the Eastern Mediterranean region These volumes key foci are inspired by the work of Thomas E Levy Volume 1 provides an in depth look at new archaeological research in the southern Levant primarily in modern Israel and Jordan inspired by Levy s commitment to understanding social political and economic processes in a long term or deep time perspective Volume 2 focuses on new research in several key areas of 21st century anthropological archaeology and archaeological science Volume 1 is organized around two major themes 1 the later prehistory of the southern Levant or the Neolithic Chalcolithic and Bronze Age and 2 new research in biblical archaeology or the historical archaeology of the Iron Age Each section contains a combination of new perspectives on key debates and studies introducing new research questions and directions Volume 2 is organized around five major themes 1 the archaeology of the Faynan copper ore district of southern Jordan a key region for archaeometallurgical research in West Asia where Levy conducted field research for over a decade 2 new research in archaeometallurgy beyond the Faynan region 3 marine and maritime archaeology focusing on issues of trade and environmental change 4 cyber archaeology an important 21st century field Levy conceived as the marriage of archaeology engineering computer science and the natural sciences and 5 key issues in anthropological archaeological theory In addition to presenting the reader with an up to date view of research in each of these areas the volume also has chapters exploring the connections between these themes e g the maritime trade of metals and cyber digital archaeological approaches to metallurgy The work contains contributions from both up and coming early career researchers and key established figures in their fields This book is an essential reference for archaeologists and scholars in related disciplines working in the southern Levant and the Eastern Mediterranean **The Invisible Sex** J. M. Adovasio, Olga Soffer, Jake Page, 2016-09-16 Shaped by cartoons and museum dioramas our vision of Paleolithic times tends to feature fur clad male hunters fearlessly attacking mammoths while timid women hover fearfully behind a boulder Recent archaeological research has shown that this vision bears little relation to reality J M Adovasio and Olga Soffer two of the world s leading experts on perishable artifacts such as basketry cordage and weaving present an exciting new look at prehistory With science writer Jake Page they argue that women invented all kinds of critical materials

including the clothing necessary for life in colder climates the ropes used to make rafts that enabled long distance travel by water and nets used for communal hunting Even more important women played a central role in the development of language and social life in short in our becoming human In this eye opening book a new story about women in prehistory emerges with provocative implications for our assumptions about gender today **Landscape History of Hadramawt** Michael J. Harrower, Joy McCorriston, 2020-04-30 Winner of AIA s 2022 Anna Marguerite McCann Award for Fieldwork Reports The rugged highlands of southern Yemen are one of the less archaeologically explored regions of the Near East This final report of survey and excavations by the Roots of Agriculture in Southern Arabia RASA Project addresses the development of food production and human landscapes topics of enduring interest as scholarly conceptualizations of the Anthropocene take shape Along with data from Manayzah site of the earliest dated remains of clearly domesticated animals in Arabia the volume also documents some of the earliest water management technologies in Arabia thereby anchoring regional dates for the beginnings of pastoralism and of potential farming The authors argue that the initial Holocene inhabitants of Wadi Sana were Arabian hunters who adopted limited pastoral stock in small social groups then expanded their social collectives through sacrifice and feasts in a sustained pastoral landscape This volume will be of interest to a wide audience of archaeologists including not only those working in Arabia but more broadly those interested in the ancient Near East Africa South Asia and in Holocene landscape histories generally Torah Irmtraud Fischer, Mercedes Navarro Puerto, 2011-11-10 This volume is the first in The Bible and Women series It presents a history of the reception of the Bible as embedded in Western cultural history with a special focus on the history of women and issues of gender It introduces the series explaining the choice of the Hebrew canon in connection with the Christian tradition and preparing the way for a changed view of women throughout the series The contributors explore the gendered significance of the canonical writings as well as the process of their canonization and the social historical background of ancient Near Eastern women s lives both of which play key roles in the series Turning to the Pentateuch essays address a variety of texts and issues still relevant today such as creation and male female identity in the image of God women s roles in the genealogies of the Pentateuch and in salvation history the rights and responsibilities of women according to the Hebrew Bible s legal and ritual texts and how archaeology and iconography can illustrate the texts of the Torah Contributors include Sophie D mare Lafont Dorothea Erbele K ster Karin Finsterbusch Irmtraud Fischer Mercedes Garc a Bachmann Thomas Hieke Carol Meyers Mercedes Navarro Puerto Jorunn kland Ursula Rapp Donatella Scaiola Silvia Schroer Jopie Siebert Hommes and Adriana Valerio
