An Evaluation of the Chemical Weapons Convention and the U.S. National Interest Jeffery M. Heftman, 1997 **Chemical and Biological Warfare** Eric Croddy, 1997 Covers the history of this form of warfare information on chemical agents themselves as well as regulation controls and disposal policies Scientific research on CBW extending as far back as 1940 is organized under categories of CBW agents and their corresponding subheadings The Chemical Weapons Taboo Richard M. Price, 2018-09-05 Richard M Price asks why among all the ominous technologies of weaponry throughout the history of warfare chemical weapons carry a special moral stigma Something more seems to be at work than the predictable resistance people have expressed to any new weaponry from the crossbow to nuclear bombs Perceptions of chemical warfare as particularly abhorrent have been successfully institutionalized in international proscriptions and Price suggests understanding the sources of this success might shed light on other efforts at arms control To explore the origins and meaning of the chemical weapons taboo Price presents a series of case studies from World War I through the Gulf War of 1990 1991 He traces the moral arguments against gas warfare from the Hague Conferences at the turn of the century through negotiations for the Chemical Weapons Convention of 1993 From the Italian invasion of Ethiopia to the war between Iran and Iraq chemical weapons have been condemned as the poor man's bomb Drawing upon insights from Michel Foucault to explain the role of moral norms in an international arena rarely sensitive to such pressures he focuses on the construction of and mutations in the refusal to condone chemical weapons

Allies at Odds? T. Mowle, 2004-10-28 Why despite their similar goals do the policy preferences of the European Union and United States diverge on so many multilateral issues To answer that question *Allies at Odds* thoroughly examines recent international efforts in arms control environmental protection human rights and military cooperation Evidence from 20 separate cases supports the expectations of the realist approach to international politics which focuses on the role of power above all Neither cultural factors nor international institutions have as much influence as some expect This finding was as true during the Clinton Presidency as during the Bush indicating that focusing on personalities overlooks more substantial and longer lasting differences between the Atlantic allies **Netherlands Yearbook of International Law 1997** T. M. C. Asser Instituut, 1998-07-15 Contains an extensive review of Dutch state practice from the parliamentary year 1998 1999
