Early Psychological Research

Contributions from Women of Color, Volume 2 Rihana Shiri Mason, Jon E. Grahe, Michelle L. Ceynar, 2024-07-29 This volume serves as a companion to *Early Psychological Research Contributions from Women of Color Volume I*. It focuses on the dissertations of 20 builders women of color who earned their doctoral degrees in psychology prior to 1990 and who were leaders in the field through their leadership or innovation. An introductory chapter bridges the two volumes. Each subsequent chapter summarizes and examines a dissertation using a consistent format including a biographical sketch of the builder with an emphasis on her significant contribution to an organization or innovation that moved the field forward, a summary of the dissertation, a reproducibility critique of the dissertation, and an alternative framework section that analyzes the dissertation from a modern theoretical perspective or methodological approach (e.g., feminist theory, liberation psychology, mestiza consciousness, etc.). The topics cover the breadth of the discipline of psychology, including physiological, cognitive, developmental, social, and clinical. Some topics are also relevant to business, education, medicine, and social work. The varying nature of these dissertations allows the book to be used to augment coursework either as a complete collection or as individual chapters. This volume is intended for both instructors and students. The course activities provide examples of how to integrate key aspects of the dissertation research into the classroom. The volume was written with upper-level undergraduate students in mind so that it could be used across the psychology curriculum, but the editors envision this book as a potential graduate-level text as well.

Enacting Research Methods in Information Systems: Volume 2 Leslie P. Willcocks, Chris Sauer, Mary C. Lacity, 2016-05-27 This edited three-volume edition brings together significant papers previously published in the *Journal of Information Technology (JIT)* over its 30-year publication history. The three volumes of *Enacting Research Methods in Information Systems* celebrate the methodological pluralism used to advance our understanding of information technology's role in the world today. In addition to quantitative methods from the positivist tradition, *JIT* also values methodological articles from critical research perspectives, interpretive traditions, historical perspectives, grounded theory, and action research and design science approaches. Volume 1 covers Critical Research, Grounded Theory, and Historical Approaches. Volume 2 deals with Interpretive Approaches and also explores Action Research. Volume 3 focuses on Design Science Approaches and discusses Alternative Approaches, including Semiotics Research, Complexity Theory, and Gender in IS Research. The *Journal of Information Technology (JIT)* was started in 1986 by Professors Frank Land and Igor Aleksander with the aim of bringing technology and management together and bridging the great divide between the two disciplines. The journal was created with the vision of making the impact of complex interactions and developments in technology more accessible to a wider audience. Retaining this initial focus, the *JIT* has gone on to extend into new and innovative areas of research, such as the launch of *JITTC* in 2010. A high-impact journal, *JIT* shall continue to publish leading trends based on significant research in the field.
