

An aerial photograph of a vast, densely populated urban area, likely a slum or informal settlement. The landscape is covered with a complex network of small, closely packed buildings and structures. In the background, a range of mountains is visible under a clear sky. The overall tone is somber and documentary.

Re-imagined Richard Bower, 2016-06-10 As with so many facets of contemporary western life architecture and space are often experienced and understood as a commodity or product The premise of this book is to offer alternatives to the practices and values of such westernised space and Architecture with a capital A by exploring the participatory and grass roots practices used in alternative development models in the Global South This process re contextualises the spaces values and relationships produced by such alternative methods of development and social agency It asks whether such spatial practices provide concrete realisations of some key concepts of Western spatial theory questioning whether we might challenge the space and architectures of capitalist development by learning from the places and practices of others Exploring these themes offers a critical examination of alternative development practices methods in the Global South re contextualising them as architectural engagements with socio political space The comparison of such interdisciplinary contexts and discourses reveals the political social and economic resonances inherent between these previously unconnected spatial protagonists The interdependence of spatial issues of choice value and identity are revealed through a comparative study of the discourses of Henri Lefebvre John Turner Doreen Massey and Nabeel Hamdi These key protagonists offer a critical framework of discourses from which further connections to socio spatial discourses and concepts are made including post marxist theory orientalism post structural pluralism development anthropology post colonial theory hybridity difference and subalterneity By looking to the spaces and practices of alternative development in the Global South this book offers a critical reflection upon the working practices of Westernised architecture and other spatial and political practices In exploring the methodologies implications and values of such participatory development practices this book ultimately seeks to articulate the positive

potential and political of learning from the difference multiplicity and otherness of development practice in order to re imagine architecture and space *Rebuilding Asia Following Natural Disasters* Patrick Daly,R. Michael Feener,2016-04-07

Providing a detailed and comparative assessment of the humanitarian responses to a series of major disasters in Asia over the past two decades including massive earthquakes volcanic eruptions and tsunamis this book explores complex and changing understandings and practices of relief recovery and reconstruction These critical investigations raise questions about the position and responsibilities of a growing range of stakeholders and provide in depth explorations of the ways in which local communities are transformed on multiple levels not only by the impact of disaster events but also by the experiences of rebuilding This timely volume highlights how the experiences of Asia can contribute towards post disaster responses globally to safeguard future communities and reduce vulnerabilities This is a valuable resource for academic researchers interested in post disaster transformations and development studies practitioners in NGOs and government officials dealing with disaster response and disaster risk reduction **The Upside of Down** Thomas

Homer-Dixon,2010-02-05 From the author of the 1 bestselling and Governor General s Literary Award winning *The Ingenuity Gap* an essential addition to the bookshelf of every thinking person with a stake in our world and our civilization This is a groundbreaking essential book for our times Thomas Homer Dixon brings to bear his formidable understanding of the urgent problems that confront our world to clarify their scope and deep causes *The Upside of Down* provides a vivid picture of the immense stresses that are simultaneously converging on our societies and threatening a breakdown that would profoundly shake civilization It shows too how we can choose a better route into the future With the immediacy that characterized his award winning international bestseller *The Ingenuity Gap* Homer Dixon takes us on a remarkable journey from the fall of the Roman empire to the devastation of the 9 11 attacks in New York from Toronto in the 2003 blackout to the ancient temples of Lebanon and the wildfires of California Incorporating the newest findings from an astonishing array of disciplines he argues that the great stresses our world is experiencing global warming energy scarcity population imbalances and widening gaps between rich and poor can t be looked at independently As these stresses combine and converge the risk of breakdown rises The first signs are appearing in the wastelands of the Arctic the mud clogged streets of Gona ves Haiti and the volatile regions of the Middle East and Asia But while the consequences of denial in our more perilous world are dire Homer Dixon makes clear that we can use our emerging understanding of the complex systems in which we live to avoid catastrophic collapse in a way the Roman empire could not This vitally important new book shows how in the face of breakdown we can still provide for the renewal of our global civilization We are creating the conditions for catastrophe but by understanding the underlying principles that make human and natural systems resilient and by working together to put those principles into effect we can still limit the severity of collapse and foster regeneration innovation and renewal *Acts of Knowing* Stephen Cowden,Gurnam Singh,2013-03-28 This provocative book s starting point is a deep and profound concern about the

commodification of knowledge within the contemporary university Acts of Knowing aims to provide readers with a means of understanding the issues from the perspective of Critical Pedagogy an educational philosophy which believes that knowing must be freed from the constraints of the financial and managerialist logics which dominate the contemporary university Critical Pedagogy is important for three key reasons it conceptualises pedagogy as a process of engagement between the teacher and taught secondly that that engagement is based on an underlying humanistic view about human worth and value and thirdly that the knowing which can come out of this engagement needs to be understood essentially as exchange between people rather than a financial exchange Cowden and Singh argue that the conception of education as simply a means for securing economic returns for the individual and for the society's positioning in a global marketplace represents a fundamentally impoverished conception of education which impoverishes not just individuals but society as a whole

Environment and the City Joe Ravetz, Clive George, Joe Howe, 2004-07-15 For the first time at the beginning of the twenty first century urban dwellers outnumber rural residents and this trend is set to continue Consequently one of the most pressing issues of our time is how to square the social and economic development of cities with their environmental limits and those of the wider environment The theme of the environment and city is topical at every level from the politics of global trade to local community networks Environment and the City looks at the evolution of cities in the developed and the developing world and the implications for resource consumption and environmental impacts It takes a cross cutting approach with new thinking on multiple geographies the configuration of networks exclusion consumption risk and ecological footprint Urban environmental themes and their related social economic and political agendas are outlined In turn the environmental impacts and environmental agendas relating to key sectors of the urban economy are discussed The global context to such issues is then explored before the practical tools and methods of urban environmental management are investigated The theme of the sustainable city emerges from this not so much as a standard menu but as a learning process between all sections of society This book a valuable resource provides a concise accessible route map for all students interested in the environmental issues emanating from our urban society Written to aid student understanding the easily navigable text features boxed practical examples discussion points signposts to reading and websites and a glossary

Architecture and Social Sustainability Alexandra Staub, 2025-06-25 Architecture and Social Sustainability shows how we can better design for stakeholder agency serve historically marginalized populations and further our theoretical thinking about sustainability writ large With chapters exploring both the urban and the building scale this volume examines the design of buildings and urban settings to illustrate how we can create more inclusive and equitable communities through broadening our design approach Tracing how the professionalization of architecture and urban design has shut out stakeholder input this book offers a range of methods and theoretical ideas to re tool the design process for better social sustainability The book illustrates these concepts through a series of case studies that have worked around systemic inequalities recaptured stakeholder voices and

helped promote spatial and social justice Case studies look at reparative urban and landscape design the United States informal market structures in Nigeria co designed housing for low income communities in India and Brazil and participatory design for housing schools and healthcare facilities in Europe and the U K Essential reading for architects and urban designers seeking alternatives to conventional practice as well as educators and students incorporating social sustainability as a foundational design concept Architecture and Social Sustainability ties together design thinking and action to show architecture s potential for social change The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Beyond the Informal Ninik Suhartini,Paul Jones,2023-01-01 This book provides a much needed analysis of the pivotal role of the urban kampung in Indonesia s urbanization process and importantly provides a deeper understanding of how these communities create their complex socio physical environments through self organization The book challenges the current formal approaches and practices to modern planning in Indonesia where many kampungs are classed as illegal and excluded from city plans Beyond informality unpacks via three case studies the self generated planning and development arrangements and mechanisms which occur parallel to processes of formal exclusion adaptation negotiation and modification Kampungs are posited as inseparable urban entities contributing to the complex assemblage of the city and the dynamics of contemporary urban planning and design In the context of planning and design practice this book provides a better understanding on how one needs to consider human scale urbanism to achieve more effective and efficient planning plans and policies in the self organized city Even though self organization by residents comes with its challenges as outlined in the book formal planning in both Indonesia and other developing countries has much to learn from understanding self organized settlements kampung and informal settlements as they are

Koenig, Carl H. Schultz, 2009-09-30 As societies become more complex and interconnected the global risk for catastrophic disasters is increasing Demand for expertise to mitigate the human suffering and damage these events cause is also high A new field of disaster medicine is emerging offering innovative approaches to optimize disaster management Much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources Now for the first time a coherent and comprehensive collection of scientific observations and evidence based recommendations with expert contributors from around the globe is available in Koenig and Schultz's *Disaster Medicine Comprehensive Principles and Practices* This definitive work on disaster medicine identifies essential subject matter clarifies nomenclature and outlines necessary areas of proficiency for healthcare professionals handling mass casualty crises It also describes in depth strategies for the rapid diagnosis and treatment of victims suffering from blast injuries or exposure to chemical biological and radiological agents **Encyclopedia of Consumption and Waste** Carl A. Zimring, William L. Rathje, Consulting Editor, 2012-02-27 Archaeologists and anthropologists have long studied artifacts of refuse from the distant past as a portal into ancient civilizations but examining what we throw away today tells a story in real time and becomes an important and useful tool for academic study Trash is studied by behavioral scientists who use data compiled from the exploration of dumpsters to better understand our modern society and culture Why does the average American household send 470 pounds of uneaten food to the garbage can on an annual basis How do different societies around the world cope with their garbage in these troubled environmental times How does our trash give insight into our attitudes about gender class religion and art The *Encyclopedia of Consumption and Waste* explores the topic across multiple disciplines within the social sciences and ranges further to include business consumerism environmentalism and marketing to comprise an outstanding reference for academic and public libraries

People's Spaces Nihal Perera, 2015-10-23 Who controls space Powerful corporations institutions and individuals have great power to create physical and political space through income and influence *People's Spaces* attempts to understand the struggle between people and institutions in the spaces they make Current literature on cities and planning often looks at popular resistance to institutional authority through open mass movement protest These views overlook the fact that subaltern classes are not often afforded the luxury of open organized political protest *People's Spaces* investigates individual's diverse approaches in reconciling the difference between their spatial needs and spatial availability Through case studies in Southeast Asia India Nepal and Central Asia the book explores how people accommodate their spatial needs for everyday activities and cultural practices within a larger abstract spatial context produced by the power holders **Public Goods versus Economic Interests** Freia Anders, Alexander Sedlmaier, 2016-07-15 Squatting is currently a global phenomenon A

concomitant of economic development and social conflict squatting attracts public attention because implicitly or explicitly it questions property relations from the perspective of the basic human need for shelter So far neglected by historical inquiry squatters have played an important role in the history of urban development and social movements not least by contributing to change in concepts of property and the distribution and utilization of urban space An interdisciplinary circle of authors demonstrates how squatters have articulated their demands for participation in the housing market and public space in a whole range of contexts and how this has brought them into conflict and or cooperation with the authorities The volume examines housing struggles and the occupation of buildings in the Global North but it is equally concerned with land acquisition and informal settlements in the Global South In the context of the former squatting tends to be conceived as social practice and collective protest whereas self help strategies of the marginalized are more commonly associated with the southern hemisphere This volume s historical perspective however helps to overcome the north south dualism in research on squatting
