Failure to Protect Eric S. Janus, 2018-07-05 Most crimes of sexual violence are committed by people known to the victim acquaintances and family members Yet politicians and the media overemphasize predatory strangers when legislating against and reporting on sexual violence In this book Eric S Janus goes far beyond sensational headlines to expose the reality of the laws designed to prevent sexual crimes He shows that sexual predator laws which have intense public and political support are counterproductive Janus contends that aggressive measures such as civil commitment and Megan's law which are designed to restrain sex offenders before they can commit another crime are bad policy and do little to actually reduce sexual violence Further these new laws make use of approaches such as preventive detention and actuarial profiling that violate important principles of liberty Janus argues that to prevent sexual violence policymakers must address the deep seated societal problems that allow it to flourish In addition to criminal sanctions he endorses the specific efforts of some advocates organizations and social scientists to stop sexual violence by for example taking steps to change the attitudes and behaviors of school age children and adolescents improving public education and promoting community treatment and supervision of previous offenders Janus also warns that the principles underlying the predator laws may be the early harbingers of a preventive state in which the government casts wide nets of surveillance and intervenes to curtail liberty before crimes of any type occur More than a critique of the status quo this book discusses serious alternatives and how best to overcome the political obstacles to achieving rational policy

This book provides a comprehensive dissemination of theoretically grounded and empirically sound research on sex offenders and sex offending. It uses diverse methodological approaches with implications for the research of criminal justice policy and practice. The chapters derive from and focus on different geographical contexts and generate empirical evidence concerning sex offenders and sex offending, including low sex recidivism rates, a lack of sex offender specialization, little to no evidence of sex offending continuity from adolescence to adulthood, and a host of collateral consequences of sex offender registration and notification policies with limited deterrent effect or public safety benefit. This book was originally published as a special issue of the Journal of Crime Justice.

Managing Clinical Risk Caroline Logan, Lorraine Johnstone, 2023-12-01. The second edition of *Managing Clinical Risk* is an authoritative guide on how to engage in risk assessment and management practice in evidence-based, accountable and effective ways. Over the course of a dozen chapters, each oriented around a brief case study reflecting a different area of risk, practitioners are offered guidance on how to read referrals, how to decide what information matters to their evaluations, how to speak to a person who may be reluctant to engage in an assessment of this kind, how to organise the information they have gathered in order to prepare a risk formulation that will in turn guide risk management, and how to communicate opinions and recommendations in ways that have an impact. The book provides an evidence-based understanding of risk assessment and management in key areas of practice: violence, sexual violence, suicidal and self-harmful behaviour, as well as family and relationship violence, organised criminal and group-based violence, and violent extremism. Practices relevant to understanding violent behaviour in individuals are contrasted with those better suited for working with groups and organisations. How practitioners can take account of the diversity of the clients with whom they work is a central consideration in every chapter.

And helping practitioners develop the skills to enable them to formulate risk where there may be multiple areas of concern is a key objective of this book All the contributors to this updated guide to effective practice are scholar practitioners experienced professionals with a track record of writing and teaching about risk assessment and management practice in their respective fields Therefore this book contains realistic rather than idealistic representations of the work required to prevent harmful behaviour by the kinds of clients they work with Together contributors combine theoretical and research knowledge with a wealth of practical skills emphasising the collaborative and recovery focused nature of modern risk management

Sexual Predators Robert A. Prentky,Howard E. Barbaree,Eric S. Janus,2015-06-26 Convicted sex offenders released from custody at the end of their criminal sentences pose a risk for re offense In many US states Sexually Violent Predator SVP laws have been enacted that allow for the post prison preventive detention of high risk sex offenders SVP laws require the courts to make dispositions that protect the public from harm while at the same time respecting the civil rights of the offender This book describes these SVP laws their constitutionality and aspects of their operation Courts hear expert risk testimony based heavily on the results of actuarial risk assessment Problems associated with this testimony include the lack of a theory of recidivism risk bias due to human decision making and the insularity of scholarship and practice along developmental lines The authors propose changes in legal standards as well as a unified developmental model that treats sexual violence as an evolving condition with roots traceable to childhood and paths that extend into adolescence and adulthood

Sexual Violence Elizabeth L. Jeglic, Cynthia Calkins, 2016-10-24 The purpose of this edited volume is to examine the disconnect in the sexual violence prevention field between legislation research and practice The work is focused primarily on United States policies and initiatives with key case studies internationally Contributions show that current policies are mainly based on repeat offenders residence restrictions registration and notification statutes and post sentence initiatives While these initiatives address public fears they are not evidence based and do not necessarily reduce offending Research shows that post sentence policies may destabilize offenders and limit their ability to reintegrate with society at a critical period therefore increasing the chances of recidivism Furthermore the majority of sex crimes 95% are committed by first time offenders This innovative book is divided into two parts juxtaposing what is currently being done legislatively with what the research evidence suggests would be best practice
