Sgana The Black Whale:

S'Gana Sue Stauffacher, 1992 While spending the summer with his grandparents in Wisconsin twelve year old Derek discovers his Haida Indian heritage which draws him to a distressed black whale at a local marine park **Whale Song** Margret Grebowicz, 2017-09-07 Uses the whale song to explore how environmental problems like noise pollution and climate change affect social relations between animals as well as humans **The Care and Feeding of a Pet Black Hole** Michelle Cuevas, 2017-09-12 A girl's friendship with a lonely black hole leads her to face her own sadness in this original funny and touching middle grade novel for fans of Crenshaw and Flora Ulysses When eleven year old Stella Rodriguez shows up at NASA to request that her recording be included in Carl Sagan's Golden Record something unexpected happens A black hole follows her home and sets out to live in her house as a pet The black hole swallows everything he touches which is challenging to say the least but also turns out to be a convenient way to get rid of those items that Stella doesn't want around Soon the ugly sweaters her aunt has made for her all disappear within the black hole as does the smelly class hamster she's taking care of and most important all the reminders of her dead father that are just too painful to have around It's not until Stella her younger brother Cosmo the family puppy and even the bathroom tub all get swallowed up by the black hole that Stella comes to realize she has been letting her own grief consume her And that's not the only thing she realizes as she attempts to get back home This is an astonishingly original and funny adventure with a great big heart **Cosmos** Carl Sagan, 2013-12-10 Renowned astronomer Carl Sagan's classic bestseller that dives into the past present and future of science dealing with the mind staggering enormity of the cosmos in which we exist Associated Press with an Introduction by Ann Druyan and a Foreword by Neil deGrasse Tyson Sagan dazzles the mind with the miracle of our survival framed by the stately galaxies of space Cosmopolitan THE INSPIRATION FOR THE FOX MINISERIES COSMOS POSSIBLE WORLDS HOSTED BY NEIL DEGRASSE TYSON AND STARRING SETH MACFARLANE AND SIR PATRICK STEWART In clear eyed prose Carl Sagan reveals a jewel like blue world inhabited by a life form that is just beginning to discover its own identity and to venture into the vast ocean of space Featuring full color illustrations Cosmos retraces the fourteen billion years of cosmic evolution that have transformed matter into consciousness exploring such topics as the origin of life the human brain Egyptian hieroglyphics spacecraft missions the death of the Sun the evolution of galaxies and the forces and individuals who helped shape modern science **Identified Flying Objects** Dr. Michael P. Masters, 2019-03-22 Could UFOs and Aliens simply be us but from the future This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past Dr Michael P Masters a professor of biological anthropology specializing in human evolutionary anatomy archaeology and biomedicine explores how the persistence of long term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc shaped craft which are likely the very devices that allow our

future progeny to venture backward across the landscape of time Moreover these extraterrestrials are ubiquitously described as bipedal large brained hairless human like beings who communicate with us in our own languages and who possess technology advanced beyond but clearly built upon our own These accounts coupled with a thorough understanding of the past and modern human condition point to the continuation of established biological and cultural trends here on Earth long into the distant human future
