Jungian Analysts Working Across Cultures Catherine Crowther, Jan Wiener, 2021-06-01 Jungian Analysts Working Across Cultures From Tradition to Innovation gives a fascinating account of the wide variety of experiences of Jungian analysts working in different cultures across the world. They describe and reflect on experiences of both offering and receiving training within these cross-cultural partnerships. This is a book not only about training but is also an enlightening cultural commentary for our times. The powerful bi-directionality of cultural influence and discovery is apparent in different ways in every chapter, prompting a re-appraisal of concepts essential to the core values of Jungian practice which show an outdated adherence to culture-bound attitudes. The publication of this book is a timely reminder that when Jungian analysis as we know it is floundering in some Western countries, new projects in countries seeking to develop an analytic culture give hope for sustaining our professional practice.

The Rebirth of the Hero Keiron Le Grice, 2019-06-10 The portrayal of the hero in classical myths and modern films continues to exert a compelling influence on the collective imagination, entertaining and inspiring audiences the world over. On a deeper level, the myth of the hero's adventure is recognized as a fundamental pattern of human experience itself, a symbolic expression of the individual's struggle for greater consciousness, psychological wholeness, and spiritual realization. In *The Rebirth of the Hero*, Keiron Le Grice draws on the ideas and life experiences of C. G. Jung, Joseph Campbell, and Friedrich Nietzsche to explore the spiritual journey of the modern self from existential crisis and the awakening of the self to the dramatic encounter with the underworld of the psyche and the arduous labour of spiritual transformation. In a work of wide-ranging scope and penetrating insight, Le Grice analyzes scenes from a number of popular films: *Jason and the Argonauts*, *Star Wars*, *The Lord of the Rings*, *Pan's Labyrinth*, and more, to illuminate the themes and stages of psychospiritual rebirth and individuation, helping to make the deepest of transformative experiences more readily accessible and intelligible to us all. Drawing interchangeably on classical Greek myths, Christianity, alchemy, Romanticism, and depth psychology, the author also relates the individual's personal journey of transformation to the relationship in Western civilization between spirit and nature, reason and instinct, and masculine and feminine. In so doing, *The Rebirth of the Hero* demonstrates the critical significance of the archetypal pattern of the hero not only for the individual but also for cultural renewal and the wider spiritual transformation of our time.

On Soul and Earth Elena Liotta, 2013-12-16 *On Soul and Earth* offers an original perspective on the relationship between the environment and the human psyche. Physical spaces contribute to the building of identity through personal experience and memory. Places evoke emotions and carry their own special meanings. Elena Liotta and her contributors also explore the neglected topics of migration and travel. The author has extensive clinical experience of working with patients from a wide variety of national and cultural backgrounds. Globalization is present in the clinical office as well as in the wider world, and the transformations currently being wrought in the areas of cultural and

national identity also impact on clinical work This book will be of interest to Jungian analysts as well as psychotherapists and mental health professionals especially those who are addressing transcultural and multicultural issues including voluntary or enforced migration It will also appeal to urban planners architects and those interested in environmental issues **The**

Archetypal Pan in America Sukey Fontelieu, 2018-05-20 The Archetypal Pan in America examines the complex moral and ethical dilemmas that Americans have had to face over the last few decades including the motivations for the Vietnam War who was in control of women's productive rights how to extend civil rights to all protests for the historically unapologetic narrative of the genocide of Native Americans and the growing number of school shootings since the Columbine massacre Fontelieu suggests that the emotional pain these issues created has not resolved and that it continues to surface in the guise of new issues but with a similar dysfunctional pattern The book argues that this pattern acts in the culture in the same manner as a psychological defense system stimulating fight flight or freeze reactions requiring great stores of energy when activated and deflecting attention from other areas Relying on Jung's theory of the applicability of myth to psychological problems and the post Jungian theory of cultural complexes the myths of the Greek god Pan are used to scaffold a metaphor that informs this pattern Fontelieu proposes that rather than looking inward as a culture for how to accept its changing role in a global world this pattern reinforces dysfunctional emotional responses to the reoccurring traumas of modernity responses such as an increase in the magnetic appeal of hypermasculinity or choosing to remain naively self absorbed The Archetypal Pan in America will be of great interest to Jungian analysts and scholars of depth psychology as well as academics and postgraduate students studying psychology foreign studies literary criticism politics and cultural studies **For Love of**

of Latin America Thomas Singer, 2023-12-01 Cultural Complexes of Latin America South and the Soul explores the theory and embodied reality that cultural complexes are powerful determinants in the attitudes behaviour and emotional life of individuals and groups The contributing authors all from several Latin American countries present compelling historical anthropological sociological mythological psychological and personal perspectives on a part of the world that is full of promise and despair Latin America is a region marked with psychic fault lines that cause disturbances in its populations on issues of social class ethnicity race religion gender and even geography Many of these fault lines appear to have their origins in the basic fault that occurred with the conquest and colonization of the region primarily by the Spanish and Portuguese This basic fault and its subsequent fault lines reside not only in various groups that compete for status power wealth and meaning but in the psyche of every Latin American individual who carries the emotional memories and scars of conflicts that have coursed through their mixed blood for generations

Sinologism Ming Dong Gu, 2013 Why for centuries have the West and the world continuously produced China knowledge that deviates from Chinese realities Why since the mid nineteenth century have Chinese intellectuals oscillated between commendation and condemnation of their own culture and between fetishization and demonization of all things Western And why have some of the world's wisest thinkers expressed opinions on Chinese culture which are simply wrong In order to answer these questions this book explores the process of knowledge production about China and the Chinese civilization and in turn provides a critique of the ways in which this knowledge is formed Ming Dong Gu argues that the misperceptions and misinterpretations surrounding China and the Chinese civilisation do not simply come from misinformation biases prejudices or political interference but follow certain taken for granted principles that have evolved into a cultural unconscious Indeed Gu argues that the conflicting accounts in China West studies are the inevitable outcome of this cultural unconscious which constitutes the inner logic of a comprehensive knowledge system which he terms Sinologism This book explores Sinologism's origin development characteristics and inner logic and critiques its manifestations in the writings of Chinese Western and non Western thinkers and scholars including Montesquieu
